Holistic Management Handbook, Third Edition Jody Butterfield,Sam Bingham,Allan Savory,2019-04-16

Holistic management is a systems thinking approach developed by biologist Allan Savory to restore the world s grassland soils and minimize the damaging effects of climate change and desertification on humans and the natural world This third edition of Holistic Management Handbook Regenerating Your Land and Growing Your Profits is the long awaited companion volume to the classic text Holistic Management Third Edition Crafted under the direction of Savory s

longtime collaborator Jody Butterfield this handbook is the key to developing a comprehensive holistic land plan based on Savory's principles that will help you to restore health to your land and ensure a stable sustainable livelihood from its bounty. This new edition thoroughly revised and streamlined explains the planning procedures described in *Holistic Management* and offers step by step instructions for running a ranch or farm using a holistic management approach. Butterfield and her coauthors describe how to use the handbook in conjunction with the textbook to tailor a management plan for your unique combination of land livestock and finances. Their mantra is plan monitor control and replan. Using a four part approach the authors walk readers through basic concepts and techniques help them put a plan onto paper monitor the results and adjust the details as needed. Appendixes provide updated worksheets checklists planning and monitoring forms and detailed examples of typical scenarios a user might encounter. The handbook includes a comprehensive glossary of terms. Ranchers farmers pastoralists social entrepreneurs government agencies and NGOs working to address global environmental degradation will find this comprehensive handbook an indispensable guide to putting the holistic management concept into action with tangible results they can take to the bank.

Landscape and Culture - Cross-linguistic Perspectives Helen Bromhead, 2018-09-07

The relationship between landscape and culture seen through language is an exciting and increasingly explored area. This ground breaking book contributes to the linguistic examination of both cross cultural variation and unifying elements in geographical categorization. The study focuses on the contrastive lexical semantics of certain landscape words in a number of languages. The aim is to show how geographical vocabulary sheds light on the culturally and historically shaped ways people see and think about the land around them. Notably the study presents landscape concepts as anchored in a human centred perspective based on our cognition vision and experience in places. The Natural Semantic Metalanguage NSM approach allows an analysis of meaning which is both fine grained and transparent. The book is aimed first of all at scholars and students of linguistics. Yet it will also be of interest to researchers in geography environmental studies anthropology cultural studies Australian Studies and Australian Aboriginal Studies because of the book's cultural take.
