*Reaching for Heaven on Earth* Robert H. Nelson, 1993-07-30 this is the most profound book on the boundary of theology and economics in the past couple of decades It has a depth of perspective a scope of scholarship and a discernment that is rare in this field **CHRISTIAN CENTURY** *Reaching for Heaven on Earth* Robert Henry Nelson, 1991 *Economics as Religion* Robert Henry Nelson, 2001 In this study Robert H Nelson explores the genesis the prophets the prophecies and the tenets of what he sees as a religion of economics that has come into full blossom in latter day America Nelson does not see theology as a bad word and his examination of the theology underlying Samuelsonian and Chicagoan economics is not a put down It is a way of seeing the rhetoric of fundamental belief what has been called vision **The Oxford Handbook of Christianity and Economics** Paul Oslington, 2014 The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines drawing on contemporary theory and empirical findings in both fields with roots in older discourses This landmark volume surveys the field and advances the discussion It deploys historical economic and theological analysis to search for answers *Economics as Religion* Robert H. Nelson, 2015-06-13 Robert Nelson's *Reaching for Heaven on Earth Economics as Religion* and *The New Holy Wars Economic Religion Versus Environmental Religion in Contemporary America* read almost like a trilogy exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as Protestant and Roman and on into modern economic forms such as Marxism and capitalism as well as environmentalism Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times This edition of *Economics as Religion* situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology economics and other social sciences **Cultural Dynamics of Climate Change and the Environment in Northern America**, 2015-07-28 Global warming interacts in multiple ways with ecological and social systems in Northern America While the US and Canada belong to the world's largest per capita emitters of greenhouse gases the Arctic north of the continent as well as the Deep South are already affected by a changing climate In *Cultural Dynamics of Climate Change and the Environment in Northern America* academics from various fields such as anthropology art history educational studies cultural studies environmental science history political science and sociology explore society nature interactions in culturally as well as ecologically one of the most diverse regions of the world Contributors include Omer Aijazi Roland Benedikter Maxwell T Boykoff Eugene Cordero Martin David Demetrius Eudell Michael K Goodman Frederic Hanusch Naotaka Hayashi Jürgen Heinrichs Grit Martinez Antonia Mehnert Angela G Mertig Michael J Paolisso Eleonora Rohland Karin Schürmann Bernd Sommer Kenneth M Sylvester Anne Marie Todd Richard Tucker and Sam White **The Routledge Handbook of Economic Theology** Stefan Schwarzkopf, 2020-03-24 This Handbook introduces and

systematically explores the thesis that the economy economic practices and economic thought are of a profoundly theological nature. Containing more than 40 chapters, this Handbook provides a state of the art reference work that offers students, researchers, and policymakers an introduction to current scholarship, significant debates, and emerging research themes in the study of the theological significance of economic concepts and the religious underpinnings of economic practices in a world that is increasingly dominated by financiers, managers, forecasters, market makers, and entrepreneurs. This Handbook brings together scholars from different parts of the world representing various disciplines and intellectual traditions. It covers the development of economic thought and practices from antiquity to neoliberalism and it provides insight into the economic theological teachings of major religious movements. The list of contributors combines well-established scholars and younger academic talents. The chapters in this Handbook cover a wide array of conceptual, historical, theoretical, and methodological issues and perspectives such as the economic meaning of theological concepts (e.g., providence and faith), the theological underpinnings of economic concepts (e.g., credit and property), the religious significance of socio-economic practices in various organizational fields (e.g., accounting and work), and finally the genealogy of the theological-economic interface in Judaism, Christianity, Islam, and in the discipline of economics itself (e.g., Marx, Keynes, and Hayek). The Routledge Handbook of Economic Theology is organized in four parts: Theological concepts and their economic meaning; Economic concepts and their theological anchoring; Society, management, and organization; and Genealogy of economic theology.

*The Bourgeois Virtues*  
Deirdre Nansen, 2024-05-31. First in The Bourgeois Era trilogy. A significant contribution to the study of the moral basis of economic life and thought, her vision is original. Jonathan S. Feinstein, *Journal of Economic Literature*. For a century and a half, the artists and intellectuals of Europe have scorned the bourgeoisie. And for a millennium and a half, the philosophers and theologians of Europe have scorned the marketplace. The bourgeois life, capitalism, Menckens booboisie, and David Brooks's bobos all have been and still are framed as being responsible for everything from financial to moral poverty, world wars, and spiritual desuetude. Countering these centuries of assumptions and unexamined thinking is Deirdre McCloskey's *The Bourgeois Virtues*, a magnum opus that offers a radical view: capitalism is good for us. McCloskey's sweeping, charming, and even humorous survey of ethical thought and economic realities from Plato to Barbara Ehrenreich overturns every assumption we have about being bourgeois. Can you be virtuous and bourgeois? Do markets improve ethics? Has capitalism made us better as well as richer? Yes, yes, and yes, argues McCloskey, who takes on centuries of capitalism's critics with her erudition and sheer scope of knowledge. Applying a new tradition of virtue ethics to our lives in modern economies, she affirms American capitalism without ignoring its faults and celebrates the bourgeois lives we actually live. High Noon. Kant, Bill Murray, the modern novel, van Gogh, and of course economics and the economy all come into play in a book that can only be described as a monumental project and a life's work. *The Bourgeois Virtues* is nothing less than a dazzling reinterpretation of Western intellectual history, a dead serious reply to the critics of capitalism, and a surprising page-turner. God and the

Financial Crisis Gary D. Badcock, 2016-02-08 A fundamental belief in personal liberty and in the ability of free markets to realise the good lies at the heart of the neoliberal economic orthodoxy that has now shaped public policy for a generation. Confidence in orthodox economics has however been badly shaken by the financial crisis of 2008 and in the years following by the effects of the Great Recession. The era of casino banking was not only an era of de-industrialisation and under-employment but also of iniquitous tax avoidance schemes and of grotesquely inflated levels of social inequality. Such factors we now realise have reduced the life prospects of millions of our fellow citizens. This interdisciplinary volume of essays with wide-ranging contributions by theologians and social scientists explores the theological, economic and moral implications of these developments. Its central claim is that neoliberalism's failure to appreciate the limitations of its fiduciary commitments contributed massively to the economic crisis. A more honest appraisal of the relation between the language of belief and the sphere of economic behaviour is therefore required. This must also result in appropriate policy changes to harness the power of the economy to serve a more generous vision of the human good.

**What Happens to People in a Competitive Society** Svein Olaf Thorbjørnsen, 2020-01-24 In this book author Svein Olaf Thorbjørnsen probes the question: What is at stake for human beings in a society dominated by competition, particularly economic competition? Is competition endemic to human nature? Does it preserve the dignity and intrinsic value of the human being? Does it secure better living conditions? In a way, the answer to these queries is a simple yes. It can allow for superior satisfaction of fundamental needs: legitimate self-love and self-realization and encourage positive feelings upon mastering a skill. At the same time, however, competition can also contribute to a strong materialistic self-interest and support classicism, social ranking and elitism. Other human beings become only means to a personal success, thus jeopardizing fellowship and collaboration. In a hyper-competitive environment, some of the same positive human values mentioned above—self-love, self-realisation, individuality and freedom—can be viewed to pose a threat to the realisation of one's potential and to one's true humanity. These competing, contradictory aspects of competition are presented and discussed from perspectives across varying disciplines: from social anthropology and economics to history, ethics, philosophy and theology.

**God Very Probably** Robert H. Nelson, 2016-04-28 In recent years a number of works have appeared with important implications for the age-old question of the existence of a god. These writings, many of which are not by theologians, strengthen the rational case for the existence of a god, even as this god may not be exactly the Christian God of history. This book brings together for the first time such recent, diverse contributions from fields such as physics, the philosophy of human consciousness, evolutionary biology, mathematics, the history of religion and theology. Based on such new materials as well as older ones from the twentieth century, it develops five rational arguments that point strongly to the very probable existence of a god. They do not make use of the scientific method, which is inapplicable to the question of a god. Rather, they are in an older tradition of rational argument dating back at least to the ancient Greeks. For those who are already believers, the book will offer additional rational reasons that may strengthen their belief. Those who do

not believe in the existence of a god at present will encounter new rational arguments that may cause them to reconsider their opinion      **Technologies and Strategies for Addressing Global Warming** United States. Congress. House.

Committee on Science, Space, and Technology,1992      *Stories Economists Tell* John P. Tiemstra,2012-12-19 A Christian approach to economic analysis requires that humans be thought of not as maximizing their own private economic welfare but rather as making moral choices with their resources Professor Tiemstra lays out the methodology of this approach in the first section of this book He then applies it to real economic problems including poverty and economic justice environmental sustainability and globalization      *Politics, Religion and Classical Political Economy in Britain* J. Lipkes,1998-12-09 The book examines tensions in classical political economy by describing and analysing changes in J S Mill s economic and religious thought late in life and assesses the influence of Mill s disciplines on these shifts Mill s followers surprisingly were divided into two opposing camps Influenced by the heterodox group opponents of Ricardian political economy and by pressing political concerns Mill modified his principles in ways he would not earlier have countenanced This resulted in inconsistencies and evasions in his final essays which greatly upset the orthodox contingent      **Adam Smith as**

**Theologian** Paul Oslington,2011-02-25 Adam Smith wrote in a Scotland where Calvinism Continental natural law theory Stoic philosophy and the Newtonian tradition of scientific natural theology were key to the intellectual lives of his contemporaries But what impact did these ideas have on Smith s system What was Smith s understanding of nature divine providence and theodicy How was the new discourse of political economy positioned in relation to moral philosophy and theology In this volume a team of distinguished contributors consider Smith s work in relation to its Scottish Enlightenment religious background and offer stimulating theological interpretations of his account of fallible human nature his providential account of markets and his invisible hand metaphor Adam Smith as Theologian it is a pioneering study which will alter our view of Smith and open up new lines of thinking about contemporary economics      **Development Betrayed** Richard B

Norgaard,2006-05-18 Modernity promised control over nature through science material abundance through technology and effective government through rational social organization Instead of leading to this promised land it has brought us to the brink of environmental and cultural disaster Why has there been this gap between modernity s aspirations and its achievements Development Betrayed offers a powerful answer to this question Development with its unshakeable commitment to the idea of progress is rooted in modernism and has been betrayed by each of its major tenets Attempts to control nature have led to the brink of environmental catastrophe Western technologies have proved inappropriate for the needs of the South and governments are unable to respond effectively to the crises that have resulted Offering a thorough and lively critiques of the ideas behind development Richard Norgaard also offers an alternative co evolutionary paradigm in which development is portrayed as a co evolution between cultural and ecological systems Rather than a future with all peoples merging to one best way of knowing and doing things he envisions a future of a patchwork quilt of cultures with real

possibilities for harmony      God and Money Nimi Wariboko, 2008-01-01 Making a case for a denationalized global currency as an alternative to the dollar euro and yen as the world vehicular and reserve currencies God and Money explores the significance and theological ethical implications of money as a social relation in the light of the dynamic relations of the triune God Wariboko deftly analyzes the dynamics at work in the global monetary system and argues that the monarchical currency structure of the dollar euro and yen may be moving toward a trinitarian structure of a democratic world currency

On the Legacy of Lutheranism in Finland Kaius Sinnemäki, Anneli Portman, Jouni Tilli, Robert H. Nelson, 2019-12-10 This volume analyses the societal legacy of Lutheranism in Finland in broad terms It contributes to the recent renewed interest in the history of religion in Finland and the Nordic countries by bringing together researchers in history political science economics social psychology education linguistics media studies and theology to examine the mutual relationship between Lutheranism and society in Finland The two main foci are i the historical effects of the Reformation and its aftermath on societal structures and on national identity values linguistic culture education and the economy and ii the adaptation of the church and its theology to changes in the geo political and sociocultural context Important sub themes include nationalism and religion the secularization and institutionalization of traditional values multiple Protestant ethics and long continuities in history Overall the book argues that large changes in societies cannot be explained via secular factors alone such as economic development or urbanization but that factors pertaining to religion provide substantial explanatory power for understanding societal change and the resulting societal structures      *The Child in American Evangelicalism and the Problem of Affluence* David A. Sims, 2009-06-01 This work presents an evangelical theology of the child nurtured in the context of American evangelicalism and affluence It employs an eclectic theological critical method to produce a theological anthropology of the affluent American evangelical child AAEC through interdisciplinary evangelical engagement of American history sociology and economics Sims articulates how affluence constitutes a significant impediment to evangelical nurture of the AAEC in the discipline and instruction of the Lord Thus the problem he addresses is nurture in evangelical affluence conceived as a theological anthropological problem Nurture in the cultural matrices of the evangelical affluence generated by technological consumer capitalism in the U S impedes spiritual and moral formation of the AAEC for discipleship in the way of the cross This impediment risks disciplinary formation of the AAEC for capitalist culture cultivates delusional belief that life consists in an abundance of possessions and hinders the practice of evangelical liberation of the poor on humanity's underside The result is the AAEC's spiritual moral lack in late modernity Chapter 1 introduces the problem of the AAEC Chapters 2 and 3 provide a diachronic lens for the theological anthropology of the AAEC through critical assessment of the theological anthropologies of the child in Jonathan Edwards Horace Bushnell and Lawrence Richards Chapters 4 and 5 constitute the synchronic perspective of the AAEC Chapter 4 presents an evangelical sociology of the AAEC drawing upon William Corsaro's theory of interpretive reproductions and chapter 5 constructs an evangelical theology of the AAEC through

critical interaction with John Schneider's moral theology of affluence Chapter 6 Whither the AAEC concludes with a recapitulation of the work and a forecast of possible futures for the AAEC in the twenty first century     **Dialectical Democracy through Christian Thought** D. Brockman, 2016-04-29 Dialectical Democracy through Christian Thought offers an accessible yet theologically groundbreaking intervention into the battle over the role of government in the market This book shows that the fight over policy involves a fundamental disagreement about who we are as human beings independent individuals or essentially social creatures
