New Uses of Bourdieu in Film and Media Studies Guy Austin,2016-07-01 Through his influential work on cultural capital and social mobility the French sociologist Pierre Bourdieu has provided critical insights into the complex interactions of power class and culture in the modern era Ubiquitous though Bourdieu s theories are however they have only intermittently been used to study some of the most important forms of cultural production today cinema and new media With topics ranging from film festivals and photography to constantly evolving mobile technologies this collection demonstrates the enormous relevance that Bourdieu s key concepts hold for the field of media studies deploying them as powerful tools of analysis and forging new avenues of inquiry in the process **Research Grants Index** National Institutes of Health (U.S.). Division of Research Grants,1968 Play as Symbol of the World Eugen Fink,2016-06-06 Eugen Fink is considered one of the clearest interpreters of phenomenology and was the preferred conversational partner of Edmund Husserl and Martin Heidegger In Play as Symbol of the World Fink offers an original phenomenology of play as he attempts to understand the world through the experience of play He affirms the philosophical significance of play why it is more than idle amusement and reflects on the movement from child s play to cosmic play Well known for its nontechnical literary style this skillful translation by Ian Alexander Moore and Christopher Turner invites engagement with Fink s philosophy of play and related writings on sports festivals and ancient cult practices *The New Politics of Class* Geoffrey Evans,James Tilley,2017-02-16 This book explores the new politics of class in 21st century Britain It shows how the changing shape of the class structure since 1945 has led political parties to change which has both reduced class voting and increased class non voting This argument is developed in three stages The first is to show that there has been enormous social continuity in class divisions The authors demonstrate this using extensive evidence on class and educational inequality perceptions of inequality identity and awareness and political attitudes over more than fifty years The second stage is to show that there has been enormous political change in response to changing class sizes Party policies politicians rhetoric and the social composition of political elites have radically altered Parties offer similar policies appeal less to specific classes and are populated by people from more similar backgrounds Simultaneously the mass media have stopped talking about the politics of class The third stage is to show that these political changes have had three major consequences First as Labour and the Conservatives became more similar class differences in party preferences disappeared Second new parties most notably UKIP have taken working class voters from

the mainstream parties Third and most importantly the lack of choice offered by the mainstream parties has led to a huge increase in class based abstention from voting Working class people have become much less likely to vote In that sense Britain appears to have followed the US down a path of working class political exclusion ultimately undermining the representativeness of our democracy They conclude with a discussion of the Brexit referendum and the role that working class alienation played in its historic outcome

International Encyclopedia of Systems and Cybernetics Charles François,2011-12-07 No detailed description available for International Encyclopedia of Systems and Cybernetics *What's New?* Sander E. van der Leeuw,Robin Torrence,2025-10-01 First published in 1989 What s New puts innovation firmly back on the agenda of archaeological interpretation This book revives interest in the process of innovation and reinterprets it by drawing on original work done in a variety of disciplines It demonstrates that the study of the components of innovation invention acceptance and the context in which they occur is essential if social change is to be better understood The book contains detailed case studies that cover a broad geographical range in the prehistoric historic and modern world It simulates and analyses the conditions of innovation and provides the necessary theoretical framework The technologies involved are diverse herding fishing pottery making metalworking and land management Several important issues emerge from this diversity it is the context of innovation that determines whether change will take place within hierarchical societies ideology can both stimulate and deny innovation and the potential for innovation experimentation and change in traditional societies is systematically underrated by the Western world which is dominated by a narrow technological perspective The contributors also study innovation in social and applied anthropology industrial planning and the natural sciences What s New will provoke renewed discussion throughout the archaeological community about the process of innovation Anthropologists human geographers and other social scientists will find it fascinating because it provides a time dimension for the study of the conditions of human and social change
