Reduction And Resolution Computation And Logic:

Computability, Complexity, Logic E. Börger, 1989-07-01 The theme of this book is formed by a pair of concepts the concept of formal language as carrier of the precise expression of meaning facts and problems and the concept of algorithm or calculus i e a formally operating procedure for the solution of precisely described questions and problems The book is a unified introduction to the modern theory of these concepts to the way in which they developed first in mathematical logic and computability theory and later in automata theory and to the theory of formal languages and complexity theory Apart from considering the fundamental themes and classical aspects of these areas the subject matter has been selected to give priority throughout to the new aspects of traditional questions results and methods which have developed from the needs or knowledge of computer science and particularly of complexity theory It is both a textbook for introductory courses in the above mentioned disciplines as well as a monograph in which further results of new research are systematically presented and where an attempt is made to make explicit the connections and analogies between a variety of concepts and constructions

Logic Programming and Automated Reasoning Andrei Voronkov, 1993-06-29 LPAR is an international conference series aimed at bringing together researchers interested in logic programming and automated reasoning The research in logic programming grew out of the research in automated reasoning in the early 1970s Later the implementation techniques known from logic programming were used in implementing theorem proving systems Results from both fields applied to deductive databases This volume contains the proceedings of LPAR 93 which was organized by the Russian Association for Logic Programming The volume contains 35 contributed papers selected from 84 submissions together with an invited paper by Peter Wegner entitled Reasoning versus modeling in computer science

Computational Logic Ulrich Berger, Helmut Schwichtenberg, 2012-12-06 Recent developments in computer science clearly show the need for a better theoretical foundation for some central issues. Methods and results from mathematical logic in particular proof theory and model theory are of great help here and will be used much more in future than previously. This book provides an excellent introduction to the interplay of mathematical logic and computer science. It contains extensively reworked versions of the lectures given at the 1997 Marktoberdorf Summer School by leading researchers in the field. Topics covered include proof theory and specification of computation. J. Y. Girard, D. Miller, complexity of proofs and programs, S. R. Buss, S. S. Wainer, computational content of proofs, H. Schwichtenberg, constructive type theory, P. Aczel, H. Barendregt, R. L. Constable, computational mathematics, U. Martin, rewriting logic, J. Meseguer, and game semantics, S. Abramski.

Logical Aspects of Computational Linguistics. Celebrating 20 Years of LACL (1996-2016) Maxime Amblard, Philippe de Groote, Sylvain Pogodalla, Christian Retoré, 2016-11-21 Edited under the auspices of the Association of Logic Language and Information FoLLI, this book constitutes the refereed proceedings of the 20th anniversary of the International Conference on Logical Aspects of Computational Linguistics LACL 2016 held in LORIA Nancy France in December 2016. The 19 contributed papers presented together with 4 invited papers and 6 abstracts were carefully reviewed and selected from 38 submissions. The focus of the conference is the use of type theoretic proof theoretic and model theoretic methods for describing and formalising natural language syntax semantics and pragmatics as well as the implementation of the corresponding tools. Applied Computational Intelligence Da Ruan, 2004 Investigation of new developments and technical limits on applied computational intelligence. Demonstration of added value of applied computational intelligence. Presentation of direct and potential real world applications of applied computational intelligence.

Logic for Computer Science Jean H. Gallier, 2015-05-18 This advanced text for undergraduate and graduate students introduces mathematical logic with an emphasis on proof theory and procedures for algorithmic construction of formal proofs. The self-contained treatment is also useful for computer scientists and mathematically inclined readers interested in the formalization of proofs and basics of automatic theorem proving. Topics include propositional logic and its resolution, first order logic, Gentzen's cut elimination theorem and applications, and Gentzen's sharpened Hauptsatz and Herbrand's theorem. Additional subjects include resolution in first order logic, SLD resolution, logic programming, and the foundations of PROLOG and many sorted first order logic. Numerous problems appear throughout the book and two Appendixes provide practical background information.

Computational and Information Science Jun Zhang, Ji-Huan He, Yuxi Fu, 2005-01-18 The 2004 International Symposium on Computational and Information Sciences CIS 2004 aimed at bringing researchers in the area of computational and formation sciences together to exchange new ideas and to explore new ground The goal of the conference was to push the application of modern computing technologies to science engineering and information technologies to a new level of sophistication and understanding The initial idea to organize such a conference with a focus on computation and applications was originated by Dr Jun Zhang during his visit to China in August 2003 in consultation with a few friends including Dr Jing Liu at the Chinese Academy of Sciences Dr Jun Hai Yong at Tsinghua University Dr Geng Yang at Nanjing University of Posts and Communications and a few others After several discussions with Dr Ji Huan He it was decided that Donghua University would host CIS 2004 CIS 2004 attempted to distinguish itself from other conferences in its phasis on participation rather than publication A submitted paper was only reviewed with the explicit understanding that if accepted at least one of the authors would attend and present the paper at the conference It is our lief that attending conferences is an important part of one s academic career through which academic networks can be built that may bene t one s academic life in the long run We also

made every effort to support graduate students in attending CIS 2004. In addition to set reduced registration fees for full time graduate students we awarded up to three prizes for to the Best Student Papers at CIS 2004. Students whose papers were selected for awards were given cash prizes plus a waiver of registration fees.
