Manchester In The Victorian Age The Half Known City:

Manchester in the Victorian Age Gary S. Messinger, 1985 *Jewish Welfare in Hamburg and Manchester, C. 1850-1914* Rainer Liedtke, 1998 This comparative history of Jewish welfare in Hamburg and Manchester highlights Jewish integration and identity formation in nineteenth century Europe Despite their fundamentally different historical experiences the Jews of both cities displayed very similar patterns of welfare organization This is illustrated by an analysis of community wide Jewish welfare bodies and institutions provisions for Eastern European Jewish immigrants and transmigrants the importance of women in Jewish welfare and the function of specialized Jewish voluntary welfare associations The realm of welfare was vital for the preservation of secular Jewish identities and the maintenance of internal social balances Dr Liedtke demonstrates how these virtually self sufficient Jewish welfare systems became important components of distinctive Jewish subcultures He shows that though it was intended to promote Jewish integration the separate organization of welfare in practice served to segregate Jews from non Jews in this very important sphere of everyday life **The Politics of the Pantomime** Jill Alexandra Sullivan, 2011 Focuses on the variety and independence of pantomime in the provinces especially Nottingham Birmingham and Manchester Explores official and local censorship and the relationships between local theaters managers authors and audiences **Empire as the Triumph of Theory** Edward Beasley, 2005 A key addition to our understanding of the Victorian era British Empire this book looks at the founders of the Colonial Society and the ideas that led them down the path to imperialism *Beyond the metropolis* Katy Layton-Jones, 2016-02-19 Draws on previously unexplored visual and ephemeral sources to re evaluate the British city its changing form representation and impact *Making Sense Of: Health, Illness and Disease* , 2021-10-25 Health illness and disease are topics well suited to interdisciplinary inquiry This book brings together scholars from around the world who share an interest in and a commitment to bridging the traditional boundaries of inquiry We hope that this book begins new conversations that will situate health in broader socio cultural contexts and establish connections between health illness and disease and other socio political issues This book is the outcome of the first global conference on Making Sense of Health Illness and Disease held at St Catherine s College Oxford in June 2002 The selected papers pursue a range of topics from the cultural significance of narratives of health illness and disease to healing practices in contemporary society as well as patients illness experiences Researchers and health care practitioners now live in the age of interdisciplinarity which has transformed both health care delivery and research on health The essays in this collection transcend the traditional boundaries of biomedicine and draw attention to the many ways in which health is embedded in socio cultural norms and how these norms in turn shape health practices and health care This volume is of interest not only to researchers but also to those delivering health care **The Ordeal of Peace** Adam R. Seipp, 2016-03-03 Historians know a great deal about how wars begin but far less about how they end Whilst much has been written about the forces passions and institutions that mobilized societies for war and worked to

sustain that mobilization through years of struggle much less is known about the equally complex processes that demobilized societies in the wake of armed conflict As such this new book will be welcomed by scholars wishing to understand the effects of the Great War in its fullest context including the reactions behaviors and attitudes of ordinary Europeans during the tumultuous events of the years of demobilization Taking a transnational perspective on demobilization this study demonstrates that the experience of mass industrial war generated remarkably similar pressures within both the defeated and victorious countries Using as examples the important provincial centres of Munich and Manchester this book examines the experiences of European urban dwellers from the last year of the war until the early 1920s Utilizing a wide variety of sources from more than twenty archives in Germany Britain and the United States this book recovers voices from the period that are often lost in conventional narratives capturing the richness and diversity of the ideas visions and conflicts engendered by those difficult and tumultuous years The result is a book that paints a vivid picture of the difficulties that peace could bring to economies and societies that had rapidly and fully adapted to the demands of industrial world war

The Book of Psychiatric Books Sidney Crown, Hugh Lionel Freeman, 1994 This volume consists of critical reviews of the most important works in psychiatry ever published and excerpts from those works For psychotherapy more than any other profession books define the field Most therapists have a personal list of books that for them have been memorable perhaps even mutative in influencing their thinking and clinical practice But in addition to such individual favorites choices are made at different times by the larger society and by one's professional group As a result a particular book comes to be regarded for some time as the book of the moment after which it either sinks into oblivion or passes into the respectability of acceptance as an essential part of any reference list If it does survive for long though it will inevitably come to be seen rather differently over time Starting in 1982 the editors Drs Sidney Crown and Hugh Freeman commissioned respected scholars to contribute commentary on seminal books in the field to a series in the *British Journal of Psychiatry* called *Books Reconsidered* In most cases the contributors themselves had known the books over a long period so that their own personal development as professionals was intimately connected with the works themselves and how they have stood up to time and circumstance This collection includes all *Books Reconsidered* pieces that were published between the inception of the series in 1982 and the opening months of 1992 The editors have tried to cover as many fields as possible that are relevant to psychiatry as a whole and to its subspecialties Every mental health professional will find these critiques both interesting and stimulating

Poverty and Protest as Public Discourse during the Cotton Crisis Rachel Broady, 2024-12-16 This book constitutes the first book length study of journalistic responses to poverty and protest during the Lancashire cotton crisis The cotton crisis of 1861-1865 is a popular subject in history culture and education Workers' voices are comprehensively studied in terms of newspapers publishing fiction and poetry and the broader political response to the crisis the American Civil War and British workers' support of Lincoln's Emancipation Proclamation They are though overlooked in terms of journalistic representation of workers Ironically discussions of the cotton crisis including where efforts are made to assess the workers' experience have consistently relied upon journalism as primary sources and the first witness of history without assessing the news copy's political unconscious This lack of attention is especially apparent when considering workers challenging poverty through dedicated protest Amid the celebrated workers' opposition to slavery and their sublime heroism as noted by American President Abraham Lincoln there were less studied local struggles for financial help for education and for the vote

Museum Bodies Helen Rees Leahy, 2016-04-15 *Museum Bodies* provides an account of how museums have staged prescribed and accommodated a repertoire of bodily practices from their emergence in the eighteenth century to the present day As long as museums have existed their visitors have been scrutinised both formally and informally and their behaviour calibrated as a register of cognitive receptivity and cultural competence Yet there has been little sustained theoretical or practical attention given to the visitors' embodied encounter with the museum In *Museum Bodies* Helen Rees Leahy discusses the politics and practice of visitor studies and the differentiation and exclusion of certain

bodies on the basis of for example age gender educational attainment ethnicity and disability At a time when museums are more than ever concerned with size demographic mix and the diversity of their audiences as well as with the ways in which visitors engage with and respond to institutional space and content this wide ranging study of visitors embodied experience of the museum is long overdue

Chopin in Britain Peter Willis, 2017-12-14 In 1848 the penultimate year of his life Chopin visited England and Scotland at the instigation of his aristocratic Scots pupil Jane Stirling In the autumn of that year he returned to Paris The following autumn he was dead Despite the fascination the composer continues to hold for scholars this brief but important period and his previous visit to London in 1837 remain little known In this richly illustrated study Peter Willis draws on extensive original documentary evidence as well as cultural artefacts to tell the story of these two visits and to place them into aristocratic and artistic life in mid nineteenth century England and Scotland In addition to filling a significant hole in our knowledge of the composer s life the book adds to our understanding of a number of important figures including Jane Stirling and the painter Ary Scheffer The social and artistic milieux of London Manchester Glasgow and Edinburgh are brought to vivid life

The Middlemost and the Milltowns Brian Lewis, 2002-11-01 This book seeks to enrich our understanding of middle class life in England during the Industrial Revolution For many years questions about how the middle classes earned and failed to earn money conducted their public and private lives carried out what they took to be their civic and religious duties and viewed themselves in relation to the rest of society have been largely neglected questions These topics have been marginalized by the rise of social history with its predominant focus on the political formation of the working classes and by continuing interest in government and high politics with its focus on the upper classes and landed aristocracy This book forms part of the recent attempt influenced by contemporary ideas of political culture to reassess the role composition and outlook of the middle classes It compares and contrasts three Lancashire milltowns and surrounding

parishes in the early phase of textile industrialization when the urbanizing process was at its most rapid and dysfunctional and class relations were most fraught The book's range extends from the French Revolution to 1851 the year of the Great Exhibition which symbolized mid century stability and prosperity The author argues that members of the middle class were pivotal in the creation of this stability He shows them creating themselves as a class while being created as a class putting themselves in order while being ordered from above The book shifts attention from the search for a single elusive class consciousness to demonstrate instead how the ideological leaders of the three milltowns negotiated their power within the powerful forces of capitalism and state building It argues that at a time of intense labor capital conflict it was precisely because of their diversity and their efforts to build bridges to the lower orders and upper class that the stability of the liberal capitalist system was maintained

The Dead City Paul Dobraszczyk, 2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future

The Manchester Art Treasures Exhibition of 1857 Elizabeth A. Pergam, 2017-07-05 An overdue study of a groundbreaking event this is the first book length examination of the Manchester Art Treasures Exhibition of 1857 Intended to rehabilitate Manchester's image at a heady time of economic prosperity the Exhibition became a touchstone for aesthetic social and economic issues of the mid nineteenth century Reverberations of this moment can be followed to the present day in the discipline of art history and its practice in public museums of Europe and America Highlighting the tension between art and commerce philanthropy and profit the book examines the Exhibition's organization and the presentation of the works of art in the purpose built Art Treasures Palace Pergam places the Exhibition in the context of contemporary debates about museum architecture and display With an analysis of the reception of both Ancient and Modern paintings the book questions the function of exhibitions in the construction of an art historical canon The book also provides an essential reference tool a compiled list of all of the paintings exhibited in 1857 that are now in public collections throughout the world with an analysis of the collecting trends manifest in their provenance
