History of Literature in the Yuan Dynasty Li Shi, The book is the volume of History of Literature in the Yuan Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600 1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070 1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one of the world s oldest civilizations and is regarded as one of the cradles of civilization The Zhou dynasty 1046 256 BC

supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty. From 206 BC to 220 AD, successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing, 1644–1912, which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War, 1927–1949. China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

The Age of Ecology

Joachim Radkau, 2014-04-03. This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today. Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories, each with its own dramatic tension between single-issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players. While the history can be traced back several centuries, environmentalism has flourished since the environmental revolution of 1970, spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming. While environmentalists often opposed the scientific mainstream, they were also often led by scientific knowledge. Environmentalism is the true Enlightenment of our time, so much so that we can call our era the age of ecology. This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time.

Echoes from the Poisoned Well Jeffrey Stine, 2006-03-07. The emerging environmental justice movement has created greater awareness among scholars that communities from all over the world suffer from similar environmental inequalities. This volume takes up the challenge of linking the focussed campaigns and insights from African American

campaigns for environmental justice with the perspectives of this global group of environmentally marginalized groups The editorial team has drawn on Washington s work on Paul Rosier s study of Native American environmentalism and on Heather Goodall s work with Indigenous Australians to seek out wider perspectives on the relationships between memories of injustice and demands for environmental justice in the global arena This collection contributes to environmental historiography by providing bottom up environmental histories in a field which so far has mostly emphasized a top down perspective in which the voices of those most heavily burdened by environmental degradation are often ignored The essays here serve as a modest step in filling this lacuna in environmental history by providing the viewpoints of peoples and of indigenous communities which traditionally have been neglected while linking them to a global context of environmental activism and education Scholars of environmental justice as much as the activists in their respective struggle face challenges in working comparatively to locate the differences between local struggles as well as to celebrate their common ground In this sense the chapters in this book represent the opening up of spaces for future conversations rather than any simple ending to the discussion The contributions however reflect growing awareness of that common ground and a rising need to employ linked experiences and strategies in combating environmental injustice on a global scale in part by mimicking the technology and tools employed by global corporations that endanger the environmental integrity of a diverse set of homelands and ecologies
