A Century of Mathematics in America Peter L. Duren, Richard Askey, Uta C. Merzbach, Harold M. Edwards, 1988 The first section of the book deals with some of the influential mathematics departments in the United States Functioning as centers of research and training these departments played a major role in shaping the mathematical life in this country The second section deals with an extraordinary conference held at Princeton in 1946 to commemorate the university's bicentennial The influence of women in American mathematics the burgeoning of differential geometry in the last 50 years and discussions of the work of von Karman and Weiner are among other topics covered **Directory of Awards** National Science Foundation (U.S.). Directorate for Science and Engineering Education, 1987 PAUL HALMOS Celebrating 50 Years of Mathematics John Ewing, F.W. Gehring, 2012-12-06 Paul Halmos will celebrate his 75th birthday on the 3rd of March 1991 This volume from colleagues is an expression of affection for the man and respect for his contributions as scholar writer and teacher It contains articles about Paul about the times in which he worked and the places he has been and about mathematics Paul has furthered his profession in many ways and this collection reflects that diversity Articles about Paul are not biographical but rather tell about his ideas his philosophy and his style Articles about the times and places in which Paul has worked describe people events and ways in which Paul has influenced students and colleagues over the past 50 years Articles about mathematics are about all kinds of mathematics including operator theory and Paul's research in the subject This volume represents a slice of mathematical life and it shows how many parts of mathematics Paul has touched It is fitting that this volume has been produced with the support and cooperation of Springer Verlag For over 35 years Paul has contributed to mathematics publishing as founder and editor of many outstanding series **Teachers of the Foothills Province** John W. Chalmers, 1968-12-15 In 1967 the Alberta Teachers Association published in honour of Canada's Centennial a history of the public school system in Alberta entitled *Schools of the Foothills Province* This informative book published for the Association by University of Toronto Press is now followed by a companion volume written by the same author which tells the story of the Association itself and its long and sturdy efforts to improve the position of teachers and the quality of education in the province After providing the background to the formation of the ATA which officially began on July 24 1918 the author goes on to describe the growth of the organization from its beginnings as a spare time activity for teachers to a strong influential union From its earliest years it was affiliated with the labour movements of the Twenties and fought with increasing strength for the rights of Alberta teachers Throughout this study the ATA's concern is evident not only for the economic aspects of teaching for higher salaries and pension schemes but also for other features departmental examinations and curricula preparation and certification of teachers and educational research The ATA's mercurial relations with the provincial government are related its struggle through the depression years and its blossoming in the first decade after 1935 under a Social Credit Government Leading personalities move through this story against the turbulent background of a growing

young province contributing an air of vigorous controversy and achievement to the story of the ATA Mathematical Logic

Hess, 1961 *Standards-based School Mathematics Curricula* Sharon L. Senk, Denisse R. Thompson, 2020-07-24 The
Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics
in 1989 set forth a broad vision of mathematical content and pedagogy for grades K-12 in the United States These Standards
prompted the development of Standards based mathematics curricula What features characterize Standards based curricula
How well do such curricula work To answer these questions the editors invited researchers who had investigated the
implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students
learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify
content on which performance of students using Standards based materials differed from that of students using more
traditional materials and content on which performance of these two groups of students was virtually identical Additionally
four scholars not involved with the development of any of the materials were invited to write critical commentaries on the
work reported in the other chapters Section I of *Standards Based School Mathematics Curricula* provides a historical
background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform
school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II, III, and
IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final
section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on
the research reported in this book It provides a historical perspective on the use of research to guide mathematics
curriculum reform in schools and makes additional recommendations for further research In addition to the references
provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end
of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula
including professors and graduate students interested in mathematics education curriculum development program evaluation

or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research **Quarterly Review of the Michigan Alumnus** ,1959 Includes section Some Michigan books
