Who Needs a Missionary? Robert Reese, 2014-04-04 In *Who Needs a Missionary* Robert Reese reviews his own missionary experiences in Zimbabwe and finds that the best results came from an indigenous leader who had the least

contact with missionaries Reese conducted interviews with this leader to let him speak for himself about his journey with God in ministry these interviews form the heart of the book Mostly without missionary guidance this Zimbabwean Christian of humble origins journeyed from his conversion to Christ to arrive at a transformation of his home community Reese draws lessons from the life of this remarkable leader who has enjoyed so few earthly advantages yet has been rich in faith and fruitfulness God has determined that the gospel will work all by itself whenever and wherever it is planted in human hearts

Miocic, N. Heinemann, K. Edlmann, J. Alcalde, R.A. Schultz, 2023-08-31 The secure storage of energy and carbon dioxide in subsurface geological formations plays a crucial role in transitioning to a low carbon energy system The suitability and security of subsurface storage sites rely on the geological and hydraulic properties of the reservoir and confining units Additionally their

ability to withstand varying thermal mechanical hydraulic biological and chemical conditions during storage operations is essential Each subsurface storage technology has distinct geological requirements and faces specific economic logistical public and scientific challenges As a result certain sites can be better suited than others for specific low carbon energy applications This Special Publication provides a summary of the state of the art in subsurface energy and carbon dioxide storage It includes 20 case studies that offer insights into site selection characterization of reservoir processes the role of caprocks and fault seals as well as monitoring and risk assessment needs for subsurface storage operations
