This book looks back on forty years of writings from the Oakland based Institute for Food and Development Policy better known as Food First on the occasion of its 40th anniversary The book highlights the breadth and depth of the organization s published works addressing issues such as hunger international trade US foreign policy the Green Revolution agroecology climate justice land reform food and farm workers rights and food sovereignty *SH-82, Carbondale East Reconstruction, Garfield County* ,1981 **Rethinking Metonymy** Sebastian Matzner,2016-09-22 Although metonymy has long been recognized as being a central device in poetic language it has received little critical attention in its own right Not only has this created a gap in literary analytical scholarship which needs to be addressed but it has also allowed for problematic appropriations of metonymy as a critical concept now widely in use in structuralist studies across the humanities *Rethinking Metonymy* is the first monograph to confront and resolve these issues It advances the theory of poetic language by developing a ground breaking new definition of metonymy on the basis of an evaluation of examples in Greek tragedy and lyric poetry considering these in conjunction with examples from classicizing and Romantic German poetry for the purposes of illustration and comparison including works by Goethe Schiller and Hlderlin In addition to establishing the fundamental principle different conformations and aesthetic effects of this important poetic device the volume also demonstrates how the new arguments it offers have the potential to set an agenda for far reaching reconsiderations in literary studies and beyond It mobilizes analytical insights into the inner workings of metonymy by examining three case studies designed to explore the trope in critical practice covering its role in creating a hellenizing style what happens to it in classic German translations of Aeschylus Agamemnon and critically re assessing its modern re appropriations as a structural semiotic paradigm Connecting classical perspectives with modern linguistic and literary theory *Rethinking Metonymy* is a compelling and authoritative analysis that rehabilitates and brings much needed clarity to an oft neglected literary device Its combination of in depth engagement with classical literature and cross cultural and cross linguistic comparison makes it an invaluable resource not

only to specialists in Greek poetry but also to students and scholars engaged in literary analysis translation criticism and structuralist studies across a much wider range of disciplines **New Directions in Agrarian Political Economy** Ryan Isakson, 2017-10-02 How relevant are the classic theories of agrarian change in the contemporary context This volume explores this question by focusing upon the defining features of agrarian transformation in the 21st century the financialization of food and agriculture the blurring of rural and urban livelihoods through migration and other economic activities forest transition climate change rural indebtedness the co evolution of social policy and moral economies and changing property relations Combined the eleven contributions to this collection provide a broad overview of agrarian studies over the past four decades and identify the contemporary frontiers of agrarian political economy In this path breaking collection the authors show how new iterations of long evident processes continue to catch peasants and smallholders in the crosshairs of crises and how many manage to face these challenges developing new sources and sites of livelihood production This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies *Journal of the House of Representatives of the United States* United States.
