The Shark Jacques Cousteau, Philippe Cousteau, 1987 The Shark Jacques Yves Cousteau, Philippe Cousteau, 1970
The shark Jacques Yves Cousteau, 1970 **The Shark** ,1972 **The Shark** Gabriel Jan, 1981 **Shark** Richard Ellis, 2012-04-17 The sharks ancient or modern real or imaginary have always been with us and will probably remain with us forever They appear not only in movies and literature but in countless permutations of size shape and materials permeating our daily lives with their silent menace In a sense humans live in a world replete with sharks not vice versa Thus Richard Ellis sets about chronicling and debunking the myths of sharks throughout history From 18th century art to the phenomena of JAWS the shark has remained the indomitable aggressor of the deep the last demon of humankind The image of the shark and the fear it inspires infiltrates our daily lives with its mythical power and strength But it is not man who should fear the shark Our need to dominate these predators is destroying them and their habitat Through hundreds of full color images Ellis proves the necessity of preserving these majestic creatures As curator of the Ft Lauderdale Museum of Art s exhibition entitled Shark debuting May 2012 Ellis adeptly turns these sleek efficient hunters from monsters of the deep into rare beautiful forces of nature **Shark Quest** Karen Romano Young, 2018-08-01 Sharks are in trouble Fifty shark species are at high risk of extinction and another sixty three are threatened These intelligent mysterious and sometimes scary fish evolved about 420 million years ago They have adapted to survive deep in the ocean and in shallow water habitats Commercial fishing and finning are threatening shark populations So is water pollution Marine biologists and others including young people are working together to save these fascinating predators Discover the work of scientists and conservationists as they study shark biology and morphology research migration feeding and mating patterns delve into human climate and other threats to shark habitat and develop sophisticated technologies to aid sharks and shark research See how scientists also educate the public about real and imagined fear of sharks and encourage citizen participation in shark conservation efforts Learn about high tech tagging for tracking shark migration paths Discover the autonomous underwater vehicles and drones that divers use to observe and photograph sharks up close Visit shark sanctuaries in the South Pacific Ocean You ll even meet the Shark Lady a k a Eugenie Clark a pioneer ichthyologist shark scientist Through research and advocacy people around the world are working to protect and admire sharks A n engaging well researched book about a much maligned species of fish that deserves our protection Booklist A remarkably thorough tour of the world of sharks and marine scientists efforts to educate the public about our ocean s apex predators Kirkus Reviews *Shark* Dean Crawford, 2008-08-01 In *Shark* Dean Crawford explores the long relationship between shark and man revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration **Global Perspectives on Literary Tourism and Film-Induced Tourism** Baleiro, Rita, Pereira, Rosária, 2021-12-10 At the end of the 20th century the traditional forms of tourism transformed they expanded by the introduction of new postmodern tourist forms bringing innovative offers to the

marketplace Two of these new fast growing forms are literary tourism and film induced tourism both of which fall under the umbrella of cultural tourism Both niches of cultural tourism share the need to create products and experiences that meet the tourists expectations Global Perspectives on Literary Tourism and Film Induced Tourism discusses literary tourism and film induced tourism and documents the advances in research on the intersections of literature film and the act of traveling Covering a wide range of topics from film tourism destinations to digital literary tourism this book is ideal for travel agents tourism agencies tour operators government officials postgraduate students researchers academicians cultural development councils and associations and policymakers *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 Diversity and Adaptation in Fish Behaviour Miles H.A. Keenleyside,2012-12-06 Fish are extremely successful vertebrates Because of a long and divergent history they are now found in almost every conceivable aquatic habitat This radiation has been accompanied by great diversity in structure physiology and behaviour Despite this variability fish must solve a number of basic problems that are common to all animals The most important of these are 1 to find and ingest appropriate food 2 to avoid predation and 3 to reproduce The main purpose of this book is to describe the variety of behavioural strategies that fish use in coping with these problems My approach has been to draw together material from both field and laboratory work that is widely scattered in the literature The major emphasis is on field studies since my main concern is with adaptive solutions to problems and I believe these are most likely to be correctly perceived by workers who are familiar with the natural ecological setting of their animals Of course many details of behaviour cannot be seen and quantified adequately in the field and therefore I have not ignored laboratory studies However even here I have concentrated on work that illustrates the variety of solutions that fish use to solve the three basic problems Much important work for instance on causation development and learning is not included

Nicholls,2018-05-11 This book is the most thorough exploration to date of the many ways in which a wild creature has been absorbed reimagined and represented across the ages in all of the major art forms The authors consider not only how the identity of sharks in the natural environment became incorporated into a cultural environment but also how sharks came to be considered the most feared creatures in the open oceans as a consequence of this incorporation Yet sharks are especially important in helping to maintain a balance that is essential to the health of the oceans The book begins with a treatment of the three sharks at the top of global shark attack files from scientific economic and environmental perspectives Subsequent chapters engage with cultural representations of sharks in poetry drama art novels screenplay adaptations and films Through an exploration of the ways in which sharks have been represented in human culture through the centuries this book alerts the global community to the importance of sharks as a common cultural heritage It aims to change perceptions of sharks so that they can become more revered than feared The authors of this book argue that an increased understanding of sharks should lead to the development of better strategies for shark and human interactions This book will be of great interest to researchers and students of the Environmental Humanities Cultural History and the Arts It is also excellent supplementary reading for courses in Zoology and Marine Science Sport Diver ,2006-05 The Great Explorers Robin
