

SPINOZA'S RETHINKING OF ACTIVITY: FROM THE SHORT TREATISE TO THE *ETHICS*

ANDREA SANGIACOMO and OHAD NACHTOMY

ABSTRACT. This paper argues that God's immanent causation and Spinoza's account of activity as adequate causation (of finite modes) do not always go together in Spinoza's thought. We show that there is good reason to doubt that this is the case in Spinoza's early *Short Treatise on God, Man and His Well-being*. In the *Short Treatise*, Spinoza defends an account of God's immanent causation without fully endorsing the account of activity as adequate causation that he will later introduce in the *Ethics* (E3def2). We turn to an examination of how God's immanent causation relates to the activity of finite things in the *Ethics*. We consider two ways to think about the link between God, seen as immanent cause, and the activity of finite things: namely, in terms of entailment and in terms of production. We argue that the productive model is most promising for understanding the way in which the activity of finite things and God's immanent causality are connected in Spinoza's (mature) philosophy.

Andrea Sangiacomo is Assistant Professor of history of philosophy at the University of Groningen and coordinator of the Groningen Centre for Medieval and Early Modern Thought. His primary area of research is the history of early modern philosophy and science. He published extensively on Spinoza's philosophy and on the accounts of causation in early modern natural philosophy.

Ohad Nachtomy is Associate Professor at Bar-Ilan University and a visiting member at the Institute for Advanced Study at Princeton. His main area of research is early modern philosophy. He is the author of two monographs, including most recently *Living Mirrors: Infinity, Unity, and Life in Leibniz*, forthcoming with Oxford University Press, and numerous articles.

celebrated for creating influential liberating concepts and ideas that have enabled many of us to live in peace. However, their work was certainly not perfect. In this enlightening volume, John Christian Laursen and María José Villaverde have gathered contributors to focus on the paradoxes, blindspots, unexpected flaws or ambiguities in early modern toleration theories and practices. Each chapter explores the complexities, complications and inconsistencies that came up in the seventeenth and eighteenth centuries as people grappled with the idea of toleration. In understanding the weaknesses, contradictions and ambivalences in other theories, they hope to provoke thought about the defects in ways of thinking about toleration in order to help in overcoming similar problems in contemporary toleration theories.
