Re Imagine Your Business For Breakthrough Results:

Re-imagine Your Business for Breakthrough Results Bruce Abell, 2002 Business successes and failures can almost always be traced to the quality of their fundamental ideas and how they are used in the company Ideas are always fresh when a business starts but when they become stale when they fail to reflect the changes in the world then the business withers and eventually dies This is a practical book about business ideas and complexity Complexity is a new science that shows how interactions among individuals environments chance events and evolution produce the variety and unpredictable outcomes of the world In a sense it is the science of real world messy systems Human organizations and businesses are the messiest systems Traditionally to manage them we've been able to make them less messy and more predictable But today the world no longer cooperates Now cultures markets and technologies change so fast that businesses must be more adaptive than they had to be in more predictable times Human organizations are different from all other adaptive systems because they have at their cores ideas not DNA They are driven by explicit goals and intentions not just survival and reproduction and the organization is the way they pursue the goals Unique ideas give each human complex system a unique identity and those ideas are the glue that holds it together The book includes a set of diagnostics for emergent strategies that enable any organization to assess and improve the quality and use of its ideas These diagnostics along with over 100 examples show how to rethink business purposes to identify sources of confusion or poor performance to consider options that older mindsets have closed off to make decisions and most importantly to alter the perspective of your company for markedly better results
