Sectoral Composition And The Effect Of Education On Wages An International Comparison:

Sectoral Composition and the Effect of Education on Wages Jim Allen,1997-01-01 It is a widely held conviction that in order to earn a decent living one needs a good education However the importance of education as a determinant of earnings is far from constant it differs strongly between countries and also between industrial sectors within countries Little progress has been made towards explaining these differences partly due to the small number of cases available to test explanations This study tackles this problem by pooling employee data from 11 capitalist countries and focussing on differences in the sectoral context of wage determination Depending on this context employers may differ in their vulnerability to the effects of poor employee performance Could sectoral differences in the impact of education be understood in terms of strategies used by especially vulnerable employers to safeguard the quality of worker performance And might differences between countries then result at least in part from substantial differences in the distribution of the relevant context characteristics These questions are analysed using a multi level research design in which the impact of sectoral context variables on the education wage relation at both the sector and country levels is examined Sectoral Composition and the Effect of Education on Wages James Allen,1997

Measurement of Individual Social Capital Martin Pieter Johannes van der Gaag,2005 **Status**

Attainment in the Netherlands, 1811-1941 Richard Lindert Zijdemann,2010 **For the time being. Accounting for inconclusive findings concerning the effects of temporary employment relationships on solidary behavior of employees ,** Growth With Inequality: An International Comparison On Income Distribution Jinjun Xue,2012-07-13

In the era of globalization and liberalization the world is enjoying high growth as well as suffering from the ill effects of unequal distribution of its economic outcomes The activities of anti government demonstrations in China and across the world via the Occupy Wall Street Movement highlight that inequality has become an international phenomenon It is apparent in both poor countries under authoritarianism and rich countries governed by a democratic regime Thus inequality has become not only a hurdle to development but also a threat to social and political stability The spread of the Jasmine Revolution across parts of North Africa and the Arab Spring are illustrative of what can happen under certain circumstances This book confirms the inconsistencies between high growth and increasing inequality via a series of case studies across 11 countries numerous regions and OECD members Many of the case studies draw upon original household surveys Our findings indicate the seriousness of income inequality explore factors that have caused the inequality and analyze their economic and social consequences The book raises and deals with three key questions 1 Can high growth reduce inequality gradually 2 Can government intervention be effective in equalizing income distribution 3 Is the income disparity an engine for or an obstacle of high growth **Differences and Changes in Wage Structures** Richard B. Freeman, Lawrence F. Katz,2007-12-01

During the past two decades wages of skilled workers in the United States rose while those of unskilled workers fell less educated young men in particular have suffered unprecedented losses in real earnings These twelve original essays explore

whether this trend is unique to the United States or is part of a general growth in inequality in advanced countries Focusing on labor market institutions and the supply and demand forces that affect wages the papers compare patterns of earnings inequality and pay differentials in the United States Australia Korea Japan Western Europe and the changing economies of Eastern Europe Cross country studies examine issues such as managerial compensation gender differences in earnings and the relationship of pay to regional unemployment From this rich store of data the contributors attribute changes in relative wages and unemployment among countries both to differences in labor market institutions and training and education systems and to long term shifts in supply and demand for skilled workers These shifts are driven in part by skill biased technological change and the growing internationalization of advanced industrial economies **Socioeconomic Causes and Consequences of Divorce** Anne-Rigt Poortman,2002 The present study examines the socio economic causes and consequences of divorce in the Netherlands during the second half of the twentieth century Are women with a better labour market position at a higher risk of divorce and are men who are unemployed or have an unstable career more likely to divorce The study also seeks to explain the influence of spouses socio economic positions on divorce In addition it takes into account the changes surrounding women s work and the changing sex roles Met een Nederlandse samenvatting Power and Social Structure Aleksandra Jasińska-Kania,Melvin L. Kohn,Kazimierz M. Słomczyński,1999 **The Labor Market Effects of Foreign-owned Firms** Rita Almeida,2004
