Psychological Experiments on the Internet Michael H. Birnbaum, 2000-03-16 Until recently most psychological research was conducted using subject samples in close proximity to the investigators namely university undergraduates In recent years however it has become possible to test people from all over the world by placing experiments on the internet The number of people using the internet for this purpose is likely to become the main venue for subject pools in coming years As such learning about experiments on the internet will be of vital interest to all research psychologists Psychological Experiments on the Internet is divided into three sections Section I discusses the history of web experimentation as well as the advantages

disadvantages and validity of web based psychological research Section II discusses examples of web based experiments on individual differences and cross cultural studies Section III provides readers with the necessary information and techniques for utilizing the internet in their own research designs Innovative topic that will capture the imagination of many readers

Includes examples of actual web based experiments **Web Search: Public Searching of the Web** Amanda

Spink, Bernard J. Jansen, 2006-02-21 This book brings together results from the Web search studies we conducted from 1997 through 2004 The aim of our studies has been twofold to examine how the public at large searches the Web and to highlight trends in public Web searching The eight year period from 1997 to 2004 saw the beginnings and maturity of public Web searching Commercial Web search engines have come and gone or endured through the fall of the dot com companies We saw the rise and in some cases the demise of several high profile publicly available Web search engines The study of the Web search is an exciting and important area of interdisciplinary research Our book provides a valuable insight into the growth and development of human interaction with Web search engines In this book our focus is on the human aspect of the interaction between user and Web search engine We do not investigate the Web search engines themselves or their constantly changing interfaces algorithms and features We focus on exploring the cognitive and user aspects of public Web searching in the aggregate We use a variety of quantitative and qualitative methods within the overall methodology known as transaction log analysis *Student's Companion to the World Wide Web* Jim Millhorn, 1999 The World Wide Web is

expanding at a rapid pace This progressive growth has inevitably created a proliferation of sites and information sources that are posted on this medium Jim Millhorn attempts to examine a small corner of this undergrowth in Student's Companion to the World Wide Web by focusing on outstanding academic and scholarly sites for students in the social sciences and humanities While the Web is an invaluable source of information students do not always know how to extract the information that they seek This guide can offer assistance This book expertly handles common reference sources search engines meta subject guides the humanities and social science disciplines which are arranged in an alphabetized sequence of chapters featuring each individual discipline An innovative and timely answer to the student's quest for information this book opens the broadest purview the Web offers on a specific discipline while simultaneously limiting the number of featured sites

Parapsychology, 5th ed. Harvey J. Irwin,Caroline A. Watt,2007-03-07 This is a thoroughly updated and revised edition of our highly acclaimed university textbook on the science of parapsychology The objective of this book is to provide an introductory survey of parapsychologists efforts to explore the authenticity and bases of anomalous apparently paranormal phenomena It outlines the origins of parapsychological research and critically reviews investigations of extrasensory perception psychokinesis poltergeist phenomena near death and out of body experiences and the evaluation of parapsychology as a scientific enterprise Instructors considering this book for use in a course may request an examination copy here Media and Public Shaming Julian Petley,2013-06-30 The media today and especially the national press are

frequently in conflict with people in the public eye particularly politicians and celebrities over the disclosure of private information and behaviour Historically journalists have argued that naming and shaming serious wrong doing and behaviour

on the part of public officials is justified as being in the public interest. However, when the media spotlight is shone on perfectly legal personal behaviour, family issues and sexual orientation, and when in particular this involves ordinary people, the question arises of whether such matters are really in the public interest in any meaningful sense of the term. In this book, leading academics, commentators and journalists from a variety of different cultures consider the extent to which the media are entitled to reveal details of people's private lives, the laws and regulations which govern such relations, and whether these are still relevant in the age of social media.

Cyberpsychology in the Tech-Fed Virtual World Dr. V. Sharmila, For a wide variety of reasons, colleges and universities have increased their online course offerings. These programs, including both formal degree programs as well as non-credit and leisure learning options, rely on students to engage with their faculty members as well as other learners to maximize their class experiences. Virtual learning, however, can be a difficult space to create community and resulted in the need to explore how community and culture can be constructed in the virtual tech-fed world. The model presented here consists of five key elements that program administrators, instructional designers, and teaching faculty must all take into consideration as they develop their courses.

Positive Nations and Communities Helena Águeda Marujo, Luis Miguel Neto, 2013-08-13 This book approaches the field of positive psychology from a post-modern perspective. It explores the consequences of combining current trends and models with supplementary participatory and transformative methods. The book brings a more collective, qualitative, culturally sensitive and transformative approach to the processes of making sense and implementing the science of positive psychology. It moves beyond the individual level towards a knowledge community and knowledge of the communities. The book is an invitation to more participatory and polyphonic dialogues in the field of positive psychology.

Handbook for Teaching Statistics and Research Methods Mark E. Ware, Charles L. Brewer, 2013-11-26 This volume presents a collection of articles selected from Teaching of Psychology sponsored by APA Division 2.
