The Great Encounter of China and the West, 1500-1800 D. E. Mungello, 2024-09-17 For the Chinese the drive toward growing political and economic power is part of an ongoing effort to restore China s past greatness and remove the lingering memories of history s humiliations This widely praised book explores the 1500 1800 period before China s decline when the country was viewed as a leading world culture and power Europe by contrast was in the early stages of emerging from provincial to international status while the United States was still an uncharted wilderness D E Mungello argues that this earlier era ironically may contain more relevance for today than the more recent past Building on the author s decades of research and teaching this compelling book illustrates the vital importance of history to readers trying to understand China s renewed rise

Collecting and Displaying China's "Summer Palace" in the West Louise Tythacott, 2017-10-25 In October 1860 at the culmination of the Second Opium War British and French troops looted and destroyed one of the most important palace complexes in imperial China the Yuanmingyuan Known in the West as the Summer Palace this site consisted of thousands of buildings housing a vast art collection It is estimated that over a million objects may have been taken from the palaces in the Yuanmingyuan and many of these are now scattered around the world in private collections and public museums With contributions from leading specialists this is the first book to focus on the collecting and display of Summer Palace material over the past 150 years in museums in Britain and France It examines the way museums placed their own cultural political

and aesthetic concerns upon Yuanmingyuan material and how displays especially those at the Royal Engineers Museum in Kent the National Museum of Scotland and the Musée Chinois at the Château de Fontainebleau tell us more about European representations and images of China than they do about the Yuanmingyuan itself

The Concrete Dragon Thomas J. Campanella, 2012-03-20 China is the most rapidly urbanizing nation in the world with an urban population that may well reach one billion within a generation Over the past 25 years surging economic growth has propelled a construction boom unlike anything the world has ever seen radically transforming both city and countryside in its wake The speed and scale of China's urban revolution challenges nearly all our expectations about architecture urbanism and city planning China's ambition to be a major player on the global stage is written on the skylines of every major city This is a nation on the rise and it is building for the record books China is now home to some of the world's tallest skyscrapers and biggest shopping malls the longest bridges and largest airport the most expansive theme parks and gated communities and even the world's largest skateboard park And by 2020 China's national network of expressways will exceed in length even the American interstate highway system China's construction industry employing a workforce equal to the population of California has been erecting billions of square feet of housing and office space every year But such extensive development has also meant demolition on a scale unprecedented in the peacetime history of the world Nearly all of Beijing's centuries old cityscape has been bulldozed in recent years and redevelopment in Shanghai has displaced more families than 30 years of urban renewal in the United States China's cities are also rapidly sprawling across the landscape churning precious farmland into a landscape of superblock housing estates and single family subdivisions laced with highways and big box malls In a mere generation China's cities have undergone a metamorphosis that took 150 years to complete in the United States

The Concrete Dragon China's Urban Revolution and What it Means for the World sheds light on this extraordinary chapter in world urban history The book surveys the driving forces behind the great Chinese building boom traces the historical precedents and global flows of ideas and information that are fusing to create a bold new Chinese cityscape and considers the social and environmental impacts of China's urban future The Concrete Dragon provides a critical overview of contemporary Chinese urbanization in light of both China's past as well as earlier episodes of rapid urban development elsewhere in the world especially that of the United States a nation that itself once set global records for the speed and scale of its urban ambitions

"Glass Exchange between Europe and China, 1550-1800" Emily Byrne Curtis, 2017-07-05 In this study Emily Byrne Curtis explores as her subject lenses spectacles aventurine glass and windows found in China from the sixteenth century She traces their technological development back to the glassworks in Murano Venice and explores their significance in terms of Venice's commerce with China Because glassware also figured among the gifts which three papal legates from the Vatican presented to the Kangxi and Yongzheng emperors the author examines many documents from the archives in Rome and the Vatican the study therefore touches to an extent on the history of the Catholic Church in China Curtis also discusses in the volume some

contemporary Chinese references and verses to European glassware and in the case of enamel materials she discloses the pronounced effect their use had upon the decor of Chinese porcelains *This Suffering Is My Joy* D. E. Mungello, 2021-03-29 Tracing the little known history of the first underground Catholic church in China noted scholar D E Mungello illuminates the period between the imperial expulsion of foreign Christian missionaries in 1724 and their return with European colonialism in the 1800s Few realize that this was the first time in which Chinese rather than Europeans came to control their own church as Chinese clergy and lay leaders maintained communities of clandestine Catholics Mungello follows the church in a time of persecution focusing in particular on the role of Chinese clergy and lay leaders in maintaining communities of clandestine Catholics during the eighteenth century He highlights the parallels between the 1724 and 1951 expulsions of missionaries from China the first driven by a Chinese imperial system and the second by a revolutionary Communist government The two periods also reflected foreign bias against the Chinese priests and laity and questions about their spiritual depth and constancy However Mungello shows that the historical record of incarcerated and interrogated Christians reveals a spiritually inspired resistance to government oppression and a willingness to suffer often to the point of martyrdom

Confronting Colonial Objects Carsten Stahn, 2024-05-23 The treatment of cultural colonial objects is one of the most debated questions of our time. Calls for a new international cultural order go back to decolonization. However, for decades the issue has been treated as a matter of comity or been reduced to a Shakespearean dilemma: to return or not to return. *Confronting Colonial Objects* seeks to go beyond these classic dichotomies and argues that contemporary practices are at a tipping point. The book shows that cultural takings were material to the colonial project throughout different periods and went far beyond looting. It presents micro histories and object biographies to trace recurring justifications and contestations of takings and returns while outlining the complicity of anthropology, racial science, and professional networks that enabled colonial collecting. The book demonstrates the dual role of law and cultural heritage regulation in facilitating colonial injustices and mobilizing resistance thereto. Drawing on the interplay between justice, ethics, and human rights, Stahn develops principles of relational cultural justice. He challenges the argument that takings were acceptable according to the standards of the time and outlines how future engagement requires a re-invention of knowledge systems and relations towards objects, including new forms of consent, provenance research, and partnership, and a re-thinking of the role of museums themselves. Following the life story and transformation of cultural objects, this book provides a fresh perspective on international law and colonial history that appeals to audiences across a variety of disciplines. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations.

Eunuch and Emperor in the Great Age of Qing Rule Norman A. Kutcher, 2018-07-31 *Eunuch and Emperor in the Great Age of Qing Rule* offers a new interpretation of eunuchs and their connection to imperial rule in the first century and a half of the Qing dynasty, 1644–1800. This period encompassed the reigns of three of China's most important emperors, men who were deeply affected by the great eunuch corruption of the fallen Ming dynasty. In this groundbreaking and deeply researched book, the author explores how Qing emperors sought to prevent a return of the harmful excesses of eunuchs and how eunuchs flourished in the face of the restrictions imposed upon them. We meet powerful eunuchs who faithfully served and in some cases ultimately betrayed their emperors. We also meet ordinary eunuchs whose lives punctuated by dramas large and small provide a fascinating perspective on the Qing palace world.
