Matt, 2011-11-23 *Mysticism and science* What do they have in common How can one enlighten the other By drawing on modern cosmology and ancient Kabbalah Matt shows how science and religion can together enrich our spiritual awareness and help us recover a sense of wonder and find our place in the universe Drawing on the insights of physics and Jewish mysticism Daniel Matt uncovers the sense of wonder and oneness that connects us with the universe and God He describes in understandable terms the parallels between modern cosmology and ancient Kabbalah He shows how science and religion together can enrich our spiritual understanding We embody the energy of the big bang writes Matt Furthermore God is not somewhere else hidden from us God is right here hidden from us To discover the presence of God Matt draws on both science and theology fact and belief and on the truths embodied in Buddhism Hinduism Islam and Christianity as well as Judaism A rich dialogue between the physical and the spiritual God the Big Bang takes us on a deeply personal thoughtful and inspiring journey that helps us find our place in the universe and the universe in ourselves

God and Gaia Michael S Northcott, 2022-12-22 *God and Gaia* explores the overlap between traditional religious cosmologies and the scientific Gaia theory of James Lovelock It argues that a Gaian approach to the ecological crisis involves rebalancing human and more than human influences on Earth by reviving the ecological agency of local and indigenous human communities and of nonhuman beings Present day human ecological influences on Earth have been growing at pace since the Scientific and Industrial Revolutions when modern humans adopted a machine cosmology in which humans are the sole intelligent agency The resultant imbalance between human and Earthly agencies is degrading the species diversity of ecosystems causing local climate changes and threatens to destabilise the Earth as a System Across eight chapters this ambitious text engages with traditional cosmologies from the Indian Vedas and classical Greece to Medieval Christianity with case material from Southeast Asia Southern Africa and Great Britain It discusses concepts such as deep time and ancestral

time the ethics of genetic engineering of foods and viruses and holistic ecological management Northcott argues that an ontological turn that honours the differential agency of indigenous humans and other kind and that draws on sacred traditions will make it is possible to repair the destabilising impacts of contemporary human activities on the Earth System and its constituent ecosystems This book will be of considerable interest to students and scholars of the environmental humanities history and cultural and religious studies *South African Gardening and Country Life* ,1927 *An Apple's Life* Nancy Dickmann,2010 Introduce the life cycle of an apple showing how it begins life grows and reproduces *The Publishers Weekly* ,1924 **The Tree of Life** Douglas Estes,2020-03-17 The tree of life is an iconic visual symbol at the edge of religious thought over the last several millennia As a show of its significance the tree bookends the Christian canon yet scholarship has paid it minimal attention in the modern era In *The Tree of Life* a team of scholars explore the origin development meaning reception and theology of this consequential yet obscure symbol The fourteen essays trek from the origins of the tree in the texts and material culture of the ancient Near East to its notable roles in biblical literature to its expansion by early church fathers and Gnostics to its rebirth in medieval art and culture and to its place in modern theological thought
