Reference Grammar Of Mbili:

A Reference Grammar of Mbili Funwi F. Ayuninjam, 1998-08-20 A Reference Grammar of Mbili explores the major linguistic components of the Mbili language from a primarily descriptive point of view and within the cultural context of this Bantu language spoken in Cameroon

On reconstructing Proto-Bantu grammar Koen Bostoen, Gilles-Maurice de Schryver, Rozenn Guérois, Sara Pacchiarotti, 2023-03-15 This book is about reconstructing the grammar of Proto Bantu the ancestral language at the origin of current day Bantu languages While Bantu is a low level branch of Niger Congo the world's biggest phylum it is still Africa's biggest language family This edited volume attempts to retrieve the phonology morphology and syntax used by the earliest Bantu speakers to communicate with each other discusses methods to do so and looks at issues raised by these academic endeavours It is a collective effort involving a fine mix of junior and senior scholars representing several generations of expert historical comparative Bantu research It is the first systematic approach to Proto Bantu grammar since Meeussen's Bantu Grammatical Reconstructions 1967 Based on new bodies of evidence from the last five decades most notably from northwestern Bantu languages this book considerably transforms our understanding of Proto Bantu grammar and offers new methodological approaches to Bantu grammatical reconstruction

Negation Patterns in West African Languages and Beyond Norbert Cyffer, Erwin Ebermann, Georg Ziegelmeyer, 2009-08-27 This volume deals with issues on negation patterns in languages of West Africa and the adjacent north and east The first aim is to provide data on various aspects of negation in African languages Although the topics addressed here reflect a great diversity of negation patterns the following typological features have been identified to be prominent in our region conflict or even incompatibility between negation and focus use of other indirect means of negating non indicative mood covered under the term Prohibitive different negation patterns in different Tense Aspect Moods e.g Imperfective vs Perfective lack of negative indefinites and disjunctive negative marking often referred to as double negation The articles presented here show that areal factors have played a significant role in the development of negation strategies in the languages of West Africa and beyond On the other hand genetic factors seem to be less prominent

An Introduction to Linguistic Typology Viveka Velupillai, 2012 Offers an introduction to linguistic typology that covers various linguistic domains from phonology and morphology over parts of speech the NP and the VP to simple and complex clauses pragmatics and language change This title also includes a discussion on methodological issues in typology

BOOK JACKET

Functional Structure from Top to Toe Peter Svenonius, 2014 This volume consists of nine original chapters on central issues in theoretical syntax all written by distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have

pushed the cartographic program forward over the last decade The first three papers deal with subject extraction the que qui alternation and relative clause formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of pro drop in the history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S Kayne both present novel analyses of complementizers suggesting that they are essentially nominal rather than verbal The final three papers address the relationship of morphology to syntax The first two argue for a syntactic approach to word formation Guglielmo Cinque's in a typological context and Anders Holmberg's within an analysis of Finnish focus constructions The final paper by Edwin Williams presents an argument for the limitations of the syntactic approach to word formation

The Paradigmatic Structure of Person Marking Michael Cysouw, 2009-01-29 This book explores person markers the linguistic elements that provide points of reference to speech act participants Michael Cysouw develops a new framework for the typology of person marking based on the rejection of the notion of plurality for its analysis When a mother says Mummy is going to say goodnight now Mummy is the person marker in a way that in English is confined to motherese but which is used more commonly in some other languages and may also be characteristic of much earlier forms Dr Cysouw divides the person markers of 400 languages into paradigms He considers how the structure of these person paradigms relates to their function His investigation provides a clear account of how person markers work syntactically pragmatically and semantically as well as giving fresh insights into aspects of linguistic change language relatedness and the interfaces between discourse syntax and semantics The combination of a typological and a comparative approach results in the first outline of a cognitive map of the paradigmatic structure of person marking

Typological Studies Guglielmo Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed internally headed and headless relative clauses

Coordination and Subordination Sandra Pereira, Clara Pinto, Fernanda Pratas, 2016-06-22 Recent studies on the syntax and semantics of complex sentences have dealt with several challenges to the traditional boundaries between coordination and subordination Some constructions belong to one of the two types according to syntactic criteria but relate to the other type on semantic grounds whereas other constructions are not compatible with either the canonical syntactic or semantic tests traditionally employed to establish this

distinction Other constructions by contrast seem to have evolved in such a way that they now cross the divide between both types The collection of papers in this volume delves further into the theoretical implications of previous analyses and focuses on a wide array of data from different languages taking those challenges as a point of departure to develop innovative perspectives and to advance thought provoking ideas

Focus Strategies in African Languages Enoch Oladé Aboh,Katharina Hartmann,Malte Zimmermann,2008-08-27 Over the last two decades focus has become a prominent topic in major fields in linguistic research syntax semantics phonology Focus Strategies in African Languages contributes to the ongoing discussion of focus by investigating focus related phenomena in a range of African languages most of which have been under represented in the theoretical literature on focus The articles in the volume look at focus strategies in Niger Congo and Afro Asiatic languages from several theoretical and methodological perspectives ranging from detailed generative analysis to careful typological generalization across languages Their common aim is to deepen our understanding of whether and how the information structural category of focus is represented and marked in natural language Topics investigated are among others the relation of focus and prosody the effects of information structure on word order ex situ versus in situ strategies of focus marking the inventory of focus marking devices focus and related constructions focus sensitive particles The present inquiry into the focus systems of African languages has repercussions on existing theories of focus It reveals new focus strategies as well as fine tuned focus distinctions that are not discussed in the theoretical literature which is almost exclusively based on well documented intonation languages

The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura,2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa s development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the

book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa s development efforts
