Reducing The Risk Of Noncommunicable Diseases:

Reducing the Risk of Noncommunicable Diseases Wesley P. Cushman, 1970 *An Introduction to Population-level Prevention of Non-Communicable Diseases* Mike Rayner, Kremlin Wickramasinghe, Julianne Williams, Karen McColl, Shanthi Mendis, 2017-03-09 Non communicable diseases NCDs kill more people than anything else in the world They include cardiovascular diseases such as heart attacks and strokes cancers chronic respiratory diseases such as chronic obstructed pulmonary disease and asthma and diabetes In 2013 the World Health Organization published a global action plan for the prevention and control of NCDs which set a target to reduce death rates from NCDs by 25% by 2025 In response countries have been drawing up national level NCD prevention policies and programmes New departments have been created by governments NGOs and other organizations to drive this agenda forward creating a need for capacity building and training In response to this need the Nuffield Department of Population Health and the Department for Continuing Education at the University of Oxford initiated an accredited six day short course on prevention strategies for non communicable diseases with a population based approach In the past many attempts to engage with NCD prevention have centred on individual level interventions such as screening and treating individual patients In this new book the course organisers provide a solid introduction to the population based approach and bring together the concepts evidence and methods that define it *An Introduction to Population Level Prevention of Non Communicable Diseases* takes readers through the entire policy cycle from problem definition solution generation capacity building and implementation to evaluation and monitoring The book includes a wide range of case studies and practical examples of plans and projects that illustrate the real life applications of theory This book provides an unparalleled overview of population based approaches to the prevention of non communicable diseases reflecting the latest research in the field It is a key resource for anyone with an interest in NCD prevention particularly early career professionals working in governments NGOs health care institutions and universities as they develop the knowledge and skills required for effective population based prevention strategies **An Introduction to Population-level Prevention of Non-communicable Diseases** Mike Rayner, Kremlin Wickramasinghe, Julianne Williams, Karen McColl, Shanthi Mendis, 2017 Provides an unparalleled overview of population based approaches to the prevention of non communicable diseases reflecting the latest research in the field and a key resource for anyone with an interest in NCD prevention as they develop the knowledge and skills needed for effective population based prevention strategies **Noncommunicable Diseases** Nick Banatvala, Pascal Bovet, 2023-01-30 Noncommunicable Diseases A Compendium introduces readers to noncommunicable diseases NCDs what they are their burden their determinants and how they can be prevented and controlled Focusing on cardiovascular disease diabetes cancer and chronic respiratory disease and their five shared main risk factors tobacco use harmful use of alcohol unhealthy diet physical inactivity and air pollution as defined by the United Nations this book provides a synopsis of one of the world s biggest challenges of the 21st century

NCDs prematurely claim the lives of millions of people across the world every year with untold suffering to hundreds of millions more trapping many people in poverty and curtailing economic growth and sustainable development While resources between and within countries largely differ the key principles of surveillance prevention and management apply to all countries as does the need to focus resources on the most cost effective and affordable interventions and the need for strong political will sufficient resources and sustained and broad partnerships This compendium consists of 59 short and accessible chapters in six sections i describing and measuring the burden and impact of NCDs ii the burden epidemiology and priority interventions for individual NCDs iii social determinants and risk factors for NCDs and priority interventions iv global policy v cross cutting issues and vi stakeholder action Drawing on the expertise of a large and diverse team of internationally renowned policy and academic experts the book describes the key epidemiologic features of NCDs and evidence based interventions in a concise manner that will be useful for policymakers across all parts of society as well as for public health and clinical practitioners The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Integrating the prevention and control of noncommunicable diseases in HIV/AIDS, tuberculosis, and sexual and reproductive health programmes World Health Organization,2023-04-03 In 2011 heads of state and government at the United Nations General Assembly formally acknowledged that NCDs are one of the major challenges to development and committed to integrate NCD prevention and control into other programmes such as for HIV and broader maternal and child health programmes especially in PHC The commitment to integrate NCDs into existing disease programmes was reaffirmed again through its NCD resolutions at its Third High level Meeting in 2018 This guidance outlines strategic actions and practical solutions in response to the challenges of integration of NCDs as appropriate and relevant to the country context The objective is to maximize the impact of health services and extend access to NCD care The target readership is policymakers programme managers and health providers The guidance should also be useful for WHO and international partners including donors and banks that champion integrated support for NCD service delivery in countries and better management
