American Pentimento Patricia Seed,2001 The modern regulations and pervading attitudes that control native rights in the Americas may appear unrelated to the European colonial rule but traces of the colonizers cultural religious and economic agendas remain Patricia Seed likens this situation to a pentimento a painting in which traces of older compositions become visible over time and shows how the exploitation begun centuries ago continues today Seed examines

how the goals of European colonialist in the Americas The English appropriated land while the Spanish and Portuguese attempted to eliminate barbarous religious behavior and used indigenous labor to take mineral resources Ultimately each approach denied native people distinct aspects of their heritage Seed argues that their differing effects persist with natives in former English colonies fighting for land rights while those in former Spanish and Portuguese colonies fight for human dignity Book jacket

Deep Trout William Washabaugh, 2020-05-26 On the surface fishing is all about casting catching and communing with nature but on a deeper level the sport is filled with mysteries and contradictions Why do people fish How does a desire to return to nature go hand in hand with high tech gadgetry How is it possible to see other people s fishing as despoiling nature but not one s own What does the long and complex history of the sport reveal Like so much else in life what fishing says about society and the people in it both past and present is hidden from view and almost never discussed This book is a considered foray into the leisure sport of fishing by an avid fisherman who is also a professional anthropologist Those who enjoy the sport tend to extol its naturalness fishing enables them to commune with nature at its most primeval However if it s called natural it s probably a great spot to trawl for clues as to how people manage larger cosmic issues Call it natural the author quips and the anthropologists will come Is fishing an uncomplicated activity or is it deeply meaningful What does it say about culture Is the recent resurgence of interest in the sport simply a reflection of more disposable incomes and more leisure time What is the connection between fishing and Santa Claus fishing and flamenco And finally what is the best way to kiss a trout Unlike most books on fishing which focus on the tale or on how to this book shows that there is much more lurking beneath the surface than fish

The Unreasonable Virtue of Fly Fishing Mark

Kurlansky, 2021-03-02 National Outdoor Book Award Winner for Outdoor Literature From the award winning bestselling author of Cod the irresistible story of the science history art and culture of the least efficient way to catch a fish Fly fishing historian Mark Kurlansky has found is a battle of wits fly fisher vs fish and the fly fisher does not always or often win The targets salmon trout and char and for some bass tarpon tuna bonefish and even marlin are highly intelligent athletic animals The allure Kurlansky learns is that fly fishing makes catching a fish as difficult as possible The flies can be beautiful and intricate some made with over two dozen pieces of feather and fur the cast is a matter of grace and rhythm with different casts and rods yielding varying results Kurlansky is known for his deep dives into specific subjects from cod to oysters to salt But he spent his boyhood days on the shore of a shallow pond Here where tiny fish weaved under a rocky waterfall he first tied string to a branch dangled a worm into the water and unleashed his passion for fishing Since then his love of the sport has led him around the world s countries coasts and rivers from the wilds of Alaska to Basque country from Ireland and Norway to Russia and Japan And in true Kurlansky fashion he absorbed every fact detail and anecdote along the way The Unreasonable Virtue of Fly Fishing marries Kurlansky s signature wide ranging reach with a subject that has captivated him for a lifetime combining history craft and personal memoir to show readers devotees of the sport or not the necessity of

experiencing nature s balm first hand *Reading the Earth* Michael P. Branch,1998 Distributed by the University of Nebraska Press for the University of Idaho Press Ecocriticism is a scholarly approach to literature that is rapidly building momentum and legitimacy because of its usefulness as a means of inquiry into the relationship between human culture and the nonhuman world This collection demonstrates promising new directions in the study of literature and environment and suggests the importance and passion of this scholarly enterprise **Fishing Fame!** Jeanne Craig,1999 Even weekend anglers can catch fish that will set IGFA records And Jeanne Craig tells how to do it even if you aren t a millionaire even if you don t have your own boat This unique book reveals the methods used by world record anglers in fresh and saltwater profiles successful anglers and explains the IGFA regulations for sportfishing catches Fishing Fame also includes wanting tales of those who weren t prepared and lost their chance at an IGFA record like Franck Mundus who caught the largest great white shark in history but lost the record on technicalities With many fascinating amusing informative anecdotes Fishing Fame is sure to appeal to every fishing fan who dreams of landing the Big One The Real Cost of Cheap Food Michael Carolan,2013-10-30 This challenging but accessible book critically examines the dominant food regime on its own terms by seriously asking whether we can afford cheap food and exploring what exactly cheap food affords us Detailing the numerous ways that food has become reduced to a state such as a price per ounce combination of nutrients yield per acre or calories the book argues for a more contextual understanding of food when debating its affordability The author makes a compelling case for why today s global food system produces just the opposite of what it promises The food produced under this regime is in fact exceedingly expensive Thus meat production and consumption are inefficient uses of resources and contribute to climate change the use of pesticides in industrial scale agriculture may produce cheap food but there are hidden costs to environmental protection human health and biodiversity conservation Many of these costs will be paid for by future generations cheap food today may mean expensive food tomorrow By systematically assessing these costs the book delves into issues related but not limited to international development national security health care industrial meat production organic farming corporate responsibility government subsidies food aid and global commodity markets The book concludes by suggesting ways forward going beyond the usual solutions such as farmers markets community supported agriculture and community gardens Exploding the myth of cheap food requires we have at our disposal a host of practices and policies Some of those proposed and explored include microloans subsidies for consumers vertical agriculture and the democratization of subsidies for producers **Illustrated Outdoor World and Recreation** ,1913 *Illustrated Outdoor World and Recreation* Percy C. best proof of evolution is the fact of development For students of evolutionary psychology all the central topics such as evolved mental modules for theory of mind or language require an understanding of the developmental processes that lead to their expression Genes as important as they are are never the whole story The role of biological factors is explored in chapters outlining evolution development genetics human origins hormones and the brain Then the integrative value of this evolutionary developmental vision in understanding key topics in psychology is illustrated by applying it to traditional area of inquiry including infancy and attachment emotions and their expression social relations with peers cognitive and language development sex differences courtship and mating violence and aggression and cooperation and competition **World**
