NINETEEN ESSAYS

"The Thoreau of our time, an essayist so intensely personal, so sharp-eyed and deep-sighted, so tender and tough, lyrical and elegiac, as to transmute a simple stroll into a full-blown mystical experience."—The Washington Post

Red Wolves Black Bears:

Red Wolves and Black Bears Edward Hoagland, 1995 Another great Hoagland journey from the adventures of New York City tugboatmen to Cairo The Secret World of Red Wolves T. DeLene Beeland, 2013-06-10 Red wolves are shy elusive and misunderstood predators Until the 1800s they were common in the longleaf pine savannas and deciduous forests of the southeastern United States However habitat degradation persecution and interbreeding with the coyote nearly annihilated them Today reintroduced red wolves are found only in peninsular northeastern North Carolina within less than 1 percent of their former range In The Secret World of Red Wolves nature writer T DeLene Beeland shadows the U S Fish and Wildlife Service s pioneering recovery program over the course of a year to craft an intimate portrait of the red wolf its history and its restoration Her engaging exploration of this top level predator traces the intense effort of conservation personnel to save a species that has slipped to the verge of extinction Beeland weaves together the voices of scientists conservationists and local landowners while posing larger questions about human coexistence with red wolves our understanding of what defines this animal as a distinct species and how climate change may swamp its current habitat

Introducing Gray Wolves in Yellowstone and Idaho United States. Congress. House. Committee on Resources, 1995 America's Wetland Roy T. Sawyer, 2010-05-05 The geologically ancient Tidewater region of southeastern Virginia and northeastern North Carolina rests precariously atop millions of years of erosion from the nearby Appalachian Mountains An immense wetland at near sea level it is host to every conceivable body of fresh water ranging from brooding swamps and large hidden lakes to sluggish blackwater rivers and brackish sounds one of which was so large an early explorer thought he had found the Pacific Ocean In this engaging book biologist and Tidewater native Roy T Sawyer delivers an ecohistory of this unique waterland whose wind driven tides cover a rich human and natural past Jutting prominently into the Atlantic this wetland is the final stop for the warmth of the Gulf Stream before it is deflected from the American mainland At the top of a narrow warm coastal strip it provides an ideal home for a vast array of animal and plant life including prodigious numbers of reptiles such as the world s northernmost population of alligators and overwintering waterfowl It is also home to the oldest known living trees east of the Rocky Mountains The climate and geography made the area a natural choice for very early human habitation as far back as the last ice age when the region was a rich oasis just south of a veritable tundra In examining the impact of humans upon this environment and vice versa Sawyer reveals how our alarming shortsightedness has produced a fragile and endangered present Although human manipulation started here as early as ten thousand years ago coinciding with extinction of mammoths and other megafauna the environment has been altered most radically over only the last one hundred years particularly in regard to land drainage deforestation overfishing and pollution The author provides an authoritative overview of the human impact on these wetlands and suggests ways in which we might still salvage them In so doing he explores the effects of hurricanes droughts forest fires and ice ages of the past and anticipates in this

satisfy the curiosity and answer the questions of anyone with an interest in these animals from students who enjoy watching beaver ponds at nature centers to homeowners and land managers Color and black and white photographs document every aspect of beaver behavior and biology the variety of their constructions and the habitats that depend on their presence A second edition of The Beaver Ecology and Behavior of a Wetland Engineer published by Cornell University Press under its Comstock Publishing Associates imprint in 2003 this book has been revised throughout and includes a new section on population genetics and features updated data about the beaver s range in North America reintroduction efforts in Europe and information about the world s largest beaver dam discovered in northern Alberta in 2010 and visible from space as well as the most current bibliography on the subject As this book shows the beaver is a keystone species their skills as foresters and engineers create and maintain ponds and wetlands that increase biodiversity purify water and prevent large scale flooding Biologists have long studied their daily and seasonal routines family structures and dispersal patterns As human development encroaches into formerly wild areas property owners and government authorities need new nonlethal strategies for dealing with so called nuisance beavers At the same time the complex behavior of beavers intrigues visitors at parks and

North America's rarest wolf species the red wolf was on the brink of extinction At one time red wolves roamed the US from southern New York to as far south as Florida and as far west as Texas But as European settlers moved in these wolves began losing their home range and were hunted as a threat Red wolves became so rare by 1973 that they were given protection under the US Endangered Species Act Then scientists came up with a daring plan round up all remaining red wolves launch a captive breeding program and once the captive population was large enough release red wolves to roam free in protected areas Follow along as scientists conservationists and wildlife experts join forces to help red wolves live wild again

Encounters with American Culture: Volume 2 (1973-1985) Peter S. Prescott, Peter S Prescott was one of the most informed and incisive American literary critics to write for the general public Never content merely to summarize or to pronounce quick judgments Prescott's reviews are witty and delightful essays to be enjoyed for their own sake as examples of civilized discourse Whether he is exploring a well known novelist's outlook and methods or the peculiar deficiencies of a work of nonfiction Prescott's grace elegance and insights make each piece proof that real criticism need not be pedantic obscure or interminably long The focus in this second volume of Prescott's writings published by Transaction is on both fiction by American authors and on nonfiction reflecting our American unease He casts an ironic eye on how we in this country think we live now on what we are saying about ourselves in our fiction our history and our biography Prescott considers some of our century's classic writers Hemingway and Henry Miller John Cheever and Thornton Wilder He offers new insights regarding those who are still at work Mailer John Irving Oates Updike Ozick and Alice Walker Some authors do not fare well With his customary flair Prescott explains why the reputations of Kurt Vonnegut and Barbara Tuchman the Encyclopedia Britannica and John Gardner urgently need deflation He includes essays on writers and books not generally noticed in collections of criticism Stephen King The Joy of Sex fairy tales science fiction thrillers books on survival and etiquette Here is a critic with a personal voice and a sense of style For essays published in this collection Prescott received the most highly regarded prize in journalism the rarely presented George Polk Award for Criticism This is a chronicle of our contemporary American culture as revealed by its books written with verve intelligence wisdom and wit by a critic who's cruel only when appropriate Encounters with American Culture is quite simply literary journalism at its urbane best Peter S Prescott was book review editor for Newsweek His books include A Darkening Green Notes from the Silent Generation and The Child Savers Juvenile Justice Observed Anne L Prescott is Helen Goodhart Altschul Professor of English at Barnard College
