Performance Drawing Maryclare Foá, Jane Grisewood, Birgitta Hosea, Carali McCall, 2020-09-03 What is performance drawing When does a drawing turn into a performance Is the act of drawing in itself a performative process whether a viewer is present or not Through conversation interviews and essays the authors illuminate these questions and what it might mean to perform and what it might mean to draw in a diverse and expressive contemporary practice since 1945 The term performance drawing first appeared in the subtitle of Catherine de Zegher s Drawing Papers 20 Performance Drawings in particular with reference to Alison Knowles and Elena del Rivero In this book it is used as a trope and a thread of thinking to describe a process dedicated to broadening the field of drawing through resourceful practices and cross disciplinary influence Featuring a wide range of international artists this book presents pioneering practitioners alongside current and emerging artists The combination of experiences and disciplines in the expanded field has established a vibrant art movement that has been progressively burgeoning in the last few years The Introduction contextualises the background and identifies contemporary approaches to performance drawing As a way to embrace the different voices and various lenses in producing this book the authors combine individual perspectives and critical methodology in the five chapters While embedded in ephemerality and immediacy the themes encompass body and energy time and motion light and space imagined and observed demonstrating how drawing can act as a performative tool The dynamic interaction leads to a collective understanding of the term performance drawing and addresses the key developments and future directions of this applied drawing process

Constructing an Avant-Garde Sergio B. Martins, 2021-08-24 How Brazilian postwar avant garde artists updated modernism in a way that was radically at odds with European and North American art historical narratives Brazilian avant garde artists of the postwar era worked from a fundamental but productive out of jointness They were modernist but distant from modernism Europeans and North Americans may feel a similar displacement when viewing Brazilian avant garde art the unexpected familiarity of the works serves to make them unfamiliar In *Constructing an Avant Garde* Sergio Martins seizes on this uncanny obliqueness and uses it as the basis for a reconfigured account of the history of Brazil's avant garde His discussion covers not only widely renowned artists and groups including Hélio Oiticica Lygia Clark Cildo Meireles and neoconcretism but also important artists and critics who are less well known outside Brazil including Mário Pedrosa Ferreira Gullar Amílcar de Castro Luís Sacilotto Antonio Dias and Rubens Gerchman Martins argues that artists of Brazil's postwar avant garde updated modernism in a way that was radically at odds with European and North American art historical narratives He describes defining episodes in Brazil's postwar avant garde discussing crucial critical texts including Gullar's *Theory of the Non Object* a phenomenological account of neoconcrete artworks Oiticica's constructivism and Mondrian's portraiture self portraiture and identity the nonvisual turn and missed encounters with conceptualism and monochrome manifestos and engagement The Brazilian avant garde's hijacking of modernism Martins shows gained further complexity as artists began to face their international minimalist and conceptualist contemporaries in the 1960s and 1970s Reconfiguring not only art history but their own history Brazilian avant gardists were able to face contemporary challenges from a unique and oblique standpoint

Art in Consumer Culture Grace McQuilten,2017-07-05 Written with beautiful clarity Art in Consumer Culture Mis Design asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique The book examines the collusion of art and design in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape Grace McQuilten focuses on the work of Takashi Murakami Andrea Zittel Adam Kalkin and Vito Acconci four contemporary artists who claim to be working in the field of design rather than the traditional art world McQuilten argues that Zittel Acconci and Kalkin engage with design only to reactivate the critical practice of art in a more direct engagement with capital and conceives of and affirms a future for art outside of the art world as a parasite in the complex beast of late capitalism This book is an important and timely provocation to a cynical and apathetic consumer culture and a call to arms for creative freedom and critical thought

Marshall Plan Modernism Jaleh Mansoor,2016-09-02 Focusing on artwork by Lucio Fontana Alberto Burri and Piero Manzoni Jaleh Mansoor demonstrates

and reveals how abstract painting especially the monochrome broke with fascist associated futurism and functioned as an index of social transition in postwar Italy Mansoor refuses to read the singularly striking formal and procedural violence of Fontana's slit canvasses Burri's burnt and exploded plastics and Manzoni's achromes as metaphors of traumatic memories of World War II Rather she locates the motivation for this violence in the history of the medium of painting and in the economic history of postwar Italy Reconfiguring the relationship between politics and aesthetics Mansoor illuminates how the monochrome's reemergence reflected Fontana Burri and Manzoni's aesthetic and political critique of the Marshall Plan's economic warfare and growing American hegemony It also anticipated the struggles in Italy's factories classrooms and streets that gave rise to Autonomia in the 1960s Marshall Plan Modernism refigures our understanding of modernist painting as a project about labor and the geopolitics of postwar reconstruction during the Italian Miracle
