their own so to speak to promote larger agendas for their class and race *Empires of the Senses* Andrew J. Rotter, 2019-06-21 When encountering unfamiliar environments in India and the Philippines the British and the Americans wrote extensively about the first taste of mango and meat spiced with cumin the smell of excrement and coconut oil the feel of humidity and rough cloth against skin the sound of bells and insects and the appearance of dark skinned natives and lepers So too did the colonial subjects they encountered perceive the agents of empire through their senses and their skins Empire of course involved economics geopolitics violence a desire for order and greatness a craving for excitement and adventure It also involved an encounter between authorities and subjects an everyday process of social interaction political negotiation policing schooling and healing While these all concerned what people thought about each other perceptions of others as Andrew Rotter shows were also formed through seeing hearing touching smelling and tasting In this book Rotter offers a sensory history of the British in India from the formal imposition of their rule to its end 1857 1947 and the Americans in the Philippines from annexation to independence 1898 1946 The British and the Americans saw themselves as the civilizers of what they judged backward societies and they believed that a vital part of the civilizing process was to properly prioritize the senses and to ensure them against offense or affront Societies that looked shabby were noisy and smelly felt wrong and consumed unwholesome food in unmannerly ways were unfit for self government It was the duty of allegedly more sensorily advanced Anglo Americans to educate them before formally withdrawing their power Indians and Filipinos had different ideas of what constituted sensory civilization and to some extent resisted imperial efforts to impose their own versions What eventually emerged were compromises between these nations sensory regimes A fascinating and original comparative work *Empires of the Senses* offers new perspectives on imperial history *Urban Revelations* Donald J. McNutt, 2023-04-28 This study reexamines the ethos of national progress by analyzing how American writers import images of ruins from European aesthetics to cast the city as a site of instability and cultural impermanence While highlighting the transatlantic currency of ruin imagery the study demonstrates through interdisciplinary analyses of architecture and material culture how American images of ruin intersect with the symbolic geographies of city and home to shape and reflect citizenship law and perceptions of race Arguing that ruin imagery works to disclose the culture's inner dimensions the study incorporates deep archival research and synthesizes theories on geography and architecture to read unstable settings in the works of Philip Freneau Charles Brockden Brown Poe and Melville The study focuses on the ways these writers relied on ruin imagery to interpret such subjects as Anglo Indian relations in the nation's early capital the dialogue between secrecy and yellow fever in 1790s Philadelphia the impact of antebellum penitentiaries on conceptions of mind and domestic space and the mutability of nationhood in the decade just before the Civil War The book provides dynamic ways of reading the relationships among urban culture ruin concepts of instability and the formation of American literature **Social Contracts and Economic Markets** J.R. Blau, 2007-08-20 The thesis of this book is that people enter into social contracts because they are different

from one another and have incentives to cooperate In economic life people have identical interests namely their own self interests so they have an incentive to compete The social worlds that we create or map and those that are already mapped for us are increasingly complex and thus the tracking of rationality is not so straightforward although it is everywhere evident In a sense this book grew out of two questions Why hasn't the United States had a second revolution Or is the revolution yet to come Many have discussed the current crises that confront contemporary society such as great economic inequalities poverty the declining quality of jobs the growing power of corporate elites and racial antagonisms I attempt to understand these problems in terms of the radical restructuring of social life by economic and spatial forces My speculative thesis is that social organizations must reinforce social contracts and nurture the opportunities for them to be forged However contemporary organizations particularly economic ones have internalized the principles of economic markets thereby inducing competition and easing out cooperation In defining social contracts I draw from Rousseau and also from Marx and his analysis of use value One hopes that new organizational forms based on principles of democracy and community will evolve In a diverse multicultural society this requires great mutual understanding and cooperation and the recognition of differences

Accommodating the Republic Kirsten E. Wood, 2023-12-05 People have gathered in public drinking places to drink relax socialize and do business for hundreds of years For just as long critics have described taverns and similar drinking establishments as sources of individual ruin and public disorder Examining these dynamics as Americans surged westward in the early nineteenth century Kirsten E Wood argues that entrepreneurial improvement minded men integrated many village and town taverns into the nation's rapidly developing transportation network and used tavern spaces and networks to raise capital promote innovative businesses practice genteel sociability and rally support for favored causes often while drinking the staggering amounts of alcohol for which the period is justly famous White men's unrivaled freedom to use taverns for their own pursuits of happiness gave everyday significance to citizenship in the early republic Yet white men did not have taverns to themselves Sharing tavern spaces with other Americans intensified white men's struggles to define what and for whom taverns should be At the same time temperance and other reform movements increasingly divided white men along lines of party conscience and class In both conflicts some improvement minded white men found common cause with middle class white women and Black activists who had their own stake in rethinking taverns and citizenship

Philadelphia Stories Samuel Otter, 2013-01-02 In *Philadelphia Stories* Samuel Otter finds literary value historical significance and political urgency in a sequence of texts written in and about Philadelphia between the Constitution and the Civil War Historians such as Gary B Nash and Julie Winch have chronicled the distinctive social and political space of early national Philadelphia Yet while individual writers such as Charles Brockden Brown Edgar Allan Poe and George Lippard have been linked to Philadelphia no sustained attempt has been made to understand these figures and many others as writing in a tradition tied to the city's history The site of William Penn's Holy Experiment in religious toleration and representative

government and of national Declaration and Constitution near the border between slavery and freedom Philadelphia was home to one of the largest and most influential free African American communities in the United States The city was seen by residents and observers as the laboratory for a social experiment with international consequences Philadelphia would be the stage on which racial character would be tested and a possible future for the United States after slavery would be played out It would be the arena in which various residents would or would not demonstrate their capacities to participate in the nation's civic and political life Otter argues that the Philadelphia experiment the term used in the nineteenth century produced a largely unacknowledged literary tradition of peculiar forms and intensities in which verbal performance and social behavior assumed the weight of race and nation
