Health System Performance Comparison: an Agenda for Policy, Information and Research Irene Papanicolas, Peter Smith, 2013-06-16 International comparison of health system performance has become increasingly popular made possible by the rapidly expanding availability of health data It has become one of the most important levers for prompting health system reform Yet as the demand for transparency and accountability in healthcare increases so too does the need to compare data from different health systems both accurately and meaningfully This timely and authoritative book offers an important summary of the current developments in health system performance comparison It summarises the current state of efforts to compare systems and identifies and explores the practical and conceptual challenges that occur It discusses data and methodological challenges as well as broader issues such as the interface between evidence and practice The book draws out the priorities for future work on performance comparison in the development of data sources and measurement instruments analytic methodology and assessment of evidence on performance It concludes by presenting the key lessons and future priorities and in doing so offers a rich source of material for policy makers their analytic advisors international agencies academics and students of health systems

Speaking Truth to Power Clive Smee, 2018-10-08 The Human Rights Act is now in force Any NHS body that acts in a way that is incompatible with the rights set out in the European Convention on Human Rights may be acting unlawfully This workbook is a personal perspective based on the authors experience of health service management and the law It explains the impact of the Act raises issues surrounding its implementation and asks questions about its implications for the future It has practical exercises to help readers respond to the challenges of the Act individually or in team sessions The Human Rights Act and The European Convention on Human Rights are reproduced in full There is a great deal in the Act that will have subtle implications for how and when health care is provided and for many of the assumptions that are taken for granted

The Power of Peer Learning Jean-H. Guilmotte, 2007 An ancient Chinese proverb tells us OC Give a man a fish and you feed him for a day Teach a man to fish and you feed him for a lifetime OCO The same can be said for development assistance Solutions provided by outside OC experts OCO are often rejected or politely shelved However solutions based on the principle of OC self help OCO are far more likely to take root This book explores the self help peer learning approach of the Organisation for Economic Co operation and Development OECD comparing it with that of IDRC It focuses on the importance of networks to development and growth and demonstrates that network management is fundamentally different

from the management of companies organizations or other bodies that fall under a single authority The book will be of interest to planners policymakers and researchers in the industrialized and developing worlds and particularly in the new and emerging democracies of Eastern Europe

Performance Measurement for Health System Improvement Peter C. Smith,Elias Mossialos,Irene Papanicolas,Sheila Leatherman,2010-01-07 In a world where there is increasing demand for the performance of health providers to be measured there is a need for a more strategic vision of the role that performance measurement can play in securing health system improvement This volume meets this need by presenting the opportunities and challenges associated with performance measurement in a framework that is clear and easy to understand It examines the various levels at which health system performance is undertaken the technical instruments and tools available and the implications using these may have for those charged with the governance of the health system Technical material is presented in an accessible way and is illustrated with examples from all over the world Performance Measurement for Health System Improvement is an authoritative and practical guide for policy makers regulators patient groups and researchers

Handbook Of Global Health Economics And Public Policy (A 3-volume Set) Richard M Scheffler, 2016-01-28

Understanding global health economics and policy has never been so important. This remarkable three volume collection of chapters is sure to become the standard on health economics and health policy around the world. David Cutler, Otto Eckstein, Professor of Applied Economics, Harvard University. This Handbook covers major topics in global health economics and public policy and provides a timely systematic review of the field. Edited by Richard M Scheffler, Distinguished Professor of Health Economics and Public Policy and Director of the Global Center for Health Economics and Policy Research at the University of California Berkeley, the Handbook features academics and practitioners from more than a dozen countries. Contributors are from the London School of Economics and Political Science, Pompeu Fabra University in Barcelona, University of York, University of Oslo, London School of Hygiene and Tropical Medicine, University of California Berkeley, Stanford University, Johns Hopkins University, University of Toronto, University of Oxford, Harvard Medical School, OECD, the World Health Organization and the World Bank, many of whom have also acted as economic and policy advisors to government and non governmental organizations across the world. Experts in these areas who provide critical analyses and relevant data for further exploration and research include Thomas E Getzen, Executive Director of the International Health Economics Association (iHEA), Douglas E Hough, Associate Scientist and Associate Director of the Master in Healthcare Management programme at the Bloomberg School of Public Health of John Hopkins University, Guillem Lpez Casasnovas, former President of iHEA and member of the Advisory Council of the Spanish Health and Social Welfare Ministry and of the Advisory Council of the Catalan Health Ministry since 1984, Alistair McGuire, Professor of Health Economics at the London School of Economics and Political and advisor to a number of governments and governmental bodies across Europe, Tor Iversen, Research Director at the Health Economics Research Programme at the University of Oslo and former member of the iHEA Arrow Award Committee 2007-2011, William H Dow, Professor and Associate Dean for Research at University of California Berkeley and former Senior Economist for the Council of Economic Advisors, White House, Audrey Laporte, the Director of the Canadian Centre for Health Economics, Alexander S Preker, President and CEO of Health Investment, Ayda Yurekli, who initiated and developed the World Health Organization TaXSiM simulation model that has been used by many Ministries of Finance around the world for the development of tax policies, Marko Vujicic, Managing Vice President of the Health Policy Resources Center at the American Dental Association, Mark Sculpher, Director of the Programme on Economic Evaluation and Health Technology Assessment at the University of York and former President of the International Society of Pharmacoeconomics and Outcomes Research (ISPOR) 2011-2012, and Peter Berman, who has had almost 40 years of experience in global health and was formerly a Lead Health Economist at the World Bank. The Handbook spans across three volumes. The chapters deal with key global issues in health economics, are evidence based and offer innovative policy alternatives and solutions. The Handbook's approach toward global health economics and public policy will make it a useful

resource for health economists policymakers private sector companies NGOs government decision makers and those who manage healthcare systems

Twenty Years of Health System Reform in Brazil Michele Gragnolati, Magnus Lindelow, Bernard Couttolenc, 2013-07-18 It has been over twenty years since the Brazilian Sistema nico de Sa de Unified Health System or SUS was formally established by the 1988 Constitution The impetus for the SUS came in part from rising costs and a crisis in the social security system that preceded the reforms but also from a broad based political movement calling for democratization and improved social rights Building on reforms that started in the 1980s the SUS was based on three overarching principles i universal access to health services with health defined as a citizen s right and an obligation of the state ii equality of access to health care and iii integrality comprehensiveness and continuity of care along with several other guiding ideas including decentralization increased participation and evidence based prioritization The SUS reform established health a fundamental right and duty of the state and started a process of fundamentally transforming Brazil s health system to achieve this goal So what has been achieved since the SUS was established And what challenges remain in achieving the goals that were established in 1988 These questions are the focus of this report Specifically it seeks to assess whether the SUS reforms have managed to transform the health system as envisaged more than 20 years ago and whether the reforms have led to improved outcomes in terms of access to services financial protection and health status Any effort to assess the performance of a health system runs into a host of challenges concerning the definition of boundaries of the health system the outcomes that the assessment should focus on data sources and quality and the role of policies and reforms in understanding how the performance of the health system has changed over time Building on an extensive literature on health system assessment this report is based on a simple framework that specifies a set of health system building blocks which affect a number of intermediate outcomes such as access quality and efficiency which in turn contribute to final outcomes including health status financial protection and satisfaction Based on this framework the report starts by looking at how key building blocks of Brazil s health system have changed over time and then moves on to review performance in terms of intermediate and final outcomes
