## **Re Presenting Class Essays In Postmodern Marxism:**

Re/presenting Class J. K. Gibson-Graham, Stephen Resnick, Richard Wolff, 2001-06-15 Twelve theoretical and historical essays emanate from a novel shared poststructuralist conception of political economy *Postmodern Moments in Modern Economics* David F. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today *Routledge Handbook of Marxian Economics* David M. Brennan, David Kristjanson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives One such alternative is provided by Marxian economics In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways This handbook contains thirty seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics Its scope is broad ranging from contributions on familiar Marxist concepts such as value theory the labor process accumulation crisis and socialism to others not always associated with the Marxian canon like feminism ecology international migration and epistemology This breadth of coverage reflects the development of Marxian economic and social theory and encompasses both the history and the frontiers of current scholarship This handbook provides an extensive statement of the current shape and future direction of Marxian economics The *Routledge Handbook of Marxian Economics* is an invaluable resource for students researchers and policy makers seeking guidance in this field It is designed to serve both as a reference work and as a supplementary text for classroom use with applications for courses in economics sociology political science management anthropology development studies philosophy and history **Marxist Class Theory for a Skeptical World** Raju J Das, 2017-01-16 Marxist Theory of

Class for a Skeptical World is a critique of some of the influential radical theories of class and presents an alternative approach to it This book critically discusses Analytical Marxist and Post structuralist Marxist theories of class and offers an alternative approach that is rooted in the ideas of Marx and Engels as well as Lenin and Trotsky It presents a materialist dialectical foundation for class theory and conceptualizes class at the trans historical level and at the level of capitalism It shows that capitalism is an objectively existing articulation of exchange property and value relations between capital and labour at multiple geographical scales and that the state is an arm of class relation It draws out implications of class relations for consciousness and political power of the proletariat *Hindu Fundamentalism and the Spirit of Capitalism in India*

Bhabani Shankar Nayak,2017-10-11 The book makes serious theoretical contribution to the field of political economy in indigenous development public policy sociology and development studies It further establishes the relationship between Hinduisation of indigenous communities and rise of Hindu fundamentalism with a mining led industrial capital while evaluating the impact on the new economic reforms on tribals and their social cultural and religious identities in Orissa

**Opting for the Margins** Jeorg Rieger,2003-09-11 Ideas like the preferential option for the poor arguing that people marginalized by the economy have a claim to special consideration have been among the most significant insights in twentieth century Christian theology Arising out of various theologies of liberation options for the poor and for people at the margins of society have provided major new impulses for biblical studies systematic theology church history ecclesial practice and the academic study of religion Opting for the margins continues to be an important issue at a time when the gap between rich and poor is growing at an alarming rate both in the United States and in many other parts of the world and when other gaps based for example on differences in gender or race continue to linger Recently however options for the margins have been challenged by postmodern shifts in intellectual social political and economic realities that often replace preferential options with other emphases such as general concerns for pluralism otherness and difference Options for the margins are therefore at best reduced to the special interests of certain minority groups or at worst rejected as antiquated and irrelevant for the twenty first century The essays in this volume show how some forms of postmodern thought and theology can mask patterns of oppression and provide an excuse for deafness to voices from the margins The authors writing from a wide variety of national ethnic and theological perspectives seek to revive the preferential option for the poor for the postmodern world showing how options for the margins can engage postmodernity in new ways and break new ground in religious theological and ethical as well as social political and economic thinking The essays connect philosophical and theological arguments to the concrete realities of the postmodern world and to uncover new sources of energy in the life and death struggles of people across the globe *Women without Class* Julie Bettie,2014-09-18 In this ethnographic examination of Mexican American and white girls coming of age in California s Central Valley Julie Bettie turns class theory on its head asking what cultural gestures are involved in the performance of class and how class subjectivity is constructed in

relationship to color ethnicity gender and sexuality A new introduction contextualizes the book for the contemporary moment and situates it within current directions in cultural theory Investigating the cultural politics of how inequalities are both reproduced and challenged Bettie examines the discursive formations that provide a context for the complex identity performances of contemporary girls The book s title refers at once to young working class women who have little cultural capital to enable class mobility to the fact that analyses of class too often remain insufficiently transformed by feminist ethnic and queer studies and to the failure of some feminist theory itself to theorize women as class subjects Women without Class makes a case for analytical and political attention to class but not at the expense of attention to other social formations

**World of the Third and Hegemonic Capital** Anjan Chakrabarti, Anup Dhar, 2023-05-04 This book brings together Marxian philosophy and Lacanian psychoanalysis to argue that the hegemonic form of global capital is founded on the foreclosure of class and world of the third The authors counterpose the world of the third to the mainstream notion of the third world seen as a lacking other in desperate need of aid and development Thus for them the hegemonic form of global capital is engendered through the foregrounding of the poor victim third world and the foreclosure of the non capitalist world of the third Building on what they characterize as an ab original reading of Marxian historical materialism and the Lacanian real the authors seek to conceptualize a counter hegemonic revolutionary subject as a basis for postcapitalist alternatives to the hegemonic form of global capital Contemporary Political Thought Alan Finlayson, 2003-09 Contemporary Political Theory is a foundation textbook in political thought **A World without Capitalism?** Christian W. Chun, 2021-12-15 In this book Christian W Chun examines the ways in which identities discourses and topographies of both capitalist and anti capitalist imaginaries and realities are embodied in the everyday practices of people A World without Capitalism is a sociolinguistic ethnography that explores the heretofore limited research in applied linguistics and sociolinguistics on the discursive and materialized representations and enactments of capitalism Engaging across disciplinary fields including applied linguistics ethnography political economy philosophy and cultural studies Chun investigates in ethnographic detail how capitalism does and does not pervade people s everyday experiences This book aims to further contribute to a much needed understanding of how discourses operate in the co constructions of capitalist and anti capitalist imaginaries and instantiated realities and practices as narrated lived and embodied by people and material artifacts This book is vital reading for students and researchers working in the fields of applied linguistics discourse analysis and cultural studies as well as those interested in understanding capitalism and questioning how to live beyond it A Postcapitalist Politics J. K. Gibson-Graham, Is there life after capitalism In this creatively argued follow up to their book The End of Capitalism As We Knew It J K Gibson Graham offer already existing alternatives to a global capitalist order and outline strategies for building alternative economies A Postcapitalist Politics reveals a prolific landscape of economic diversity one that is not exclusively or predominantly capitalist and examines the challenges and successes of alternative economic interventions Gibson Graham

bring together political economy feminist poststructuralism and economic activism to foreground the ethical decisions as opposed to structural imperatives that construct economic development pathways Marshalling empirical evidence from local economic projects and action research in the United States Australia and Asia they produce a distinctive political imaginary with three intersecting moments a politics of language of the subject and of collective action In the face of an almost universal sense of surrender to capitalist globalization this book demonstrates that postcapitalist subjects economies and communities can be fostered The authors describe a politics of possibility that can build different economies in place and over space They urge us to confront the forces that stand in the way of economic experimentation and to explore different ways of moving from theory to action J K Gibson Graham is the pen name of Katherine Gibson and Julie Graham feminist economic geographers who work respectively at the Australian National University in Canberra and the University of Massachusetts Amherst

**Transition and Development in India** Anjan Chakrabarti, Stephen Cullenberg, 2013-12-16 According to Nehru the transition from a backward agricultural society to a modern industrialized society was the only road for India to progress So for the past few decades India has focused its transitional development around movement away from a state controlled economy toward that of a free market economy Transition and Development in India challenges the current basis of this theory of development laying the groundwork for an entirely new Marxist approach to transition that should apply not just to India but to all developing nations

**Ontology and Economics** Edward Fullbrook, 2008-10-27 Tony Lawson has become a major figure of intellectual controversy on the back of juxtaposing two relatively simple and seemingly innocuous ideas He has argued firstly that success in science depends on finding and using methods including modes of reasoning appropriate to the nature of the phenomena being studied and also that there are important differences between the nature of the objects of study of natural sciences and those of social science This original book brings together some of the world's leading critics of economics orthodoxy to debate Lawson's contribution to the economics literature The debate centres on ontology which means enquiry into the nature of what exists and in this collection scholars such as Bruce Caldwell John B Davis and Geoffrey M Hodgson present their thoughtful criticisms of Lawson's work Lawson himself presents his reactions to these criticisms with full chapter replies to each of the scholars included This book is particularly useful for students and researchers concerned primarily with methodology and future development of economics It is also relevant to the concerns of philosophers of science and to all social scientists interested in methodological issues
