The Story of the Dinosaurs in 25 Discoveries Donald R. Prothero, 2019-07-16 Today any kid can rattle off the names of dozens of dinosaurs But it took centuries of scientific effort and a lot of luck to discover and establish the diversity of dinosaur species we now know How did we learn that Triceratops had three horns Why don't many paleontologists consider Brontosaurus a valid species What convinced scientists that modern birds are relatives of ancient Velociraptor In *The Story of the Dinosaurs in 25 Discoveries* Donald R Prothero tells the fascinating stories behind the most important fossil finds and the intrepid researchers who unearthed them In twenty five vivid vignettes he weaves together dramatic tales of dinosaur discoveries with what modern science now knows about the species to which they belong Prothero takes us from eighteenth century sightings of colossal bones taken for biblical giants through recent discoveries of enormous predators even larger than Tyrannosaurus He recounts the escapades of the larger than life personalities who made modern paleontology including scientific rivalries like the nineteenth century Bone Wars Prothero also details how to draw the boundaries between species and explores debates such as whether dinosaurs had feathers explaining the findings that settled them or keep them going Throughout he offers a clear and rigorous look at what paleontologists consider sound interpretation of evidence An essential read for any dinosaur lover this book teaches us to see an ancient world ruled by giant majestic creatures anew

The Bonehunters' Revenge David Rains Wallace, 1999 Wallace explores in exciting detail the rivalry between the paleontologists Edward Drinker Cope and Onthniel Charles Marsh 19th century America's major scientific feud Cope and Marsh independently discovered hundreds of dinosaur fossils on the high plains when the Indian wars were in full swing

Prehistoric Monsters Allen A. Debus, 2014-11-21 Over centuries discoveries of fossil bones spawned legends of monsters such as giants and dragons As the field of earth sciences matured during the 19th century early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus Triceratops and Stegosaurus This historical study examines how these genuine beasts morphed in the public imagination into mythical powerful engines of destruction and harbingers of cataclysm taking their place in popular culture film and literature as symbols of lost worlds where time stands still

American Dinosaur Abroad Ilja Nieuwland, 2019-05-15 In early July 1899 an excavation team of paleontologists sponsored by Andrew Carnegie discovered the fossil remains in Wyoming of what was then the longest and largest dinosaur on record Named after its benefactor the *Diplodocus carnegii* or Dippy as it's known today was shipped to Pittsburgh and later mounted and unveiled at the Carnegie Museum of Natural History in 1907 Carnegie's pursuit of dinosaurs in the American West and the ensuing dinomania of the late nineteenth century coincided with his broader political ambitions to establish a lasting world peace and avoid further international conflict An ardent

philanthropist and patriot Carnegie gifted his first plaster cast of Dippy to the British Museum at the behest of King Edward VII in 1902 an impulsive diplomatic gesture that would result in the donation of at least seven reproductions to museums across Europe and Latin America over the next decade in England Germany France Austria Italy Russia Argentina and Spain In this largely untold history Ilja Nieuwland explores the influence of Andrew Carnegie's prized skeleton on European culture through the dissemination reception and agency of his plaster casts revealing much about the social political cultural and scientific context of the early twentieth century *Flying Dinosaurs* John Pickrell, 2020-07-15 It will be difficult for any reader to think about dinosaurs or birds in the same ways they had before Publishers Weekly The discovery of stunning feathered dinosaur fossils coming out of China in the twentieth century suggests that these creatures were much more bird like than paleontologists previously imagined Further evidence bones genetics eggs behavior and more has shown a seamless transition from fleet footed carnivores to the ancestors of modern birds Mixing colorful portraits with news on the latest fossil findings and interviews with leading paleontologists in the United States China Europe and Australia John Pickrell explains and details dinosaurs development of flight This special capacity introduced a whole new range of abilities for the animals and helped them survive a mass extinction when thousands of other dinosaur species that once populated Earth did not Pickrell also turns his journalistic eye toward the stories behind the latest discoveries investigating the role of the Chinese black market in trading fossils the controversies among various dinosaur hunters the interference of national governments intent on protecting scientific information and the race to publish findings first that make this research such a dynamic area of science Fascinating *Origins* Frank H. Debus,2016-06-21 From their discovery in the 19th century to the dawn of the Nuclear Age dinosaurs were seen in popular culture as ambassadors of the geological past and as icons of the life through time narrative of evolution They took on a more foreboding character during the Cold War serving as a warning to mankind with the advent of the hydrogen bomb As fears of human extinction escalated during the ecological movement of the 1970s dinosaurs communicated their metaphorical message of extinction urging us from our destructive path Using an eclectic variety of examples this book outlines the three fold evolution of dinosaurs and other prehistoric monsters in pop culture from their poorly understood beginnings to the 21st century
