Role of Nature in Human Life The progress of man from the Stone Age to the computer age is astonishing At times one may be misled and consider this as man s victory over nature But it is not true Our forefathers modestly believed that Life is a glorious gift from God Human being is the epitome of the infinite prowess of the divine creator Nature plays a dominant role in the lives of all creations Natural objects like rivers mountains forests etc enjoyed a high position in the life of all societies Rivers were considered as goddesses having not only purifying capacity but also self purifying ability Pollution of the water of a river was considered as sin and it attracted punishments of different kinds 1 Today these ancient scripts appear to be far more relevant **The Politics of International Environmental Management** A. Underdal,2012-12-06 Many of the major environmental challenges facing governments and societies today are collective problems calling for joint solutions However even when effective solutions can be found only through joint efforts international cooperation is often hard to establish and maintain This makes it all the more important to understand

the conditions for success and the causes of failure This book examines some of the political mechanisms at work in the formation and operation of international environmental regimes What are the major factors that shape the national positions that governments bring to the negotiating table How do the international institutions and negotiation processes through which these preferences and positions are adjusted and aggregated affect outcomes What are the main mechanisms determining whether or not international environmental agreements are successfully implemented at the domestic level The Politics of International Environmental Management is published in cooperation with the European Science Foundation
