Design in Nature Adrian Bejan, J. Peder Zane, 2013-01-08 In this groundbreaking book Adrian Bejan takes the recurring patterns in nature trees tributaries air passages neural networks and lightning bolts and reveals how a single principle of physics the constructal law accounts for the evolution of these and many other designs in our world Everything from biological life to inanimate systems generates shape and structure and evolves in a sequence of ever improving designs in order to facilitate flow River basins cardiovascular systems and bolts of lightning are very efficient flow systems to move a current of water blood or electricity Likewise the more complex architecture of animals evolve to cover greater distance per unit of useful energy or increase their flow across the land Such designs also appear in human organizations like the hierarchical flowcharts or reporting structures in corporations and political bodies All are governed by the same principle known as the constructal law and configure and reconfigure themselves over time to flow more efficiently Written in an easy style that achieves clarity without sacrificing complexity Design in Nature is a paradigm shifting book that will fundamentally transform our understanding of the world around us
