vinyl early forms of portable technology like divining rods and even the use of songbirds as domestic music machines Smith builds a scaffolding of historical case studies to demonstrate how green media archaeology can make sound studies vibrate at an ecological frequency while opening the ears of eco criticism Throughout this eye opening and timely book he makes readers more aware of the costs and consequences of their personal media consumption by prompting comparisons with non digital non electronic technologies and by offering different ways in which sound media can become eco sonic media In the process he forges interdisciplinary connections opens new avenues of research and poses fresh theoretical questions for scholars and students of media sound studies and contemporary environmental history Wonder in South Asia Tulasi Srinivas,2023-11-01 The experience of wonder encompassing awe bewilderment curiosity excitement fear dread mystery perplexity reverence surprise and supplication and the ineffable quality of that which is wondrous have been entwined in religion and human experience Yet strangely wonder in non western societies including South Asia has rarely been acknowledged or understood This groundbreaking volume brings together historians and ethnographers of South Asia including leading and emerging scholars to consider the place and meaning of wonder in such varied joyful tense and creative sites and moments as Sufi music performances in Gujarat Tamil graveyard processions trans women s charitable practices Kipling s Orientalist tales village Kuchipudi dance performances and Rajasthani healing shrines Offering a synthetic and scholarly reading of wonder that speaks to the political aesthetic and ethical worlds of South Asia these essays redefine the nature and meaning of wonder and its worlds Taken together they provide an invaluable research tool for those in the fields of Asian religion religion in context and South Asian religions in particular **New Critical Essays on H.P.**

Thomas Moynihan, 2020-10-20 How humanity came to contemplate its possible extinction From forecasts of disastrous climate change to prophecies of evil AI superintelligences and the impending perils of genome editing our species is increasingly concerned with the prospects of its own extinction With humanity's future on this planet seeming more insecure by the day in the twenty first century existential risk has become the object of a growing field of serious scientific inquiry But as Thomas Moynihan shows in *X Risk* this preoccupation is not exclusive to the post atomic age of global warming and synthetic biology Our growing concern with human extinction itself has a history Tracing this untold story Moynihan revisits the pioneers who first contemplated the possibility of human extinction and stages the historical drama of this momentous discovery He shows how far from being a secular reprise of religious prophecies of apocalypse existential risk is a thoroughly modern idea made possible by the burgeoning sciences and philosophical tumult of the Enlightenment era In recollecting how we first came to care for our extinction Moynihan reveals how today's attempts to measure and mitigate existential threats are the continuation of a project initiated over two centuries ago which concerns the very vocation of the human as a rational responsible and future oriented being
