Sentence Dynamics:

O jazyce básnickém Jan Mukařovský, 1976-01-01 *Crises of the Sentence* Jan Mieszkowski, 2019-04-02 There are few forms in which so much authority has been invested with so little reflection as the sentence. Though a fundamental unit of discourse, it has rarely been an explicit object of inquiry, often taking a back seat to concepts such as the word, trope, line, or stanza. To understand what is at stake in thinking or not thinking about the sentence, Jan Mieszkowski looks at the difficulties confronting nineteenth and twentieth century authors when they try to explain what a sentence is and what it can do. From Romantic debates about the power of the stand-alone sentence to the realist obsession with precision and revision to modernist experiments with ungovernable forms, Mieszkowski explores the hidden allegiances behind our ever-changing stylistic ideals. By showing how an investment in superior writing has always been an ethical and a political as well as an aesthetic commitment, *Crises of the Sentence* offers a new perspective on our love-hate relationship with this fundamental compositional category.

The Dynamics of Language Lutz Marten, 2015-01-27 For the whole of the last half century, most theoretical syntacticians have assumed that knowledge of language is different from the tasks of speaking and understanding. There have been some dissenters, but by and large, this view still holds sway. This book takes a different view; it continues the task set in hand by Kempson et al. (2001) of arguing that the common-sense intuition is correct: that knowledge of language consists in being able to use it in speaking and understanding. *The Dynamics of Language* argues that interpretation is built up across a sequence of words relative to some context, and that this is all that is needed to explain the structural properties of language. The dynamics of how interpretation is built up is the syntax of a language system. The authors' first task is to convey to a general linguistic audience, with a minimum of formal apparatus, the substance of that formal system. Secondly, as linguists, they set themselves the task of applying the formal system to as broad an array of linguistic puzzles as possible, the languages analysed ranging from English to Japanese and Swahili. It argues that knowledge in language consists of being able to use it in speaking and understanding. It analyses a variety of languages from English to Japanese and Swahili. It appeals to a wide audience in the disciplines of language, linguistics, anthropology, education, psychology, cognitive science, law, media studies, and medicine.

The Dynamics of Focus Structure Nomi Erteschik-Shir, 1997 In this book, Nomi Erteschik-Shir develops a new theory of focus structure, integrating insights from syntax, semantics, phonology, and pragmatics. She explores the role of focus structure in grammar, examining the interface between focus structure and syntax, the semantics of focus structure, and the intonation associated with it. Dr Shir defines a grammatical level of focus structure, which is an annotated structure in which topic and focus constituents are marked. F-structure feeds both PF (Phonological Form) and semantics and is sensitive to lexical information. Dr Shir argues that F-structure, and not LF (Logical Form), is the input to a semantic rule of predication. One of the major results of Dr Shir's analysis is that wh-movement turns out to be subject to the same constraint which accounts for anaphora and other subject-object asymmetries.

Usage-Based Dynamics in Second

Language Development Wander Lowie, Marije Michel, Audrey Rousse-Malpat, Merel Keijzer, Rasmus Steinkrauss, 2020-07-14 This book honours the contribution of Marjolijn Verspoor to the development and implementation of dynamic usage based DUB approaches in second language L2 research and pedagogy With chapters written by renowned experts in the field the book addresses the dynamics of language language learning and language teaching from a usage based perspective The book contains both theory and empirical work the initial theoretical chapters present cutting edge thinking in relation to both the scope of DUB theory and its applications providing conceptual perspectives from cognitive grammar and linguistics thinking for speaking TFS and Complex Dynamic Systems Theory CDST approaches united by their shared underpinnings of language as a dynamic system of conventionalized routines The second half of the volume showcases state of the art methodologies to study dynamic trajectories of language learning empirical investigations into the above mentioned theoretical concepts and innovative classroom implementations of DUB language pedagogy

Dynamics and Management of Reasoning Processes John-Jules Ch. Meyer, Jan Treur, 2013-04-17 This volume the 6th volume in the DRUMS Handbook series is part of the aftermath of the successful ESPRIT project DRUMS Defeasible Reasoning and Uncertainty Management Systems which took place in two stages from 1989 1996 In the second stage 1993 1996 a work package was introduced devoted to the topics Reasoning and Dynamics covering both the topics of Dynamics of Reasoning where reasoning is viewed as a process and Reasoning about Dynamics which must be understood as pertaining to how both designers of and agents within dynamic systems may reason about these systems The present volume presents work done in this context This work has an emphasis on modelling and formal techniques in the investigation of the topic Reasoning and Dynamics but it is not mere theory that occupied us Rather research was aimed at bridging the gap between theory and practice Therefore also real life applications of the modelling techniques were considered and we hope this also shows in this volume which is focused on the dynamics of reasoning processes In order to give the book a broader perspective we have invited a number of well known researchers outside the project but working on similar topics to contribute as well We have very pleasant recollections of the project with its lively workshops and other meetings with the many sites and researchers involved both within and outside our own work package

Dynamics in Logic and Language Dun

Deng, Mingming Liu, Dag Westerståhl, Kaibo Xie, 2023-02-23 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the Third Tsinghua Interdisciplinary Workshop on Logic Language and Meaning TLLM 2022 which was held virtually in April 2022 The 9 full papers presented in this volume were carefully reviewed and selected from 13 submissions The workshop covers a wide range of topics such as dynamic semantics logical dynamics Dynamic Epistemic Logic Discourse Representation Theory formal semantics free choice inference update semantics and donkey sentences

Dynamics of Meaning Gennaro Chierchia, 2009-02-20 In *The Dynamics of Meaning* Gennaro Chierchia tackles central issues in dynamic semantics and extends the general framework Chapter 1 introduces the notion of dynamic semantics and discusses in detail the phenomena that have been used to motivate it such as donkey sentences and adverbs of quantification The second chapter explores in greater depth the interpretation of indefinites and issues related to presuppositions of uniqueness and the E type strategy In Chapter 3 Chierchia extends the dynamic approach to the domain of syntactic theory considering a range of empirical problems that includes backwards anaphora reconstruction effects and weak crossover The final chapter develops the formal system of dynamic semantics to deal with central issues of definites and presupposition Chierchia shows that an approach based on a principled enrichment of the mechanisms dealing with meaning is to be preferred on empirical grounds over approaches that depend on an enrichment of the syntactic apparatus *Dynamics of Meaning* illustrates how seemingly abstract stances on the nature of meaning can have significant and far reaching linguistic consequences leading to the detection of new facts and influencing our understanding of the syntax semantics pragmatics interface

Meaning: the Dynamic Turn Jaroslav Peregrin, 2021-07-26 In recent decades many theories of formal semantics of natural language have undergone what can be called a dynamic turn they have moved from treating language as a static system to considering it in action and to taking meanings as crucially involving context change potentials The theories however usually concentrate much more on the hows of the turn than on its whys and as a result the conceptual foundations of dynamic semantics are much less elaborated than its technical side This book based on a conference held in Prague in September 2001 is a contribution to filling this gap it consists of papers addressing from various sides the foundational questions of the dynamic theories of meaning It includes contributions of writers who are commonly held as authorities concerning the turn who however here concentrate more on the why s than on the how s of dynamic semantics Hence the book should be of interest both for those who want to know what the turn is about and for those who are not satisfied with knowing the technical side of dynamic semantics and want to know its point

Johan van Benthem on Logic and Information Dynamics Alexandru Baltag, Sonja Smets, 2014-08-27 This book illustrates the program of Logical Informational Dynamics Rational agents exploit the information available in the world in delicate ways adopt a wide range of epistemic attitudes and in that process constantly change the world itself Logical Informational Dynamics is about logical systems putting such activities at center stage focusing on the events by which we

acquire information and change attitudes Its contributions show many current logics of information and change at work often in multi agent settings where social behavior is essential and often stressing Johan van Benthem s pioneering work in establishing this program However this is not a Festschrift but a rich tapestry for a field with a wealth of strands of its own The reader will see the state of the art in such topics as information update belief change preference learning over time and strategic interaction in games Moreover no tight boundary has been enforced and some chapters add more general mathematical or philosophical foundations or links to current trends in computer science The theme of this book lies at the interface of many disciplines Logic is the main methodology but the various chapters cross easily between mathematics computer science philosophy linguistics cognitive and social sciences while also ranging from pure theory to empirical work Accordingly the authors of this book represent a wide variety of original thinkers from different research communities And their interconnected themes challenge at the same time how we think of logic philosophy and computation Thus very much in line with van Benthem s work over many decades the volume shows how all these disciplines form a natural unity in the perspective of dynamic logicians broadly conceived exploring their new themes today And at the same time in doing so it offers a broader conception of logic with a certain grandeur moving its horizons beyond the traditional study of consequence relations

The Social Dynamics of Pronominal Systems Paul Bouissac,2019-07-15 Personal pronouns have a special status in languages As indexical tools they are the means by which languages and persons intimately interface with each other within a particular social structure Pronouns involve more than mere grammatical functions in live communication acts They variously signal the gender of speakers as parts of utterances or in their anaphoric roles They also prominently indicate with a range of degrees the kind of social relationships that hold between speakers from intimacy to indifference from dominance to submission and from solidarity to hostility Languages greatly vary in the number of pronouns and other address terms they offer to their users with a distinct range of social values Children learn their relative position in their family and in their society through the correct use of pronouns When languages come into contact because of population migrations or through the process of translation pronouns are the most sensitive zone of tension both psychologically and politically This volume endeavours to probe the comparative pragmatics of pronominal systems as social processes in a representative set from different language families and cultural areas

Network mining and propagation dynamics analysis Xuzhen Zhu,Wei Wang,Shirui Pan,Fei Xiong,2023-03-01 **Meaning and the Dynamics of Interpretation** Hans Kamp,2013-10-17 This selection of research papers written by Hans Kamp presents the core of his scientific research on natural language semantics and its relation to logic philosophy and linguistics Arranged in six sections the topics range from philosophical reflection on the foundational issues in the ancient Sorites Paradox with a formal account of its solution to a detailed account of presuppositions in dynamic semantics Ranking among the philosophers with great and lasting influence on formal semantics Hans Kamp contributed early foundational research to core theoretical topics like temporal reference and vagueness then

pushed the boundaries of the discipline in new and productive directions Showing the importance of non truth functional aspects of meaning Discourse Representation Theory proved the value of a dynamic approach to interaction of text and context for our understanding of anaphora word meaning and context dependence This collection shows very clearly how Kamp has forged ground breaking connections among semantics computation and mental representation challenging the once dominant Fregean anti psychologism while demonstrating that the best theoretical research can simultaneously yield important computational applications and novel cognitive insights Barbara Partee University of Massachusetts Amherst Hans Kamp has been rewarded with the Rolf Schock Prize in 2024 **The Pentecostal Hypothesis** Nimi

Wariboko,2020-10-12 The Pentecostal Hypothesis is the capacity to resist conventional wisdom in social actions On a daily basis Pentecostals deploy or enact this capacity through the use of the formula It does not make sense but it makes spirit in their decision making processes This is an alternate way of knowing that is keyed to a particular interpretative understanding of Jesus Christ as constitutive of and normative for the good decisions relevant to human flourishing The book offers a critical philosophical analysis of the social ethical implications of this hypothesis intended for private decisions and social actions This text is ultimately a critique of Pentecostal reason In this book Wariboko explores the epistemological dimensions of everyday Pentecostal Christology their interpretation of Jesus s character and nature as epistemology For Pentecostals Jesus did not have an epistemology but the story of his life as a whole is an epistemology For them the validity of a truth claim is always in formed by the story of Jesus that claims them the story that gives them the meaning and courage to affirm their decisions without fear of being contradicted by Enlightenment rationalism What kind of normative sway does this orientation to modernity have over Pentecostals pattern of thought This book configures the response to this question with profound insights into the convergence of epistemology and Christology within the impelling matrix of a provocative social ethics The epistemological in this book is not about the that of knowing but the how the performative dimension of knowing which is affective emotive and an embodied practice The Pentecostal Hypothesis is the capacity to resist conventional wisdom in social actions **Dynamic Processes and Reading Novels** Irene O'Leary,2025-05-12 This book is about the

dynamic processes that generate novel reading It takes the view that the world is composed of dynamic processes and introduces a process dynamics approach to articulate this stance This fresh perspective draws on literary studies process philosophy and neuroscience to argue that dynamic literary and microcognitive processes constantly reconfigure the conditions that they co create during reading Analyses of The PowerBook by Jeanette Winterson The Curious Incident of the Dog in the Night time by Mark Haddon and Oryx and Crake by Margaret Atwood consider style narration allusion and creativity in interaction with diverse microcognitive processes involved in reading The analyses are strengthened by taking live action into account illuminating changes that many critical perspectives miss or standardise and avoiding reliance on illusory ideal readers and readings In proposing a process approach to dynamics and its analysis this book paves the way for

new research across disciplines **Sentence Dynamics** Constance Immel, Florence Sacks, 1998-07 Sentence Dynamics teaches the essentials of grammar and sentence construction through review of basic sentence structure parts of speech and punctuation New examples and readings cover topics on public issues popular culture and scientific interests all within the context of grammar instruction **Questions in Dynamic Semantics** Maria Aloni, Alastair Butler, Paul Dekker, 2007-03-20 The study of questions and answers is challenging for various fields of theoretical linguistics logic analytical philosophy and more recently computer science Research into questions and answers addresses old and raises new and important questions about the semantics pragmatics interface and about the dynamics of interpretation This book brings together current work on the topic as it has been developed in Amsterdam and congenial academic sites over the past 15 years Amsterdam is one of the breeding grounds for the formal study of logic and language for dynamic semantics and for the study of questions and answers It covers the major issues of pragmatic semantic investigation including logical relations context dependence information structure and more It illustrates how semantic pragmatic stance can be used for problems in other areas of linguistic theorising *The Psycho-Biology Of Language* George Kingsley Zipf, 2013-11-05 This is Volume XXI in a series of twenty one on the Cognitive Psychology Originally published in 1936 this is a study on the introduction to Dynamic Philology **Spelling Across Orthographies** Teresa Limpo, Naymé Salas, Marie Van Reybroeck, Sao Luis Castro, 2021-07-29
