Governing Higher Education: National Perspectives on Institutional Governance Alberto Amaral, Glen Jones, B. Karseth, 2013-11-11 Over the last decades higher education has gone through an unprecedented growth period and as a result the average university or college has now more students and a larger output than ever before At the same time the socio economic and political demands with respect to higher education have grown dramatically These developments have taken place without a proportional increase of the budgets and facilities of the higher education institutions This has created an imbalance between the expectations with respect to higher education and the institutional capacities in the sector One of the underlying trends is that the traditional pact between higher education and society has become problematic Society no longer accepts the rather special and protected position that universities have had for a very long time in our societies The knowledge based social and cultural missions of higher education institutions are no longer taken for granted as the main legitimacy bases for public investments in higher education Universities and colleges are at present expected to function efficiently to contribute to sustainable economic growth at various levels and to add to national and even supranational trade balances On top of this they have to prove that they maintain a high level of quality in their primary activities i e teaching research and services while adapting and responding to the expectations expressed so vehemently in their environments and to a decreasing per capita funding basis

Narrative Management in Corporate Japan Chie Yorozu, 2015-11-19 Scandals and failures in some of the best known international Japanese owned companies have shown that there is sometimes a considerable difference between the public and internal narratives of Japanese firms This book explores the extent to which Japanese firms public claims reflect wider reality Exploring how and why corporate narrative management is accepted or rejected by external and internal audiences in Japan the book clarifies what narrative management means for Japanese organizations It argues that the role of narrative management has become much more prevalent in Japan in recent years but that it does not serve quite the same role as it does in the Western environments where the theory and practice first emerged The author presents interview based case studies within four very different large Japanese organisations all of which have deployed and loudly announced new restructuring plans based largely on Western models of corporate best practice The book aims to describe and account for these Japanese corporate narratives and asks what they are why they are deployed and who believes in them As the first narrative related work in the Japanese context this volume provides an insight into the development of Japanese narrative management It will appeal to students and scholars of Japanese Business International Business and Organizational Studies

Management Lives David Knights, Hugh Willmott, 1999-08-30 The authors bring a spark of vitality and life to an area that could be cynically viewed as a series of conflicting fads and fashions I would recommend anyone in the process of reviewing or designing an entrepreneurship development course to consider the benefits that this book would bring to the teaching process Entrepreneurship and Innovation Using fiction in the classroom as an approach to stimulating the study of people in organizations is well established What this book contributes is a way of exploring some of the existential elements of life in organizations which are typically difficult to study It will be on my reading lists Hopefully this example and regrettably few others which exist will contribute in the long term to the reformulation of how the lived experience of organizational life may be explored in the classroom Leadership consumption and bureaucracy rational choice and meaning all through the medium of characters and situations in contemporary literature The clear theoretical framework supported by footnotes summaries and further reading guides makes this an introduction to management the student will find useful as well as enjoyable

Management, Organization, and Childbirth Gabriella Piscopo, Margherita Ruberto, 2022-12-27 Management Organization and Childbirth Towards a New Model for the Birth Path explores the complex topic of the birth path with a multidisciplinary magnifying glass on the paradigms languages and tools critical to the organization management

and clinical science The work consists of five chapters The first chapter provides a multidimensional analysis of childbirth The second chapter presents an organizational analysis that moves in unison with different models of health The third chapter studies the birth path in organizational and cynical terms by describing it in its core processes The fourth chapter proposes a study conducted in the Italian context which identifies some useful determinants for redesigning the birth path The fifth chapter formulates a proposal for redesigning the birth path based on a new health paradigm The proposed model offers useful insights for multiple categories of readers To students of medicine and higher education tracks in healthcare management it can offer opportunities to raise awareness not only regarding multi professional practice but also regarding confrontation with complementary disciplines To practitioners and policy makers it can provide useful stimuli to promote rational and informed decisions around the childbirth To researchers studying the health context within different disciplinary domains the model can offer unexplored research spaces within the new business complex system

Re-organising Service Work: Call Centres in Germany and Britain Karen A. Shire, Ursula Holtgrewe, Christian Kerst, 2017-09-29 This title was first published in 2002 Call centres are a type of service work that stand at the interface between corporations and consumers They exemplify more general tendencies present within service work They also have a particular public image being associated in the public mind with low skilled and regimented work This volume presents contributions from British and German management academics and industrial sociologists based on primary research on call centres in both countries The contributions cover the genesis and development of call centres as a new form of organization or indeed a new industry the rationalization and control strategies of organizations that establish call centres and the nature of service work and service interactions The findings of this volume challenge the common public image of call centres and finds that call centre employment is in fact very diverse So for example skilled advising and consulting services are often performed over the phone Along with the sometimes skilled nature of call centre work work organization and working conditions vary as well The text also seeks to contrast the British and German experience of call centre work and employment In Germany clerical work has traditionally been embedded in the specific traditions of co operative industrial relations that define the German model Call centres present a strategic challenge to this model and the expansion of call centres has been at the forefront of changes aimed at making employment more flexible in Germany This work offers a choice of country cases which permit a comparison of service employment within both a liberal capitalist and a socially embedded economy

Social Research and Reflexivity Tim May, Beth Perry, 2011 What are the critical gaps in thinking about reflexivity and social research How is reflexive practice shaped by the contexts and cultures in which researchers work How might research practice respond to twin demands of excellence and relevance in the knowledge based economy Thinking reflexively about the inter relationships between social research and societal practices is all the more important in the so called knowledge economy Developing reflexive practices in social research is not achieved through applying a method Where and how researchers work is fundamental in shaping the capacities and capabilities to produce research as content and context lie in a dynamic interaction This book not only provides a history of reflexive thought but its consequences for the practice of social research and an understanding of the contexts in which it is produced It provides critical insights into the implications of reflexivity through a discussion of positioning belonging and degrees of

epistemic permeability in disciplines It is also highly innovative in its suggestions for ways forward in research practice through the introduction of active intermediaries Overall the book offers an exciting new position on reflexive research that will generate much debate through its successful achievement of two difficult feats providing essential reading for orientations on reflexivity and social research in the twenty first century and making a landmark contribution to thinking and practice in the field Social Research and Reflexivity is suitable for advanced undergraduates postgraduates and social researchers in general across a number of disciplines including geography social research management and organizations economics urban studies sociology social policy anthropology and politics as well as science and technology studies
