Boehm, 2013-11-11 to increase the use of direct contact processes the National Science Foundation supported a workshop on direct contact heat transfer at the Solar Energy Research Institute in the summer of 1985 We served as organizers for this workshop which emphasized an area of thermal engineering that in our opinion has great promise for the future but has not yet reached the point of wide spread commercial application Hence a summary of the state of knowledge at this point is timely The workshop had a dual objective 1 To summarize the current state of knowledge in such a form that industrial practitioners can make use of the available information 2 To indicate the research and development needed to advance the state of the art indicating not only what kind of research is needed but also the industrial potential that could be realized if the information to be obtained through the proposed research activities were available **MetroGen Heat: Books 4-6** Carina Alyce, This box set contains three interconnected books from the MetroGen Heat series Guarded Disciplined and Untamed *Invisibility in Visual and Material Culture* Asbjørn Grønstad, Øyvind Vågnes, 2019-06-01 The essays in *Invisibility in Visual and Material Culture*

contribute pioneering and revelatory insights into the phenomenon of invisibility forging new and multi disciplinary approaches at the intersection of aesthetics technology representation and politics Importantly they acknowledge the complex interaction between invisibility and its opposite visibility arguing that the one cannot be fully grasped without the other Considering these entanglements across different media forms the chapters reveal that the invisible affects many cultural domains from digital communication and operative images to the activism of social movements as well as to identity race gender and class issues Whether the subject is comic books photographic provocations biometric and brainwave sensing technologies letters or a cinematic diary the analyses in this book engage critically and theoretically with the topic of invisibility and thus represent the first scholarly study to identify its importance for the field of visual culture Circular United States.
