Ravens Bones:

Ravens in Winter Bernd Heinrich, 2014-10-07 One of the most interesting discoveries I've seen in animal sociobiology in years E O Wilson Why do ravens generally understood to be solitary creatures share food between each other during winter On the surface there didn't appear to be any biological or evolutionary imperative behind the raven's willingness to share The more Bernd Heinrich observed their habits the more odd the bird's behavior became What started as mere curiosity turned into an impassioned research project and Ravens In Winter the first research of its kind explores the fascinating biological puzzle of the raven's rather unconventional social habits Bernd Heinrich is no ordinary biologist He's the sort who combines formidable scientific rigor with a sense of irony and an unslaked boyish enthusiasm for his subject and who even at his current professorial age seems to do a lot of tree climbing in the line of research David Quammen The New York Times

legend and history is long established and this book describes the bird's fall from grace as a valued scavenger in medieval cities to a persecuted outcast in the modern wilds. The previous wide occurrence of Ravens is reviewed against the relationships between their present distribution status and habitat requirements as both a nesting and a non-breeding resident. The dependence of Ravens on carrion especially sheep within an omnivorous diet is the key to the species ecology and its social behaviour has evolved in close relation to this lifestyle. The flocking and communal roosting of non-breeders are major features of Raven behaviour while their nesting habits emphasise the territorial nature of breeding birds and their adaptation to secure but harsh environments. Raven numbers vary in relation to their food supply, local populations adjusting accordingly although the precise mechanism involved is still obscure. Ravens have a considerable capacity for recolonising old haunts when suitable conditions are restored as well as exploiting new areas where the habitat becomes favourable and there are local success stories to tell. Nationwide however the species position is delicately balanced and depends on both sympathetic land management practices and improving attitudes to Ravens as friends not foe. Worldwide Ravens are one of the most successful of all bird groups occurring over a large part of the northern hemisphere and replaced in some southern and tropical regions by other raven species which exploit the familiar raven niche in their own environments. The discussion of the northern hemisphere species is enlivened by reference to other species where useful. Finally the Raven's age-old reputation for high intelligence is weighed critically against the available evidence. Today Ravens carry a new omen in the modern world as a barometer of goodwill to wildlife. Like those in the Tower of London the continued existence of Ravens in our wild countryside will reveal something about both our current situation and our prospects for the future. The text is brought to life through wonderful illustrations by Chris Rose.

Midnight's Sun Garry Kilworth, 2013-02-25. The wolf Meshiska gave birth to five cubs on the night before full moon. Outside the den a storm was lashing the spruce trees. The sky and the land had become part of each other, a scatterwind night swirling with fragments of black and white. Snow became darkness and darkness snow and any creature lost between the two found a rock or a tree and lay down beside it to wait until the world had formed again. Into this bleak landscape Athaba is born, a young wolf destined for great adventure. Exiled from his pack for breaking its rigid codes of behaviour and showing too much imagination, Athaba becomes a raven wolf, a lonely scavenger living on scraps and his wits. Survival in the icy wastes is hard and dangerous without the comfort and protection of the pack. Injured and stranded far from home, Athaba is forced to strike up an uneasy alliance with his natural enemy, a man. Together but ever wary of each other, the wolf and the solitary hunter start their long walk home across the wilderness. It soon becomes clear that the man must learn to be a wolf if he is to survive in the wolf's world. And Athaba has to use all his imagination to learn new skills and strategies to fend for himself and his new pack member for he discovers that men are frail and often very ignorant.
