Birds of Nunavut James M. Richards, Anthony J. Gaston, 2018-08-15 Nunavut is a land of islands encompassing some of the most remote places on Earth. It is also home to some of the world's most fascinating bird species. The windswept tundra, rocky shorelines and icy waters of this thinly populated land are integral to the survival of numerous breeding and non-breeding birds including the colourful King Eider, the stately Snowy Owl, the spritely Snow Bunting and the globe spanning Northern Wheatear. *Birds of Nunavut* is the first complete survey of every species known to occur in the territory. It is co-written by a team of eighteen experts who have conducted a combined total of 300 seasons of fieldwork in Nunavut. They document 295 species of birds of which 145 are known to breed in the territory, presenting a wealth of information on identification, distribution, ecology, behaviour and conservation. Lavishly illustrated with over 800 colour photographs and 155 maps, it is a visually stunning reference work on the birds that live in and visit Nunavut.
