## **Redundant Space:**

**Redundant Space** Howard Green,Paul Foley,1986      **High Performance Geographic Information System** Wei Xiong,Ye Wu,Xue Ouyang,Qing-ren Jia,Hao Chen,Luo Chen,2024-10-15 The development of earth observation and computing technology has promoted the wide application of spatio temporal big data and artificial intelligence The enrichment of data and the improvement of computational performance make it possible to perform spatio temporal analysis and computation on a larger scale Therefore it is necessary to study the optimization methods and application methods of high performance geocomputing starting from GIS architecture in order to form a high performance GIS that can serve the society and economy and support various applications This book focuses on the architecture technology platform and application of high performance GIS analyzes the key technologies of spatio temporal big data organization and access parallelized spatial analysis and processing large scale map rendering and parallel visualization under the high performance computing architecture explains how to build high performance geographic information applications and looks forward to the trend of the new generation of GIS      Democratic Despotism Swagato Sarkar,2022-07-29 This book explores the history of forced land acquisition and transformation of power in the Fifth Schedule areas in India It examines the contradictory imperatives of extractive capitalism and primitive accumulation on the one hand and autonomy and devolution of power to local communities on the other The book traces the long history of conflict displacement and violence in these areas in central India which are home to the Adivasis or indigenous people and are rich in natural resources Drawing from an analysis of public policy debates land acquisition acts and political and developmental interventions the book critically looks at the relationship between capitalism dispossession and democracy The author investigates how the state constructed a weak democracy amenable for primitive accumulation the role of NGOs in this process the struggle for sovereignty and autonomy by local communities and the attempts made by human rights activists to find judicial redressal to state violence Through this engagement the book offers a new theory of power This book will interest researchers and students of political science political anthropology governance and public policy development studies sociology law and government minority and indigenous studies and Odisha and South Asian studies      **Computational Intelligence** De-Shuang Huang,George William Irwin,2006-08-04 This is the proceedings of the International Conference on Intelligent Computing ICIC 2006 Kunming China August 2006 The book presents 165 revised full papers carefully chosen and reviewed organized in topical sections on fuzzy systems fuzzy neuro evolutionary hybrids supervised unsupervised and reinforcement learning intelligent agent and Web applications intelligent fault diagnosis natural language processing and expert systems natural language human machine interface using artificial neural networks and intelligent financial engineering      **Understanding Motor Behaviour in Developmental Coordination Disorder** Anna Barnett,Elisabeth Hill,2019-03-13 Although Developmental Coordination Disorder DCD sometimes referred to as Dyspraxia has received less attention than other developmental disorders its impact

can be severe and long lasting This volume takes a unique approach pairing companion chapters from international experts in motor behaviour with experts in DCD Current understanding of the motor aspects of DCD are thus considered in the context of general motor behaviour research Understanding Motor Behaviour in Developmental Coordination Disorder offers an overview of theoretical and methodological issues relating to motor development motor control and skill acquisition genetics physical education and occupational therapy Critically Barnett and Hill ground DCD research within what is known about motor behaviour and typical development allowing readers to evaluate the nature and extent of work on DCD and to identify areas for future research This unique approach makes the book invaluable for students in developmental psychology clinical psychology movement science physiotherapy physical education and special education as well as researchers and professionals working in those fields

**Agent-based Approaches in Economic and Social Complex Systems** Akira Namatame,Takao Terano,Koichi Kurumatani,2002 This volume explores the field of artificial intelligence and features in depth coverage of important theoretical areas including computational organization computational economics computational approaches in social science and game theory The conception of the multi agent system is particularly attractive as it promises autonomy based on the conceptual speciality of a rational agent as well as collective behaviour through interactions

*Crystallography and the World of Symmetry* Sanat K. Chatterjee,2008-09-19 Symmetry exists in realms from crystals to patterns in external shapes of living or non living objects as well as in the fundamental particles and the physical laws that govern them In fact the search for this symmetry is the driving force for the discovery of many fundamental particles and the formulation of many physical laws While one can not imagine a world which is absolutely symmetrical nor can one a world which is absolutely asymmetrical These two aspects of nature are intermingled with each other inseparably This is the basis of the existence of aperiodicity manifested in the liquid crystals and also quasi crystals also discussed in *Crystallography and the World of Symmetry*

*2021 International Conference on Autonomous Unmanned Systems (ICAUS 2021)* Meiping Wu, Yifeng Niu, Mancang Gu, Jin Cheng, 2022-03-18 This book includes original peer reviewed research papers from the ICAUS 2021 which offers a unique and interesting platform for scientists engineers and practitioners throughout the world to present and share their most recent research and innovative ideas The aim of the ICAUS 2021 is to stimulate researchers active in the areas pertinent to intelligent unmanned systems The topics covered include but are not limited to Unmanned Aerial Ground Surface Underwater Systems Robotic Autonomous Control Navigation and Positioning Architecture Energy and Task Planning and Effectiveness Evaluation Technologies Artificial Intelligence Algorithm Bionic Technology and Its Application in Unmanned Systems The papers showcased here share the latest findings on Unmanned Systems Robotics Automation Intelligent Systems Control Systems Integrated Networks Modeling and Simulation It makes the book a valuable asset for researchers engineers and university students alike

**Brain-Computer Interfaces**, 2020-03-10 Brain Computer Interfacing Volume 168 not only gives readers a clear understanding of what BCI science is currently offering but also describes future expectations for restoring lost brain function in patients In depth technological chapters are aimed at those interested in BCI technologies and the nature of brain signals while more comprehensive summaries are provided in the more applied chapters Readers will be able to grasp BCI concepts understand what needs the technologies can meet and provide an informed opinion on BCI science Explores how many different causes of disability have similar functional consequences loss of mobility communication etc Addresses how BCI can be of use Presents a multidisciplinary review of BCI technologies and the opportunities they provide for people in need of a new kind of prosthetic Offers a comprehensive multidisciplinary review of BCI for researchers in neuroscience and traumatic brain injury that is also ideal for clinicians in neurology and neurosurgery

*Economics as an Agent-Based Complex System* H. Deguchi, 2011-06-28 In agent based modeling the focus is very much on agent based simulation as simulation is a very important tool for agent based modeling We also use agent based simulation in this book with a stress on the mathematical foundation of agent based modeling We introduce two original mathematical frameworks a theory of SLD Social Learning Dynamics and an axiomatic theory of economic exchange Exchange Algebra among agents Exchange algebra gives bottom up reconstruction of SNA System of National Accountings SLD provides the concept of indirect control of socio economic systems to manage structural change and its stability We also compare agent based simulation with gaming simulation and investigate the epistemological foundation of agent based modeling
