R. Kets de Vries,2011-09-19 Views from the interface of psychoanalysis and organizational life In the books in this series Manfred Kets de Vries failed engineer entrepreneur manqué reluctant economist international management guru psychoanalyst wit and outdoorsman offers an overview of his work spanning four decades a period in which he has established himself as the leading figure in the clinical study of organizational leadership At a key point in his career working as he puts it in the twilight zone of economics management and psychoanalysis he decided to strike out on a little trodden path and bring the person back into the organization Now Kets de Vries occupies a unique position in the academic business world putting leaders and companies of the couch and working at the often intimate interface where the inner theater of the individual meets the outer world of the organization The second book in this series *Reflections on Leadership and Career Development* takes different perspectives on the intimate connection between the personality or inner theater of individuals and the organizational context in which they work how different personality types in positions of leadership or as members of management teams affect the functioning and success of organizations Kets de Vries looks at the way basic psychological processes operate on individual and corporate performance and analyzes them in the context of case studies of leaders and organizations He examines narcissism dysfunctional collusion between leaders and followers some new leadership archetypes and the roles that organizational therapists coaches or consultants can play in their interventions The book includes a lengthy study of Vladimir Putin as CEO of Russia Inc an assessment of the former Russian president's performance as an organizational leader The final part of the book examines the career life cycle and how executives cope or fail to cope with rites de passage like succession and retirement For the first time this book provides a glimpse of Manfred Kets de Vries own inner theater as the wellspring of his success as psychoanalyst mentor and

inspiration to a generation of leaders Reflections on Leadership and Career Development offers a rare opportunity to observe Manfred on his own legendary couch a personal perspective not to be missed Paul McMorran HR Director TNK BP

Reflections of South African University Leaders: 1981 to 2014 Council on Higher Education, 2016-03-17 Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education's CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over

the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication Reflections on Leadership and Institutions in Africa Kenneth Kalu, Toyin Falola, 2020-05-22 This book contains different reflections on leadership and institutions in Africa Drawing from different ideological and methodological orientations the book highlights how leadership and institutions have shaped and continue to shape the trajectory of Africa's political and economic development The book explores different epochs in Africa's history from the era of colonialism to the period of nationalist movements and up to post colonial Africa Essays in the volume engage with major actors and important institutions that defined each era By presenting various reflections and representations of leadership and institutions in Africa this book attempts to make the connection between leadership and institutions on the one hand and between these variables and Africa's development on the other Similar to most studies on Africa's political economy the book considers the role of external forces whether operationalized through direct interventions as was the case during the colonial era or through subtle imposition of policies as has been the new model in post colonial times Drawing from these lenses issues around Africa's dependency on external interventions neo colonialism neoliberalism and disregard for Africa's culture are explored and contextualized within the framework of leadership and institutions
