Reaching Home Pacific Salmon Pacific People:

Upstream Committee on Protection and Management of Pacific Northwest Anadromous Salmonids, Commission on Life Sciences, Division on Earth and Life Studies, National Research Council, 1996-07-31 The importance of salmon to the Pacific Northwest economic recreational symbolic is enormous Generations ago salmon were abundant from central California through Idaho Oregon and Washington to British Columbia and Alaska Now they have disappeared from about 40 percent of their historical range The decline in salmon numbers has been lamented for at least 100 years but the issue has become more widespread and acute recently The Endangered Species Act has been invoked federal laws have been passed and lawsuits have been filed More than 1 billion has been spent to improve salmon runs and still the populations decline In this new volume a committee with diverse expertise explores the complications and conflicts surrounding the salmon problem starting with available data on the status of salmon populations and an illustrative case study from Washington state s Willapa Bay The book offers specific recommendations for salmon rehabilitation that take into account the key role played by genetic variability in salmon survival and the urgent need for habitat protection and management of fishing The committee presents a comprehensive discussion of the salmon problem with a wealth of informative graphs and charts and the right amount of historical perspective to clarify today s issues including Salmon biology and geography their life s journey from fresh waters to the sea and back again to spawn and their interaction with ecosystems along the way The impacts of human activities grazing damming timber agriculture and population and economic growth Included is a case study of Washington state s Elwha River dam removal project Values attitudes and the conflicting desires for short term economic gain and long term environmental health The committee traces the roots of the salmon problem to the extractive philosophy characterizing management of land and water in the West The impact of hatcheries which were introduced to build fish stocks but which have actually harmed the genetic variability that wild stocks need to survive This book offers something for everyone with an interest in the salmon issue policymakers and regulators in the United States and Canada environmental scientists environmental advocates natural resource managers commercial tribal and recreational fishers and concerned residents of the Pacific Northwest **Humanities** ,1996 **Oceans** Jon Bowermaster, 2010-04-13 This unique tie in to the major motion picture Oceans presented by Disney National Geographic explores the health of the oceans and reveals what people can do to improve the health of our seas **Humanities** National Endowment for the Humanities, 1995 **Trekking the Shore** Nuno F. Bicho, Jonathan A. Haws, Loren G. Davis, 2011-05-19 Human settlement has often centered around coastal areas and waterways Until recently however archaeologists believed that marine economies did not develop until the end of the Pleistocene when the archaeological record begins to have evidence of marine life as part of the human diet This has long been interpreted as a postglacial adaptation due to the rise in sea level and subsequent decrease in terrestrial resources Coastal resources particularly mollusks were viewed as fallback resources which people resorted to only when terrestrial

resources were scarce included only as part of a more complex diet Recent research has significantly altered this understanding known as the Broad Spectrum Revolution BSR model The contributions to this volume revise the BSR model with evidence that coastal resources were an important part of human economies and subsistence much earlier than previously thought and even the main focus of diets for some Pleistocene and early Holocene hunter gatherer societies With evidence from North and South America Europe Africa Asia and Australia this volume comprehensively lends a new understanding to coastal settlement from the Middle Paleolithic to the Middle Holocene *Many Wests* David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West's regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West's different places *Many Wests* presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions **Making Salmon** Joseph E. Taylor, 1999 Making Salmon is of critical importance for everyone interested in understanding the origins of and finding a solution for the current environmental crisis in the Pacific Northwest **BOOK JACKET** Fresh Susanne Freidberg, 2010-10-01 That rosy tomato perched on your plate in December is at the end of a great journey not just over land and sea but across a vast and varied cultural history This is the territory charted in *Fresh* Opening the door of an ordinary refrigerator it tells the curious story of the quality stored inside freshness We want fresh foods to keep us healthy and to connect us to nature and community We also want them convenient pretty and cheap *Fresh* traces our paradoxical hunger to its roots in the rise of mass consumption when freshness seemed both proof of and an antidote to progress Susanne

Freidberg begins with refrigeration a trend as controversial at the turn of the twentieth century as genetically modified crops are today Consumers blamed cold storage for high prices and rotten eggs but ultimately aggressive marketing advances in technology and new ideas about health and hygiene overcame this distrust Freidberg then takes six common foods from the refrigerator to discover what each has to say about our notions of freshness Fruit for instance shows why beauty trumped taste at a surprisingly early date In the case of fish we see how the value of a living quivering catch has ironically hastened the death of species And of all supermarket staples why has milk remained the most stubbornly local Local livelihoods global trade the politics of taste community and environmental change all enter into this lively surprising yet sobering tale about the nature and cost of our hunger for freshness

Mountain in the Clouds Bruce Brown,1995 As the struggle to protect Northwest salmon runs and the urgency of the fight against environmental deterioration escalates *Mountain in the Clouds* remains an important and illuminating story as timely now as when it was first written The 1995 edition includes a selection of historical photographs

Recovering a Lost River Steven Hawley,2012-03-06 In the Pacific Northwest the Snake River and its wilderness tributaries were as recently as a half century ago some of the world s greatest salmon rivers Now due to four federal dams the salmon population has dropped close to extinction Steven Hawley journalist and self proclaimed river rat argues that the best hope for the Snake River lies in dam removal a solution that pits the power companies and federal authorities against a collection of Indian tribes farmers fishermen and river recreationists The river s health as he demonstrates is closely connected to local economies freshwater rights and energy independence Challenging the notion of hydropower as a cheap green source of energy Hawley depicts the efforts being made on behalf of salmon by a growing army of river warriors Their message persistent but disarmingly simple is that all salmon need is water in their rivers and a clear way home

Beyond the Moon Crater Myth Katherine Johnson Ringsmuth,2007

Tales from the Edge Larry Kaniut,2013-08-06 From the Klondike to the Bering Sea from Alaska s bounty that brought fortunes to some to its wilderness that claimed the lives of others *Tales from the Edge* explores the myth beauty and peril of the arctic landscape Editor Larry Kaniut brings together some of the world s best outdoor adventure writers to celebrate the land and the people who have measured themselves against it *Tales from the Edge* is a celebration of Alaska featuring such notable contributors as Peter Jenkins Spike Walker Jay Hammond Nick Jans Dana Stabenow Larry Kaniut and more *Tales from the Edge* will stir the soul and imagination of every armchair adventurer
