Ancestor Worship and the Elite in Late Iron Age Scandinavia Triin Laidoner, 2020-01-14 Ancestor worship is often assumed by contemporary European audiences to be an outdated and primitive tradition with little relevance to our societies past and present This book questions that assumption and seeks to determine whether ancestor ideology was an integral part of religion in Viking Age and early medieval Scandinavia The concept is examined from a broad socio anthropological perspective which is used to structure a set of case studies which analyse the cults of specific individuals in Old Norse literature The situation of gods in Old Norse religion has been almost exclusively addressed in isolation from these socio anthropological perspectives The public gravemound cults of deceased rulers are discussed conventionally as cases of sacral kingship and more recently religious ruler ideology both are seen as having divine associations in Old Norse scholarship Building on the anthropological framework this study introduces the concept of superior ancestors employed in social anthropology to denote a form of political ancestor worship used to regulate social structure deliberately It suggests that Old Norse ruler ideology was based on conventional and widely recognised religious practices revolving around kinship and ancestors and that the gods were perceived as human ancestors belonging to elite families **Religious Responses to HIV and AIDS** Miguel Munoz-Laboy, Jonathan Garcia, Joyce Moon-Howard, Patrick Wilson, Richard Parker, 2016-01-08 Religious institutions shaped the ways individuals communities and societies responded to HIV and AIDS since the 1980s This book draws on research studies ranging in context from sites in sub Saharan Africa to New York City in the USA to examine the

complexity of responding to the epidemic both globally and locally Religious systems of meaning practices and institutions have been central to the articulation of projects for social change and inversely sometime strongly resistant to change in diverse institutional responses to HIV and AIDS Sometimes religious movements provided powerful forces for community mobilisation in response to the social vulnerability economic exclusion and health problems associated with HIV In other contexts religious cultures have reproduced values and practices that have seriously impeded more effective approaches to mitigate the epidemic By highlighting these complex and sometimes contradictory social processes this book provides new insights about the potential for religious institutions to address the HIV epidemic more effectively More broadly it shows how research can be done on religion in the area of global public health showing how civil society organizations shape opportunities for health promotion a crucial and new area of global public health research This book was originally published as a special issue of Global Public Health **Birth as an American Rite of Passage** Robbie E. Davis-Floyd, 2004-03-15

Why do so many American women allow themselves to become enmeshed in the standardized routines of technocratic childbirth routines that can be insensitive unnecessary and even unhealthy Anthropologist Robbie Davis Floyd first addressed these questions in the 1992 edition Her new preface to this 2003 edition of a book that has been read applauded and loved by women all over the world makes it clear that the issues surrounding childbirth remain as controversial as ever *Bellona*

Island Beliefs and Rituals Torben Monberg, 1991-05-01 Monberg's account of the Bellonese religion is descriptive ethnography at its best It is rich in detail and the organization of the material gives a coherent view of Bellonese culture and society While not a comparative study in itself it provides an abundance of data that will be invaluable for other works that are more comparative in nature from the Editor's Note Pacific Islands Monograph Series No 9 Center for Pacific Islands Studies UH **Time and the Field** Steffen Dalsgaard, Morten Nielsen, 2015-11-01 In recent years ethnographic fieldwork

has been subjected to analytical scrutiny in anthropology Ethnography remains anchored in tropes of spatiality with the association between field and fieldworker characterized by distances in space With updates on the discussion of contemporary requirements to ethnographic research practice Time and the Field rethinks the notion of the field in terms of time rather than space Such an approach not only implies a particular attention to the methodology of studying local social and ontological imaginaries of time but furthermore destabilizes the relationship between fieldworker and fieldsite allowing it to emerge as a dynamic and ever shifting constellation
