

## REFORMING CHINA'S FINANCIAL SYSTEM: SUSTAINING PRIVATE SECTOR GROWTH

### Introduction

The Chinese economy has been growing exponentially for over two decades with growth rates averaging 10% since the Asian Financial Crisis of 1997. In the process, the economy has flirted with deflation (1998-99, 02-03, 08-09), high levels of inflation (2007-08, 2010-11), negative real interest rates (2008-9) and low lending rates averaging 5-6% (2010-11). The negative real interest rates signify negative real rates of return on savings for depositors and the majority of households that are responsible for a major share of China's capital account.

China's transition from a centrally planned to a market based economy has brought about significant changes. However, there is a common perception that the hierarchy of China's financial system has not aided this change and that deep structural problems are prevalent within the system. McKinsey Global Institute stated that the access to credit for individuals and SMEs in China is far below other developing countries (McKinsey Global Institute 2009,25). Some academics have further concurred that "China lacks [the] infrastructure of modern

Banks Becky Chiu, Mervyn Lewis, 2006-01-01 This book is informative and readable. It will be of interest to anyone wanting to learn about the development of the Chinese economy in general and the reforms of state-owned enterprises in particular. The data and in-depth discussion presented in the book will appeal to academics as well as policymakers. Yin Fang Zhang, *Journal of the Asia Pacific Economy*. China watchers will welcome a book which provides a detailed insight into the two pillars of that economy: the state-owned enterprises (SOEs) and the state-owned banks (SOBs). This is a scholarly work rich in detail. Shelagh Heffernan, *The Financial Regulator*. For China to sustain her transformation, it requires that she tackle reform of her state-owned enterprises (SOEs) and banks. This book comprehensively assesses the scale of the problem, reviews previous reforms, and suggested solutions. Finally, the authors propose their own reform agenda sensitive to Chinese realities. Michael Artis, *European University Institute, Italy*. This is an excellent study of the nexus between the effects of party control, the soft budget of state-owned enterprise (SOEs) and the financial fragility of the state-owned banking system (SOBs) in China. It is both sympathetic and knowledgeable about the problems of achieving reform and progress. Beautifully written, it should become the most influential work in this field in the English-speaking world. Charles A. E. Goodhart, *London School of Economics, UK*. This book's starting point is that after two decades of experiments during which other transition economies have effectively privatised all of their former state enterprises, China is still endeavouring to find a way to reinvent and re-engineer its own state-owned economic establishments. The authors explore these reforms along with the problems of China's state-owned banks, which have long been troubled by the adverse loans of Chinese enterprises and face foreign competition in 2007 under China's WTO commitments. Drawing on wide-ranging case studies of enterprise reform, Becky Chiu and Mervyn Lewis combine their extensive experience to give an authoritative account of China's enterprise and bank reform agenda involving property rights, improved corporate governance, and stimulating enterprise. This book will be of great interest to business economists, academic economists, and those following the development of the Chinese economy. *Reforming China* Qixian Yang, 2010-09-01 *Enrich Series on China's Economic Reform* provides a comprehensive analysis of China's 30-year process of economic reform. Based on an analysis of the interplay between theory and implementation, this volume *Reforming China: Theoretical Framework* outlines *The Political Economy Of China's Financial Reforms*. Paul Bowles, Gordon White, 2019-07-11 *THIS PATHBREAKING* Work analyzes the evolution of China's financial reforms since 1979. China's reformers have stressed the construction of a more diverse, flexible, and competitive financial system as a crucial element of China's economic reform program. The authors assess the theory and practice of financial reform in light of China's specific characteristics as a large developing country that still claims to be pursuing the goal of establishing a new form of socialist market economy. The authors utilize two approaches. First, they place the overall design and trajectory of financial reform since 1979 within a broad comparative framework of alternative strategies of financial reform and financial systems. Second, they use a political economy perspective to explore the complex interactions among the political and economic actors.
