Losing Time The Industrial Policy Debate A 20th Century Fund:

Losing Time Otis Graham, 1994-01-04 Industrial policy reform Otis Graham argues is an important part of a public private set of remedies but it hinges upon an improved use of policy history and of historical perspective generally He proposes an explicit if minimalist approach by the federal government that would unify and reform our de facto industrial policies in order to equip the United States with the institutional capacity to formulate industrial interventions guided by strategic vision and bipartisan participation by labor and management

Foreign Direct Investment in the United States Edward Montgomery Graham, Paul R. Krugman, 1991 The authors successfully debunk the myths circulated by the critics of foreign investment Their research is careful their writing clear and their analysis incisive Susan Liebler The Wall Street Journal

The New Economic Populism William W. Franko, Christopher Witko, 2018 Donald Trump's 2016 victory shocked the world but his appeals to the economic discontent of the white working class should not be so surprising as stagnant wages for the many have been matched with skyrocketing incomes for the few Though Trump received high levels of support from the white working class once in office the newly elected billionaire president appointed a cabinet with a net worth greater than one third of American households combined Furthermore he pursued traditionally conservative tax welfare state and regulatory policies which are likely to make economic disparities worse Nevertheless income inequality has grown over the last few decades almost regardless of who is elected to the presidency and congress There is a growing consensus among scholars that one of the biggest drivers of income inequality in the United States is government activity or inactivity Just as the New Deal and Great Society programs played a key role in leveling income distribution from the 1930s through the 1970s federal policy since then has contributed to expanding inequality Growing inequality bolsters the resources of the wealthy leading to greater influence over policy and it contributes to partisan polarization Both prevent the passage of policy to address inequality creating a continuous feedback loop of growing inequality The authors of this book argue that it is therefore misguided to look to the federal government as citizens have tended to do since the New Deal to lead on economic policy to fix inequality In fact they argue that throughout American history during periods of rapid economic change the federal government has been stymied by the federal institutional design created by the Constitution The winners of economic change have taken advantage of veto points to prevent change that would address the problems experienced by the losers of major economic change Even the New Deal in many ways the model of federal policy activism was largely borrowed from policies created in the state laboratories of democracy in the preceding years and decades The authors argue that in the current crisis of growing inequality we are seeing a similar dynamic and demonstrate that many states are actively addressing economic inequality William Franko and Christopher Witko argue that the states that will address inequality are not necessarily those with the greatest objective inequality but those where citizens are aware of growing inequality where left leaning politicians hold power where unions are strong and where the presence of direct

democracy allow for more majoritarian public policy outcomes In the empirical chapters Franko and Witko examine how these factors have shaped policies that boosted incomes at the bottom the minimum wage and the Earned Income Tax Credit and reduce incomes at the top with top marginal tax rates between 1987 and 2010 The authors argue that if history is a guide increasingly egalitarian policies at the state level will spread to other states and eventually to the federal level setting the stage for a more equitable future **Handbook of the Economics of Innovation** Bronwyn H. Hall, Nathan

Rosenberg, 2010-03-06 How does technology advance How can we best assimilate innovation These questions and others are considered by experts on the theories and applications of technological innovations Considering subjects as diverse as the diffusion of new technologies and their industrial applications governmental policies and manifestations of innovation in our institutions history and environment our contributors map milestones in research and speculate about the roads ahead Wasteful inefficient and frequently wrongheaded the process of technological changes is here revealed as a describable scientific force Two volumes available separately and as a set Expert articles consider the best ways to establish optimal incentives in technological progress Science and innovation both their theories and applications are examined at the intersections of the marketplace policy and social welfare Economists are only part of an audience that includes attorneys educators and anyone involved in new technologies **Experimental Capitalism** Steven Klepper, 2015-12-29 How

American industries rose to dominate the economic landscape in the twentieth century For much of the twentieth century American corporations led the world in terms of technological progress Why did certain industries have such great success Experimental Capitalism examines six key industries automobiles pneumatic tires television receivers semiconductors lasers and penicillin and tracks the highs and lows of American high tech capitalism and the resulting innovation landscape Employing nanoeconomics a deep dive into the formation and functioning of companies Steven Klepper determines how specific companies emerged to become the undisputed leaders that altered the course of their industry s evolution Klepper delves into why a small number of firms came to dominate their industries for many years after an initial period of tumult including General Motors Firestone and Intel Even though capitalism is built on the idea of competition among many he shows how the innovation process naturally led to such dominance Klepper explores how this domination influenced the search for further innovations He also considers why industries cluster in specific geographical areas such as semiconductors in northern California cars in Detroit and tires in Akron He finds that early leading firms serve as involuntary training grounds for the next generation of entrepreneurs who spin off new firms into the surrounding region Klepper concludes his study with a discussion of the impact of government and the potential for policy to enhance a nation s high tech industrial base A culmination of a lifetime of research and thought Experimental Capitalism takes a dynamic look at how new ideas and innovations led to America s economic primacy The Servant Economy Jeff Faux, 2012-05-17 Renowned economist Jeff Faux explains why neither party s leaders have a plan to remedy America s unemployment inequality or long economic slide

America's political and economic elite spent so long making such terrible decisions that they caused the collapse of 2008. So how can they continue down the same road? The simple answer is that no one in charge wants to publicly acknowledge because things are still pretty great for the people who run America. It was an accident of history. Jeff Faux explains that after World War II the U.S. could afford a prosperous middle class, a dominant military, and a booming economic elite at the same time. For the past three decades, all three have been competing with the middle class, always losing. Soon the military will decline as well. The most plausible projections Faux explores foresee a future economy nearly devoid of production and exports, with the most profitable industries existing solely to serve the wealthiest 1%. The author's last book, *The Global Class War*, sold over 20,000 copies by correctly predicting the permanent decline of our debt-burdened middle class at the hands of our offshoring executives, out-of-control financiers, and their friends in Washington. Since his last book, Faux is repeatedly asked what either party will do to face these mounting crises. After looking over actual policies, proposed plans, non-partisan reports, and think tank papers, his astonishing conclusion is more of the same.

Philadelphia Liberals and the Problem of Jobs, 1951-1980 Guian Alexander McKee, 2002 **The Structure of American Industry** James Brock, 2013-03-20 Americans continually cross paths with major industries that comprise the U.S. economy. These industries face and raise challenging issues that in turn generate important economic questions. How are individual industries organized and structured? What share of their market do they represent? What are the major public policy issues they affect? What are the economic consequences of addressing them? A single text examining every industry would provide a disjointed, haphazard analysis. The case study approach taken in *The Structure of American Industry* avoids such shortcomings. The expert author of each case study, fourteen in all, presents a comprehensive and coherent analysis of a specific industry. The holistic, in-depth treatment sparks lively interest, does not succumb to theoretical abstractions, and offers practical answers to economic questions.

Competitiveness Matters Candace Howes, 2000-04-06 *DIV* Argues that competitiveness is essential to the health of the U.S. economy and standard of living. *Annual Report* Century Foundation, 1998
