Read Me Software Art Cultures 2004 Edition:

Revisiting Normativity with Deleuze Rosi Braidotti,Patricia Pisters,2013-03-14 This volume assembles some of the most distinguished scholars in the field of Deleuze studies in order to provide both an accessible introduction to key concepts in Deleuze's thought and to test them in view of the issue of normativity. This includes not only the law but also the question of norms and values in the broader ethical political and methodological sense. The volume argues that Deleuze's philosophy rejects the unitary vision of the subject as a self-regulating rationalist entity and replaces it with a process-oriented relational vision of the subject. But what can we do exactly with this alternative nomadic vision? What modes of normativity are available outside the parameters of liberal self-reflexive individualism on the one hand and the communitarian model on the other? This interdisciplinary volume explores these issues in three directions that mirror Deleuze and Guattari's defense of the parallelism between philosophy, science and the arts. The volume therefore covers socio-political and legal theory, the epistemological critique of scientific discourse and the cultural, artistic and aesthetic interventions emerging from Deleuze's philosophy.

The Metainterface Christian Ulrik Andersen,Soren Bro Pold,2023-10-31 How the interface has moved from the PC into cultural platforms as seen in a series of works of net art, software art and electronic literature. The computer interface is both omnipresent and invisible at once, embedded in everyday objects and characterized by hidden exchanges of information between objects. The interface has moved from office into culture with devices, apps, the cloud and data streams as new cultural platforms. In "The Metainterface", Christian Ulrik Andersen and Søren Bro Pold examine the relationships between art and interfaces, tracing the interface's disruption of everyday cultural practices. They present a new interface paradigm of cloud services, smartphones and data capture, and examine how particular art forms including net art, software art and electronic literature seek to reflect and explore this paradigm. Andersen and Pold argue that despite attempts to make the interface disappear into smooth access and smart interaction, it gradually resurfaces. There is a metainterface to the displaced interface. Art can help us see this; the interface can be an important outlet for aesthetic critique. Andersen and Pold describe the semantic capitalism of a metainterface industry that captures user behavior. The metainterface industry's disruption of everyday urban life changes how the city is read, inhabited and organized. The ways that the material displacement of the cloud affects the experience of the interface and the potential of designing with an awareness of the language and grammar of interfaces.
