Security Structures In The Eastern Mediterranean Region And The Near East:

Security Structures in the Eastern Mediterranean Region and the Near East, 1997 **Challenges to Global Security** Hussein Solomon, 2007-10-24 Ours is an age of great upheaval where change sometimes appears to be the only constant Three of the most important forces driving such change are globalization regionalization and democratization This substantial work makes a concerted attempt to understand these forces and to show how they impact on the vitally important question of global security The volume brings together a wide range of scholars who hold diverse views and who collectively make a very significant contribution to current discourses within international relations and contemporary geopolitics Such is the book's breadth that it covers every region of the world addressing in turn security problems in the USA Latin America South Asia South East Asia Europe Russia and environs the Middle East and Africa Each discourse receives substantial coverage from economics and politics to religion religious fundamentalism and human rights Challenges to Global Security offers one of the richest comparative volumes yet to be published on the subject and will have strong appeal to students scholars and policymakers in the fields of international relations ethics and politics **The Foreign Policies of Arab States** 'Alī al-Dīn Hilāl, 2010 This is an indispensable aid for those studying or teaching the foreign policies of the contemporary Middle East Not only are the elements of foreign policy discussed and presented as a whole region but the editors provide the established analytical framework by which each contributor in their individual chapters has analyzed and evaluated the foreign policies of nine Arab countries Their framework perceives foreign policy in the context of its environment domestic regional and global This edition has new material reflecting the earth shaking events at the end of the Cold War and the continuation of violence and terrorism **Foreign Relations of the United States, 1951: The Near East and Africa**, 1977 **Human Rights in Libya** Giacomina De Bona, 2013 Since the end of the Cold War a democratic wave has swept through large parts of the world propagating liberal values and giving impetus to the case for human rights in an international society To date however the promotion of human rights has presented a mixed account with some countries lagging behind others in terms of their observance In an effort to account for these differences this book analyzes the relationship between norms and the social construction of international society and examines how human rights are promoted in that context Focussing on Libya as a case study Giacomina De Bona criticises the neo realist approach by demonstrating the impact of international society on the advancement of human rights Libya has related to the international environment in different ways over time ranging from isolation to reconciliation and regime change making it a particularly interesting example This book is of particular relevance in light of the recent Arab Spring and raises the question as to whether the coercive imposition of the Western liberal model contributes to establishing respect for human rights in what continue to be the peripheral zones of international society Near East and North Africa - Regional Overview of Food Security and Nutrition, 2022 Food and Agriculture Organization of the United Nations, International Fund for Agricultural

Development, United Nations Children's Fund, World Food Programme, World Health Organization, United Nations Economic and Social Commission for West Asia, 2023-03-29 This year's report presents evidence that Arab States face significant challenges in achieving Sustainable Development Goal 2 targets related to hunger food security and nutrition as undernourishment moderate or severe food insecurity and malnourishment are increasing Child wasting and overweight are higher and adult obesity is double the global average LDCs and conflict affected countries suffer from even more severe hunger and malnutrition including child stunting wasting and women's anaemia The report also provides the first assessment of the cost and affordability of a healthy diet since the outbreak of the COVID 19 pandemic which shows a growing trend in the price of nutritious diets in recent years and that more than half the Arab population cannot afford a healthy diet The Ukraine crisis which has triggered food shortages and increased food price inflation further adds to the burden on the region This year the report focuses on how trade can enable regional food security and nutrition Arab countries rely significantly on imports for the essential food items necessary for diverse and healthy diets that they cannot locally produce in sufficient quantities due to limited natural resource endowments It discusses the role of trade and trade facilitation as essential enablers of all four dimensions of food security and nutrition It also underlines how tariffs and non tariff measures influence the economic access to food in the area On the other hand countries that depend on trade may become more exposed to outside shocks as the pandemic and the Ukraine crisis have highlighted The report assesses Arab countries vulnerabilities such as import dependency and lack of supplier diversification To reduce the exposure to such external shocks international trade must be carefully managed sources of imports should be diversified and international trade relations must be expanded to include new partners and markets The report concludes with further policy recommendations that aim for the better integration of trade into food security and nutrition policies in the region

Security Challenges in the Mediterranean Region

Roberto Aliboni, George Joffe, Tim Niblock, 2013-04-03 Contributions to this book question the concept of the clash of cultures The challenge to the West does not lie in the monolith of Islam turning aggressively outward to Europe and the US but in the rivalries between regimes ruling over societies divided by an imbalance in wealth and power

Foreign Relations of the United States, 1949: The Near East, South Asia, Africa, 1976

Bound to Cooperate - Europe and the Middle East

Sven Behrendt, Christian-Peter Hanelt, 2010-07-30 Regional integration and the organisation of cross regional relations have been some of the most prominent features of international relations By further strengthening the institutions of the European Union Europe is taking steps to become a capable international actor Only in few world regions such as the Middle East integration has not been a driving force moving political and economic relations Given these structural imbalances between Europe and the Middle East but also geographical proximity economic interdependencies and shared historical experiences what interests does Europe pursue in the Middle East And if the goal of European policies is to establish stable political economic and social relations with its neighbouring region how could inter regional relations best be organised
