populations The key question that has guided many of these investigations and underlies the premise of this book is what happens to an ordinary person who has experienced an extraordinary event This volume also highlights the fact that those involved in such research must also deal with their own emotional responses as they hear victims tell of killing torture humiliation and dispossession The volume will therefore appeal to practitioners of psychology psychiatry social work nursing and anthropology However its breadth and the evaluation of the strengths and disadvantages of both qualitative and quantitative methods also make it an excellent text for students
