Sterling examines how well or poorly the US military has learned lessons and applied findings from analyzing foreign wars through observer missions and post conflict military to military liaisons Preparing for the next war at an unknown date in the future against an undetermined opponent is an inherently difficult undertaking with extremely high stakes Even the most detailed exercises and wargames do not truly simulate combat and the fog of war Thus militaries the world over have studied foreign wars to see what lessons can be gleaned but the effectiveness of this learning process has rarely been evaluated Sterling's goals are to better understand learning dynamics in the military to better determine what types of knowledge can be gained from foreign wars to identify common pitfalls and to propose ways to maximize the benefits for doctrine

organization and training This book explores four major cases of US observation missions at key junctures in history the Crimean War 1853 56 the Russo Japanese War 1904 05 the Spanish Civil War 1936 39 and the Yom Kippur War 1973 These conflicts preceded the US Civil War First World War Second World War and the Revolution in Military Affairs of the Gulf War The case studies show that the observer missions can yield significant benefits if the right conditions are met **Tiger Check** Steven A. Fino,2017-11 The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots historical skillsets such as superb hand eye coordination required for aggressive stick and rudder maneuvering and perfect eyesight and crack marksmanship required for long range visual detection and destruction of the enemy Highly automated systems would proponents argued simplify the pilot s tasks while increasing his lethality in the air thereby opening fighter aviation to broader segments of the population However these new systems often required new unique skills which the pilots struggled to identify and develop Moreover the challenges that accompanied these technologies were not restricted to individual fighter cockpits but rather extended across the pilots tactical formations altering the social norms that had governed the fighter pilot profession since its establishment In the end the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior despite the precepts embedded within the myth of the fighter pilot As such this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace It is broadly applicable to other enterprises confronting increased automation from remotely piloted aviation to Google cars It should appeal to those interested in the history of technology and automation as well as the general population of military aviation enthusiasts Provided by publisher In Sierra Leone Michael Jackson,2004-03-08 The reminiscences of an anthropologist revisiting the site of his fieldwork from the 1970s it is also an account of the life of a prominent politician and friend of the author in Sierra Leone *The California Motorist* ,1918 Interceptor United States.
