Ito, 2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Zurich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all the authors of the papers that were submitted We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICS R UBC MPR Teltech and Newbridge Networks

Robbins, 2022-04-19 As recently as 1968 computer scientists were uncertain how best to interconnect even two computers The notion that within a few decades the challenge would be how to interconnect millions of computers around the globe was too far fetched to contemplate Yet by 1988 that is precisely what was happening The products and devices developed in the intervening years such as modems multiplexers local area networks and routers became the linchpins of the global digital society How did such revolutionary innovation occur This book tells the story of the entrepreneurs who were able to harness and join two factors the energy of computer science researchers supported by governments and universities and the tremendous commercial demand for Internetworking computers The centerpiece of this history comes from unpublished interviews from the late 1980s with over 80 computing industry pioneers including Paul Baran J C R Licklider Vint Cerf Robert Kahn Larry Roberts and Robert Metcalfe These individuals give us unique insights into the creation of multi billion dollar markets for computer communications equipment and they reveal how entrepreneurs struggled with failure uncertainty and the limits of knowledge
