The Architecture of Empire Gauvin Alexander Bailey, 2022-09-23 Most monumental buildings of France's global empire such as the famous Saigon and Hanoi Opera Houses were built in South and Southeast Asia Much of this architecture and the history of who built it and how has been overlooked The Architecture of Empire considers the large scale public architecture associated with French imperialism in seventeenth and eighteenth century India Siam and Vietnam and nineteenth and twentieth century Indochina the largest colony France ever administered in Asia Offering a sweeping panorama of the buildings of France's colonial project this is the first study to encompass the architecture of both the ancient and modern empires from the founding of the French trading company in the seventeenth century to the independence and nationalist movements of the mid twentieth century Gauvin Bailey places particular emphasis on the human factor the people who commissioned built and lived in these buildings Almost all of these architects both Europeans and non Europeans have remained unknown beyond at best their surnames Through extensive archival research this book reconstructs their lives providing vital background for the buildings themselves Much more than in the French empire of the Western Hemisphere the buildings in this book adapt to indigenous styles regardless of whether they were designed and built by European or non European architects The Architecture of Empire provides a unique comprehensive study of structures that rank among the most fascinating examples of intercultural exchange in the history of global empires
