Reviews of Environmental Contamination and Toxicology Volume 249 Pim de Voogt, 2019-06-19 Reviews of Environmental Contamination and Toxicology attempts to provide concise critical reviews of timely advances philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics in any segment of the environment as well as toxicological implications

Reviews of Environmental Contamination and Toxicology Volume 225 David M. Whitacre, 2013-03-15 Reviews of Environmental Contamination and Toxicology attempts to provide concise critical reviews of timely advances philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics in any segment of the environment as well as toxicological implications

Spatial Modeling of Environmental Pollution and Ecological Risk Pravat Kumar Shit, Dilip Kumar Datta, Biswajit Bera, Aznarul Islam, Partha Pratim Adhikary, 2023-12-01 Spatial Modeling of Environmental Pollution and Ecological Risk provides valuable information and insights for researchers students and professionals in geography hydrology sedimentology soil science agriculture engineering and GIS as they face increasingly complex challenges around development strategies for a sustainable society Written by the world's leading researchers in their field each article will begin with a short introductory essay that includes an overview of the sections papers Individual chapters focus on the core themes of research and knowledge and some topics that have received lesser attention Each chapter will review the current understanding of knowledge regarding the present study and scope and consider where future efforts should be directed Discusses issues at the forefront of present research in environmental science bioscience ecology pedogeomorphology landscape geoscience forestry hydrology and GIS Explores state of art techniques based on methodological and modeling in modern Deep learning and Machine learning geospatial techniques through case studies Describes novel control strategies remediation and eco restoration and conservation techniques for sustainable development

Surfactants and Cosolvents for NAPL Remediation A Technology Practices Manual Donald F. Lowe, Carroll L. Oubre, C. H. Ward, 1999-03-26 A 19 3 million Department of Defense grant to Rice University funds the Advanced Applied Technology Demonstration Facility AATDF One of the project goals is the development of reduction strategies for nonaqueous phase liquids NAPLs in the subsurface Surfactants and Cosolvents for NAPL Remediation records the results of AATDF research The manual is a guide to the practical application of surfactants cosolvent for in situ remediation It is targeted to decision makers and anyone concerned with the design or implementation of these technologies The book discusses the situational viability of surfactants cosolvents the possible results design and operation It includes case studies step by step guidance and project cost work sheets The successful results of the AATDF research as documented Surfactants and Cosolvents for NAPL Remediation are an invaluable contribution to the future of subsurface remediation Without source NAPL reduction the alternative is decades of plume management through pump and treat

Metals,

Fertility, and Reproductive Toxicity Mari S. Golub, 2005-11-10 Environmental endocrine disruptors have been at the heart of discussions about chemicals and their effects on fertility but the focus has been on organic compounds and the role of metals has been largely overlooked until now Taking an organ system based approach Metals Fertility and Reproductive Toxicity examines the effects of metals found in the everyday environment on fertility rates in humans and animal populations This volume summarizes and evaluates the literature in the area of metal effects on fertility and reproduction in humans laboratory animals and wildlife International experts have contributed chapters that explore how the ovary testes uterine system and neuroendocrine system among others respond to metal exposure Reviewing both current knowledge and cutting edge data the chapters focus on either a particular metal or a particular population A massive amount of data on this subject has been generated summarized and reviewed over the years While there are many books available on metals toxicity and on reproductive toxicity no current book explores both in the same volume Culling information from throughout the literature Metals Fertility and Reproductive Toxicity supplies an in depth look at the role of metals in endocrine disruption and the spectrum of mechanisms involving metals that can influence reproduction **Recent Achievements in**

Environmental Fate and Transport Fred T. Price, 2000 Reviews of Environmental Contamination and Toxicology Volume 257 Pim de Voogt, 2021-11-17 Reviews of Environmental Contamination and Toxicology attempts to provide concise critical reviews of timely advances philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics in any segment of the environment as well as toxicological implications *Maritime Accidents and Environmental Pollution - The X-Press Pearl Disaster* Meththika Vithanage, Ajith Priyal de Alwis, Deshai Botheju, 2023-12-29 This book discusses in detail the facts and findings related to the X Press Pearl container vessel accident that occurred in May 2021 off the coast of Colombo Sri Lanka The ship was carrying a large consignment of chemicals and diverse hazardous materials that caused a disastrous and vast environmental and social catastrophe in the region Through many case studies accumulated knowledge and experiences the authors discuss the accident response risk mitigation investigation and damage assessment activities from the very onset of the accident It helps researchers and regulators understand the facts of this unique marine chemical accident and to formulate necessary future regulations as well as to develop robust safety and sustainability management systems and safety cultures Features Written by authorities who led the team involved in accident response and damage assessment Focuses on identifying plausible root causes pitfalls in accident response and weaknesses in current regulatory and management protocols Delivers in depth understanding of a unique marine chemical accident to help formulate necessary future policies and regulations related to such disasters Includes many case studies related to the accident illustrated with photos and figures that are true evidence of the disaster the response and the mitigation Explains and discusses key research findings in a streamlined manner understandable for a wide audience A valuable resource for readers in environmental management and policy creation as well as for researchers professionals academics and students

involved in environmental science chemical engineering technical safety and sustainability management maritime polymer and ocean sciences Countries where maritime disasters are a concern will also find this book is an important guide for taking a responsible approach when handling similar situations in the future not least to avert such events from occurring

Gulf War and Health Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Gulf War and Health: Literature Review of Pesticides and Solvents, 2003-12-10 Gulf War and Health Volume 2 is the second in a series of congressionally mandated studies by the Institute of Medicine that provides a comprehensive assessment of the available scientific literature on potential health effects of exposure to certain biological chemical and environmental agents associated with the Gulf War In this second study the committee evaluated the published peer reviewed literature on exposure to insecticides and solvents thought to have been present during the 1990 1991 war Because little information exists on actual exposure levels a critical factor when assessing health effects the committee could not draw specific conclusions about the health problems of Gulf War veterans However the study found some evidence although usually limited to link specific long term health outcomes with exposure to certain insecticides and solvents The next phase of the series will examine the literature on potential health effects associated with exposure to selected environmental pollutants and particulates such as oil well fires and jet fuels

Arsenic Toxicity Narayan Chakrabarty, 2015-08-05 The most talked about metalloid in the modern world arsenic affects the liver kidney and lungs leads to cardiovascular diseases cancer and diabetes and may cause blindness with long time exposure With naturally occurring arsenic boosted by mining and other industrial processes contaminating soil and drinking water arsenic toxicity is a maj

Microfibre Pollution from Textiles R. Rathinamoorthy, S. Raja Balasaraswathi, 2024-04-30 Textile materials shed microfibres during different phases of their life cycle While much attention has been paid to the impact of microplastics on the environment there has been less focus on the impact of microfibre pollution which also poses a serious environmental threat Microfibre Pollution from Textiles Research Advances and Mitigation Strategies shines a light on the hidden effects of textile microfibre pollution and examines its generation in manufacturing use including laundering and disposal It details advancements and gaps in the quantification and characterization techniques that are emerging in the growing field of study of microfibre pollution in textile technology The book Examines the contributions of the textile and fashion industries to microfibre pollution from production to disposal Reviews recently developed methods and technological advancements in the identification and quantification of microfibres from textiles Addresses emerging sustainable mitigation strategies and sustainable textile production methods that can potentially reduce or eliminate microfibre shedding Details the state of the art on existing regulations and standards and provides scope for future research in the area of standard development By bridging the gap between environmental and textile studies this book is aimed at researchers and advanced students in textile and environmental science and engineering

Bioremediation Ram Naresh Bharagava, Sandhya Mishra, Ganesh Dattatraya Saratale, Rijuta Ganesh Saratale, Luiz

Fernando Romanholo Ferreira,2022-05-04 Environmental sustainability with rapid industrialization is one of the current major global challenges Industries are the key drivers of the world economy But they are also the major polluters of the environment due to the discharge of partially treated untreated toxic and hazardous wastes containing organic and inorganic pollutants which cause severe environmental soil and water pollution and toxic effects in living beings So the adequate treatment of industrial wastes to degrade detoxify pollutants is of the utmost importance for environmental safety and for promoting the sustainable development of our society with low environmental impacts Bioremediation Green Approaches for a Clean and Sustainable Environment showcases the latest information on the different bioremediation approaches used for the many types of industrial pollutants and are dedicated to environmental safety This book provides a detailed knowledge about the natural as well as anthropogenic sources of different types of toxic pollutants such as toxic metals dyes pesticides petroleum hydrocarbons and plastics their fate and transport into the environment their ecotoxicological effects and health hazards and different approaches used for their bioremediation for the environmental clean up Key Features Covers the different aspects of environmental problems and their remedies with up to date developments in the field of bioremediation of industrial environmental pollutants Serves as an invaluable source of knowledge for a wide range of students scientists and researchers in microbiology biotechnology environmental sciences with the fundamental and advanced knowledge about the environmental pollution challenges and bioremediation of toxic pollutants *Agricultural Nanotechnology* Kamel A Abd-Elsalam,2025-08-08 Agricultural nanotechnology is an emerging field with the potential to provide solutions to various challenges facing the industry such as food security environmental sustainability and resource efficiency Exploring the devices materials techniques and agrochemicals available at the nanoscale the editor has brought together a wealth of expertise from around the world to present a detailed overview supported by real world examples With sustainable agriculture in mind the book emphasizes the need to be responsible and ethical when implementing nanotechnology Concerns about nanoparticles in the environment and nanotoxicology are addressed and regulatory implications are discussed Case studies of successful commercial nanotechnology products will inspire researchers and industry professionals alike **Subject Guide to Books in Print** ,1993 *Oceanography and Marine Biology* R. N. Gibson,R. J. A. Atkinson,J. D. M. Gordon,2005-06-24 Written by experts actively engaged in the field Oceanography and Marine Biology An Annual Review explores the physical chemical and biological aspects of marine science An essential reference for researchers and students in all fields of marine science the text contains analyses on cold seep sediments unburnt coal in the marine environment biofiltration and biofouling on artificial structures in Europe ecology of rafting in marine ecosystems effects of globalisation in marine environments and much more Its consistent presentation and timely topics make it a perennial favorite among researchers and students in all fields of marine science **Herbicides** Mohammed Nagib Hasaneen,2011-12-22 This volume contains two sections Mechanisms of herbicidal action chapters 1 4 and Mode of action of selected herbicides on controlling

diseased weed growth and productivity and or growth and development of field crops chapters 5 10 Topics by chapters are molecular mechanism of action immunosensors laboratory studies molecular modeling weed resistance community response use of herbicides in biotech culture gene flow herbicides and risk herbicides persistence These recurring themes reinforce my view held over a very long time that experience with one crop or problem can sometimes be relevant often to an unexpected extent to an apparently dissimilar situation in a different crop I hope that readers interested in herbicides and pesticides will be satisfied with all the chapters in the book as its content might be of interest and value to them in the future

Agricultural and Environmental Nanotechnology Fabian Fernandez-Luqueno, Jayanta Kumar Patra, 2023-01-05 This book highlights the best practices regarding nanoscience and nanotechnology for agriculture and environmental sectors to shape sustainable development thought to improve the quality and quantity of the agriculture products and to decrease the collateral effect of nanotechnology in the ecosystems Besides leading nanotechnologies are showed and discussed to guarantee their proper management in lands and ecosystems Therefore nanotechnologies such as agronanobiotechnology nanofertilization pest control magnetofection for plant breeding plant molecular farming OMICs technologies phytonanotechnology nanoremediation etc are described in five sections and 21 chapters Undoubtedly it is an ideal and updated book for undergraduate or postgraduate students and scientists or researchers involved in nanoscience nanotechnology crop production and remediation technologies as well as for those researchers that solving technical problems regarding the crop management and the human and environmental health without hampering the pursuit of sustainable development goals

Proceedings of the International Conference on Sustainable Environment, Agriculture and Tourism (ICOSEAT 2022) Arifin Dwi Saputro, Lilik Sutiarto, Rudiati Evi Masithoh, Jik Chang Leong, Katharina Keiblinger, Chaleeda Borompichaichartkul, Omer Said Toker, Rosnah Shamsudin, 2024-03-09 This is an open access book ICOSEAT 2022 was held on July 21 23 2022 in Bangka Island one of the wonderful places of Indonesia Articles in the field of Agroindustry and Appropriate Technology 4 0 Environmental and Mining Engineering Sustainable Development and Tourism Management Agriculture and Food Engineering and Marine Aquaculture and Biological Science ICOSEAT provides a forum for Academic Business and Government to present and discuss topics on recent development in those fields

Bioremediation and Biotechnology, Vol 3 Rouf Ahmad Bhat, Khalid Rehman Hakeem, Najla Bint Saud Al-Saud, 2020-07-08 Healthy environment is important for any kind of biota on earth It provides the basic elements of life such as clean water fresh air fertile soil and supports ecosystem of the food chain Pollution drastically alters quality of the environment by changing the physico chemical and biological aspects of these components Accordingly toxic metals combustible and putrescible substances hazardous wastes explosives and petroleum products are all examples of inorganic and organic compounds that cause contaminations Specifically pollution of toxic and heavy metal in the environment is a growing problem worldwide currently at an alarming rate Toxic metals threaten the aquatic ecosystems agriculture and ultimately

human health Traditional treatment techniques offer certain advantages such as rapid processing ease of operation and control and flexibility But they could not maintain the quality of the environment due to the high operational costs of chemicals used high energy consumption and handling costs for sludge disposal and overburden of chemical substances which irreversibly affect and destroy biodiversity which ultimately render the soil useless as a medium for plant growth Therefore bioremediation and biotechnology carried out by living assets to clean up stabilize and restore contaminated ecosystems have emerged as promising environmental friendly and affordable approaches Furthermore the use of microbes algae transgenic plants and weeds adapted to stressful environments could be employed to enhance accumulation efficiency Hence sustainable and inexpensive processes are fast emerging as a viable alternative to conventional remediation methods and will be most suitable for developing countries In the current volume we discuss pollution remediation challenges and how living organisms and the latest biotechnological techniques could be helpful in remediating the pollution in ecofriendly and sustainable ways

Microbial Action on Hydrocarbons Vivek Kumar,Manoj Kumar,Ram Prasad,2019-02-08 The book discusses ways to overcome the side effects of using hydrocarbon based products as energy sources Hydrocarbons produce raw crude oil waste of around 600 000 metric tons per annum with a range of uncertainty of 200 000 metric tons per year The various chapters in this book focus on approaches to reduce these wastes through the application of potential microbes in a process called bioremediation The book is a one stop reference resource on the methods mechanisms and application of the bio composites in the laboratory and field Focusing on resolving a very pressing environmental issue it not only provides details of existing challenges but also offers deeper insights into the possibility of solving problems using hydrocarbon bioremediation
