The Modes of Origin of Lowest Organisms H. Charlton Bastian, 2020-07-26 Reproduction of the original *The Modes of Origin of Lowest Organisms* by H Charlton Bastian **The modes of origin of lowest organisms including a discussion of the experiments of M. Pasteur** H. Charlton Bastian, 2021-05-19 In *The Modes of Origin of Lowest Organisms* H Charlton Bastian embarks on a rigorous examination of the origins of microscopic life employing a blend of empirical evidence and theoretical discourse Drawing upon the pioneering experiments of Louis Pasteur Bastian critiques and expands upon the concept of abiogenesis challenging the prevailing notions of spontaneous generation that dominated the scientific landscape of the late 19th century The text is characterized by Bastian's meticulous detail and analytic approach reflecting the era's burgeoning interest in microbiology and evolutionary theory and is a significant contribution to the discussions surrounding biogenesis and the complexity of life H Charlton Bastian a prominent figure in Victorian biology and a staunch advocate for the study of life sciences was deeply influenced by the controversies surrounding germ theory and microbiological research Educated in both medicine and natural sciences Bastian's experiences in the field and his interactions with contemporary scientists propelled him to scrutinize the foundational principles of life itself His reflections reveal a passionate commitment to understanding the intricacies of life forms that were often dismissed or misunderstood by his predecessors making his work an essential narrative in the history of biological thought This book is highly recommended for readers interested in the intersection of biology and philosophy as well as those keen on the historical context of microbiology Bastian's thoughtful analysis not only illuminates the debates of his time but also invites contemporary readers to reconsider the origins of life in light of modern scientific advancements *The Modes of Origin of Lowest Organisms* serves as both a scholarly resource and a thought provoking discourse for anyone fascinated by the beginnings of biological inquiry First Steps in the Origin of Life in the Universe Julian Chela-Flores, Tobias Owen, François Raulin, 2011-06-28 Proceedings of the Sixth Trieste Conference on Chemical Evolution Trieste Italy 18-22 September 2000 **Catalogue of the Mercantile Library of Brooklyn: N-Z** Mercantile Library Association of Brooklyn, 1880 **Catalogue of the Mercantile Library of the City of Brooklyn**, 1877 **Catalogue of the Mercantile Library of Brooklyn: A-C** Mercantile Library Association of Brooklyn, 1877 *Chemical News and Journal of Industrial Science*, 1877 Proceedings of the Royal Society of London Royal Society (Great Britain), 1872 Obituary notices of deceased fellows were included in v 7 64 v 75 is made up of obituaries of deceased fellows chiefly for the period 1898-1904 with a general index to previous obituary notices the notices have been continued in subsequent volumes as follows v 78a-79b 80a-b 86a-b 87a-88a-b **Proceedings of the Royal Society** Royal Society (London), 1872 **The Chemical News and Journal of Physical Science**, 1877 *The Chemical News*, 1877 *The Bookseller and the Stationery Trades' Journal*, 1887 Official organ of the book trade of the United Kingdom **Catalogue of the Library of the Boston Athenaeum** Boston Athenaeum, 1876 **Catalogue ... 1807-1871** Boston Mass, Athenaeum,

libr,1876 **Catalogue of the Brooklyn Library** Brooklyn Public Library,1877 **The Saturday Review of Politics, Literature, Science and Art** ,1871 Knowledge & Illustrated Scientific News ,1887 Evolution and the Spontaneous Generation Debate H. Charlton Bastian,2001-04-15 Carefully selected by James Strick this comprehensive collection of primary source materials resurrects the forgotten man of evolutionary theory Henry Charlton Bastian and opens a new window on controversies which divided the ranks of evolutionary naturalists The hostile reaction of Thomas Henry Huxley and his allies to Bastian s challenge that they accept the theory of spontaneous generation and the materialism connected with it shows just how far they were willing to go to sanitize evolutionary theory for public consumption while maintaining their own respectability Strick s collection is a vivid reminder of the volatile politics of evolution and the importance of not losing sight of the losers in scientific controversy Bernard Lightman Strick garners all the backbiting documents to show how crucial aspects of the Darwinian orthodoxy were made The knock down fight in the 1870s between Huxley and Tyndall and the brilliant pathology professor Henry Bastian was over the inclusion of spontaneous generation Bastian s initial success in justifying it and picking up rival medical support reveals that Huxley s evolutionary view was not an inevitable outcome The sparring in Strick s volumes proves that it took all of Huxley s and Tyndall s scientific rhetorical and darker skills to establish their version of Darwinism Adrian Desmond An invaluable resource for the understanding of the controversies on the origin of life on earth Dr Iris Fry Everybody knows that life s creation was the last redoubt of natural theology in the nineteenth century and spontaneous generation the atheists siege weapon for destroying it Strick s authoritative collection breaks new ground by showing how unbelievers themselves came to blows over the origin of life even Darwin s followers Their contest for the Victorian moral heights is a case study of the politics of science and a timely reminder that arguments among public scientists are never simply about the facts Dr James Moore Evolution and the Spontaneous Generation Debate collects the rare primary works on the origin of life by Henry Charlton Bastian 1837 1915 one of the brightest young rising Darwinian stars of the time It contains all Bastian s key works on this subject from his very first in 1871 The Modes of Origin of Lowest Organisms through to one of his last The Evolution of Life in 1907 The set also includes contemporary reviews and responses to Bastian s work which illustrate how emotive this theory was during the 1870s and why the likes of T H Huxley and John Tyndall went to extraordinarily great lengths to oppose Bastian In the first two decades after the publication of Darwin s On the Origin of Species 1859 a lively often heated debate broke out about what the implications of Darwin s theory were for understanding the origin of life from non living matter Nowhere was the debate more acrimonious than among the Darwinians themselves The response to Bastian s work was uniformly negative in Christian religious circles and created a tremendous response both negative and positive from the Darwinians One faction including medical doctors and scientific journals strongly supported Bastian s ideas another including Huxley Tyndall and the powerful X Club fiercely attacked Bastian eventually declaring him vanquished by 1878 This set contains examples of both reactions including Huxley s famous
