Pebdeh Cave dated to 42 000 36 000 years ago suggest its role as a hunting station The unique lithic assemblage blending MP and UP traits provides insights into transitional phases in the Zagros Compared broadly Pebdeh s tools align with IUP definitions displaying elongated points and volumetric blade production Bayesian modeling places Pebdeh within a period of rapid technological evolution 44 000 38 000 years ago This research positions Iran as essential for understanding hominin dispersals and evolution Challenges like limited stratified sites sparse chronological data and geopolitical restrictions underscore the need for interdisciplinary approaches to unlock Iran s archaeological potential This thesis advances knowledge on hominin history in Western Asia revealing migration adaptation and ecological context in early hominin evolution

The Middle and Upper Paleolithic Archeology of the Levant and Beyond Yoshihiro Nishiaki, Takeru Akazawa, 2017-12-06 This volume is a compilation of results from sessions of the Second International Conference on the Replacement of Neanderthals by Modern Humans which took place between November 30 and December 6 2014 in

Hokkaido Japan Similar to the first conference held in 2012 in Tokyo the 2014 conference RNMH2014 aimed to compile the results of the latest multidisciplinary approaches investigating the issues surrounding the replacement of Neanderthals by modern humans The results of the sessions supplemented by off site contributions center on the archeology of the Middle and Upper Paleolithic of the Levant and beyond The first part of this volume presents recent findings from the Levant while the second part focuses on the neighboring regions namely the Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia

The Paleolithic Prehistory of the Zagros-Taurus Deborah Olszewski, 1993-01-29 Situated between Europe Asia and the Levantine corridor to Africa the Zagros Taurus region has enormous potential for the study of human adaptation and population movement during the Pleistocene While archaeological work was done in this area 40 years ago much of it remains unpublished The political situation restricts research by archaeologists This volume includes new data and major syntheses of the Paleolithic prehistory of the region with reports of key sites and industries By filling a major gap in our understanding of this area it represents an essential reference for Near Eastern and Paleolithic specialists University Museum Symposium Series V

The Neolithisation of Iran Hassan Fazeli Nashli, 2013-12-11 The period c 10 000 5000 BC witnessed fundamental changes in the human condition with societies across the Fertile Crescent shifting their alignment from millennia old practices of seasonally mobile hunting and foraging to year round sedentism plant cultivation and animal herding The significant role of Iran in the early stages of this transition was recognised more than half a century ago but has not been to the fore of academic consciousness in recent decades In the meantime investigations into Neolithic transformation have proceeded apace in all other regions of the Fertile Crescent and beyond Here 18 studies attempt to redress that balance in re assessing the role of Iran in the early neolithisation of human societies These studies many of them by Iranian scholars consider patterns of change and or continuity across a variety of topographical landscapes investigate Neolithic settlement patterns the use of caves animal exploitation and environmental indicators and present new insights into some well known and some newly investigated sites The results re affirm the formative role of this region in the transition to sedentary farming

The Epipalaeolithic and Neolithic in the Eastern Fertile Crescent Tobias Richter, Hojjat Darabi, 2023-11-30 This volume brings together the latest results and discussions from research carried out in the eastern Fertile Crescent the so called hilly flanks and adjacent regions as well as providing key historical perspectives on earlier fieldwork in the region The emergence of sedentary food producing societies in southwest Asia ca 10 000 years ago has been a key research focus for archaeologists since the 1930s This book provides a balance to the weight of work undertaken in the western Fertile Crescent namely the Levant and

southern Anatolia This preference has led to a heavy emphasis on these regions in discussions about where when and how the transition from hunting and gathering to plant cultivation and animal domestication occurred Chapters assess the role of the eastern Fertile Crescent as a key region in the Neolithization process in southwest Asia highlighting the key and important contributions people in this region made to the emergence of sedentary farming societies This book is primarily aimed at academics researching the transition from hunting and gathering to agriculture in southwest Asia It will also be of interest to archaeologists working on this transition in other parts of Eurasia
