

Annotated Bibliography for Psychology Class

DUE FRIDAY!! I've a lot of problem with paid assignments being late, please understand my deadline is Friday March 31, 2017 by noon us eastern time. Creating an annotated bibliography of seven to eight peer-reviewed, contemporary articles on the psychology of disaster preparedness. I have found a few they are listed below. Due FRIDAY!! Attached you will find the scenario these sources will be used for in my final presentation. Remember, you are not writing an abstract; you are writing an annotation. The annotation should be a scholarly evaluation of article. Explain why you think this article is important and address any potential ethical concerns with research. In essence, each annotation is like a mini article critique. Citizen Corps (2006). Citizen corps personal behavior change model for disaster preparedness. Classified Catalogue of the Carnegie Library of Pittsburgh Carnegie Library of Pittsburgh,1907 Irreducible Mind
Edward F. Kelly,Emily Williams Kelly,Adam Crabtree,2010 Current mainstream opinion in psychology neuroscience and
philosophy of mind holds that all aspects of human mind and consciousness are generated by physical processes occurring in
brains Views of this sort have dominated recent scholarly publication The present volume however demonstrates empirically
that this reductive materialism is not only incomplete but false The authors systematically marshal evidence for a variety of
psychological phenomena that are extremely difficult and in some cases clearly impossible to account for in conventional
physicalist terms Topics addressed include phenomena of extreme psychophysical influence memory psychological
automatisms and secondary personality near death experiences and allied phenomena genius level creativity and mystical
states of consciousness both spontaneous and drug induced The authors further show that these rogue phenomena are more
readily accommodated by an alternative transmission or filter theory of mind brain relations advanced over a century ago by
a largely forgotten genius F W H Myers and developed further by his friend and colleague William James This theory
moreover ratifies the commonsense conception of human beings as causally effective conscious agents and is fully
compatible with leading edge physics and neuroscience The book should command the attention of all open minded persons
concerned with the still unsolved mysteries of the mind
