## **Sensitive Periods In Development Interdisciplinary Perspectives:**

Sensitive Periods in Development M. H. Bornstein, 2014-02-24 First published in 1987 Contemporary psychology is increasingly diversified pluralistic and specialized and most psychologists venture beyond the confines of their substantive specialty only rarely Yet psychologists with different specialties encounter similar problems ask similar questions and share similar concerns Unfortunately there are very few arenas available for the expression or exploration of what is common across psychological subdisciplines The Crosscurrents in Contemporary Psychology series is intended to serve as such a forum The chief aim of this series is to provide integrated perspectives on supradisciplinary themes in psychology Despite its contemporary diversity and high degree of specialization psychology embraces many phenomena that are of interest across subdisciplines largely because of the generality and ubiquity of those phenomena The sensitive period is one Sensitivity to different kinds of experience varies over the life cycle of an organism

RICHARDSON,2013-03-09      *Knowledge of Reflexives in a Second Language* Margaret Thomas,1993-10-28 This study addresses the debate about whether adult language learners have access to the principles and parameters of universal grammar in constructing the grammar of a second language The data are based on two related experiments The first examines the interpretation of English reflexive pronouns by native speakers of Japanese and of Spanish The second experiment examines the interpretation of the Japanese reflexive zibun by native speakers of English and of Chinese Three

hypotheses are evaluated a that UG is unavailable and that processing strategies or other non linguistic principles guide second language acquisition b that UG is available only in the form in which it is instantiated in the learner s native language c that UG is fully available including the ability to re set parameters to UG sanctioned values not instantiated in the learner s native language The results show that learners observe constraints defined by Manzini and Wexler s parameterized version of Principle A of the binding theory and support the proposal that adult learners have access to universal grammar A final chapter reviews the experimental data in the light of recent accounts of cross linguistic variation in the grammar of anaphors which reject parameterization of the binding principles in favor of a movement to INFL analysis      **Language, Gesture, and Space** Karen Emmorey, Judy S.
